TECHNICAL SPECIFICATIONS

Mechanism

Swivel with Tilt Tension Adjustment & Tilt Lock
The mechanism is constructed of heavy-gauge steel and includes swivel, tension adjustment and tilt lock. Tilt tension knob allows a rocking motion to support movement. Adjustment is controlled via the tension knob located beneath the seat. Seat height lever adjusts with 4" of travel, from 18¼" to 22¼".

Seat
Constructed with ½" thick plywood, steel frame and polyester fiber batting cushion.

Backrest
High-back with integrated headrest, constructed with ½" thick plywood, steel frame, polyurethane cut-foam cushion with integrated lumbar contour. Infinite-angle lock provides up to ten locking positions, from upright to a maximum 135 degree full-recline, via the convenient and east to access adjustment lever.

Base
Injection-molded plastic 5-blade base.

Casters
Casters are 55 mm O.D., hooded. dual-wheel plastic, and are designed for use on both carpet and hard floor.

Arms
All chairs include fixed-height non-adjustable arms with steel tube uprights and injection-molded caps. Inside armrest distance is 22½". Top of arms are 8" from seat.
