

Features:

- Available with LED and MR16 halogen lamps.¹
- Precision machined aluminum, brass, or stainless steel faceplate.
- Optional collar allows for mounting in concrete pour applications.
- Can be used for drive over applications.
- Black anodized aluminum lamp holder uses a flush lens to prevent water pooling and reduce maintenance.
- Lamp holder accepts up to three lens accessories.
- High temperature fitting and silicone seals are used to create a completely water tight lamp compartment.
- CSA tested & certified to US & Canadian safety standards for use in wet locations.
