FINISH COLOR MATCHING:
Different wood species offer unique texture and grain. Minor variations in finish color may occur due to the natural characteristics of wood. Paoli carefully selects all material used in every product insuring a commercially acceptable color and finish.

CUSTOM FINISHES
Custom finishes can be done for an upcharge. A 3"x 3" sample must be sent to customer service for approval and a quote.

VENEER:
Genuine flat sliced, slip matched cherry or maple veneers or book matched walnut veneers, selectively matched on all surfaces to provide proper consistency.

TOPS:
User and visitor edges can be profiled in a choice of either Shark or Knife. Profiled edges feature a solid hardwood internal band. The seamless, visual curved, profile edges utilize steam-bent hardwood to minimize seams. Conference tops have mitered corners where two profiles meet. Returns and bridges have a reverse shaped profile. Finished tops are 1 7/16" thick with a 5-ply balanced construction and a heavy duty backer. Tops are constructed around a 45 pound density particleboard core. Grommet not standard on worksurfaces. Additional grommet upcharge of $100 per worksurface.

CHASSIS CONSTRUCTION:
Door and drawer fronts are slip matched cherry or maple veneers or book matched walnut veneers to match the tops and overlay the chassis. Chassis are assembled with dowel construction for precise tolerances. Units have solid hardwood parting rails and are reinforced with hardwood cleats and glue. All base units have adjustable leveling glides to compensate for uneven floor surfaces. The leveling glides can be accessed either from underneath or within the unit. Chassis panels are .75" thick with a 3-ply balanced construction and a heavy duty backer. All panels are constructed around a 45 pound density particleboard core.

DRAWER CONSTRUCTION:
Four corner construction dovetail box and file drawers are built as individual units. Drawers are constructed with 7/16" wood sides, 3/16" wood bottom and finished with a 3-step catalyzed varnish finish. Drawer fronts are .75" thick with a 3-ply balanced construction and a heavy duty backer.

DRAWER SUSPENSION:
Drawer slides are heavy duty, full extension, steel ball bearing slides for smooth operation and access to the entire drawer. Slides on desk and credenza box drawers are rated at 100 pounds. File drawers are rated at 150 pounds per set. Slides on lateral files are rated 150 pounds per set.

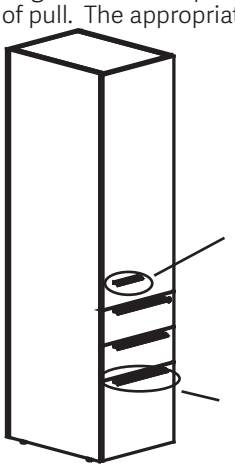
FILE DRAWERS:
File drawers come with a heavy duty metal filing system. Letter width file drawers on desks and credenzas accommodate letter or legal filing.

LOCKING:
Pedestal locking is standard on all desks, credenzas and returns. Lateral files utilize an anti-tip mechanism. "Timberline" brand lock system components are used throughout. Requests can be made for units to be keyed alike, or lock cylinders can easily be replaced in the field.

DOOR AND DRAWER HARDWARE:
The three pull styles are available in a Matte Chrome or Matte Black finish. Specify style and finish when ordering. Short pulls are used above the worksurface in upper storage units and in personal cabinets. Long pulls are used below the worksurface. It is not necessary to specify any length of pull. The appropriate length will be used automatically.

All pulls are available in Matte Black (MB) & Matte Chrome (MC)

It is not necessary to specify length of desired pull. The appropriate pull will be used automatically.



HINGES:
Hinges are European style and easily adjustable in the field.

FINISH:
Paoli's multi-step catalyzed varnish utilizes the latest technology. The superior strength of Paoli's NatureTech finish provides enhanced stain and mar resistance for lasting beauty and easy maintenance. Fuse is available in the following cherry veneers: Autumn on Cherry, Cafelle on Cherry, Caramel on Cherry, Cordovan on Cherry, Shaker on Cherry, Sienna on Cherry; the following maple veneers: Harvest on Maple, Kensington on Maple and the following walnut veneers: Colombian on Walnut, Heights on Walnut, Skyline on Walnut, and Studio on Walnut.

General:
Fuse is a modular casegood line constructed for ease in configuring, wire management, and clean aesthetics. Fuse has a wide offering that allows multiple units and configurations to be built up. Fuse components and hardware meet or exceed BIFMA standards.

Thickness of end panel on Upper and Personal Cabinets is 1".
Thickness of end panels on Enhanced Upper Cabinets is 2".
Distance between worksurfaces and Upper Bookcases is 25".
Distance between worksurfaces and Upper Bookcases with Enhanced Floating Shelf is 19".

Option Designators:

The top profile options are:
- **KF** for Knife
- **SH** for Shark

The pedestal options are:
- **2** for 18" File/File Pedestal
- **3** for 18" Box/Box/File Pedestal
- **4** for 36" Lateral File Pedestal
- **5** for 36" Multi File Pedestal
- **6** for 30" Personal Storage Pedestal
- **7** for 36" Combination Pedestal

The pull options are:
- **RD** for Rod
- **CH** for Chamfer
- **SH** for Shark

Finishes for above pulls are:
- **MC** for Matte Chrome
- **MB** for Matte Black

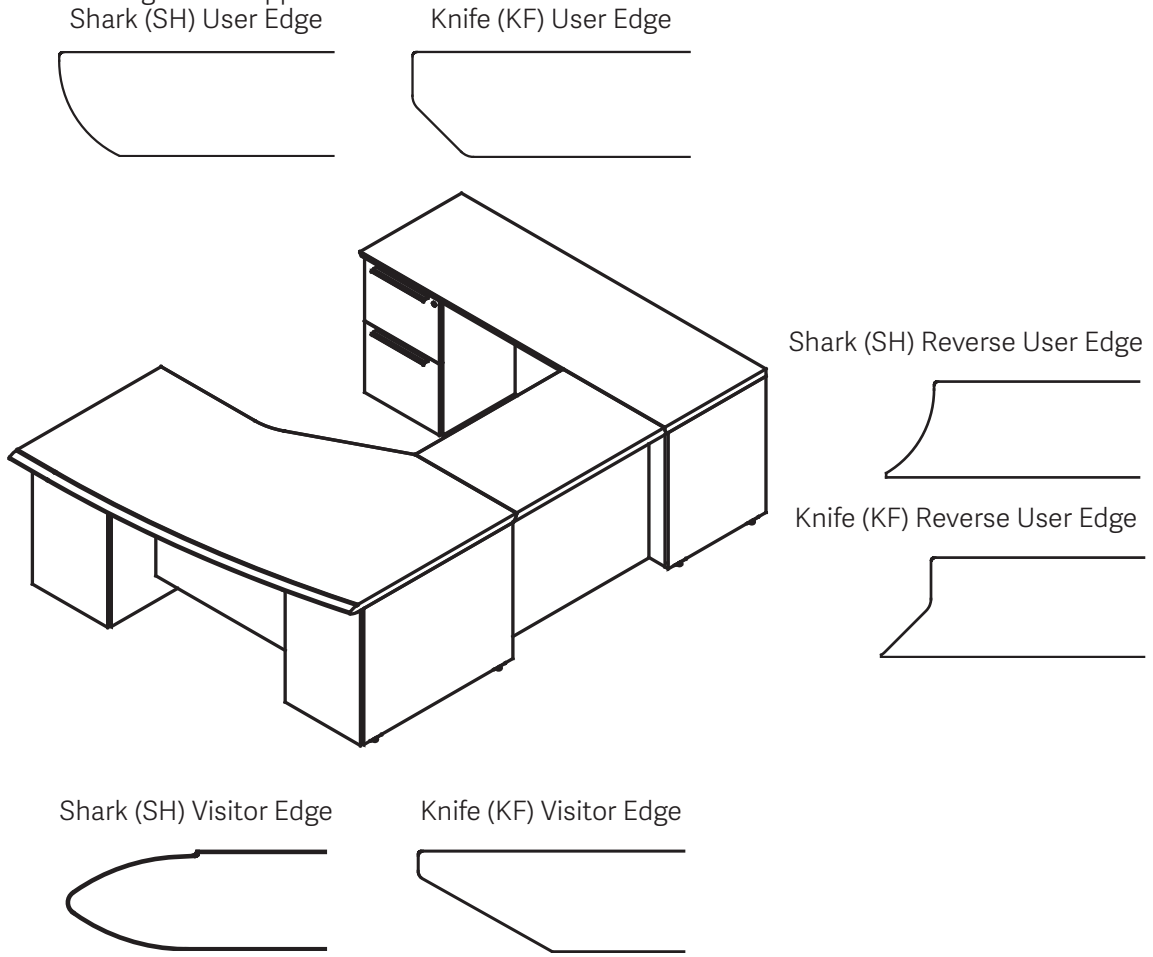
The modesty options are:
- **V** for Veneer
- **A** for Acrylic

The wing end options are:
- **WE** for Enhanced
- **WS** for Standard
- **WT** for T Panel

The door options are:
- **DW** for Wood Door
- **DA** for Acrylic Door
- **DO** for No Door

Edge Profile Options:

Fuse worksurfaces combine user and visitor edges to maximize the function and aesthetics. Choosing a profile will define the correct edge for an application.



Fuse edges have an accompanying reverse edge that allows for smooth transition with bridges and returns.

Pedestals - Left, Center & Right

Pedestals: Left, Center & Right

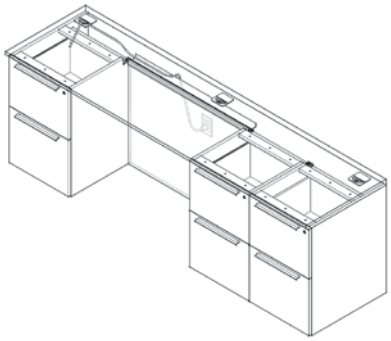
Fuse pedestals are set up with left, right and center pedestals. This comes into consideration when you are purchasing the components by themselves to build up a unit.

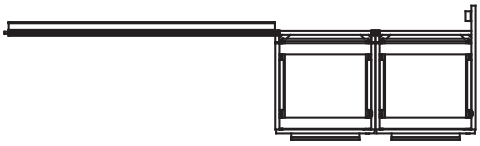
Left Pedestal
P-FS1824BL

Center Pedestal
P-FS1824BC

Right Pedestal
P-FS1824BR

In order to gain access to the wall and provide wire management capabilities, left, right and center pedestals work together seamlessly. A left or right pedestal must be specified at the end of a worksurface and all other locations should have a center pedestal to create a space to route and hide cables. Modesty panels attach in the kneespace of any pedestal combination to completely close off the cavity.





Center Pedestal

Right Pedestal

Standard Support

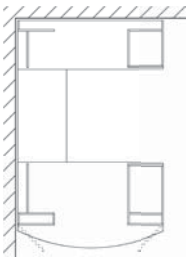
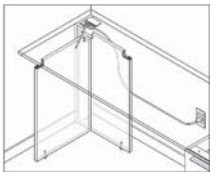
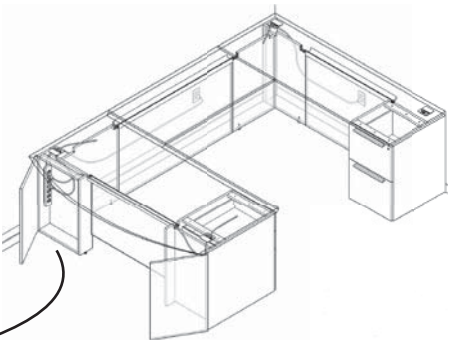
Standard Wing End Support

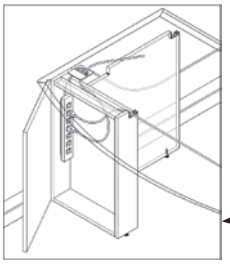




Standard credenza wing ends create a 4 ½" cavity between the wall and the unit allowing wires to pass completely behind the unit.

Standard Wing Ends are used when the unit will be placed up against a wall. It allows increased access to the wall for outlets and wire management. At the same time, it is a slight cost savings.





Standard desk wing ends allow for wire passage between the unit and wall, and still provide a hinged door for visitors to access power.

Enhanced Support

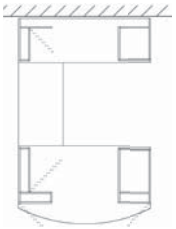
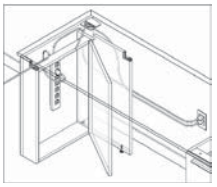
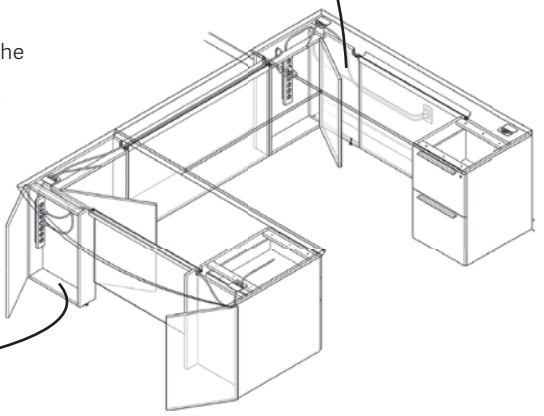
Enhanced Wing End Support

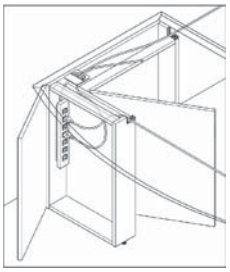




Enhanced credenza wing ends provide a door to access wires without being unsightly.

Enhanced Wing Ends are used on units that are out, away from the wall. The hinged door on the enhanced units allows end users a compartment to store outlet strips and run cords through, while keeping them visually hidden.





Doors on both sides of the enhanced desk wing end allow wires to freely pass from one side of the unit to the other.

Locks				
Lock Core Matte Black				
	P-PCMB	$ 12	1	0.1
Lock Core Matte Chrome				
	P-PCMC	$ 12	1	0.1
SIN #711-8	**Specify Key Number**			
Master Key				
	P-PMK	$ 5	1	0.1
Change Key				
	P-PCK	$ 10	1	0.1

Key numbers available for locks are X100T-X125T. Please calculate the total number of locks you need to order. Then calculate how many must be keyed alike. Select the same key number for each of the locks you would like to be keyed alike. For example, if you need 15 locks ordered for your office with five keyed alike for one office and 10 keyed alike for another office, it would look like this: 5 - P-PCMB.X101T, 10 – P-PCMB.X102T

Sample model dot.option string / See page FS5 for a complete list of options

Specify selections, left to right:
