# Masters Series — Finish Matrix

**Wood Finish/Color Legend**

Because of the natural properties of wood, variations of grain and finish color can be expected. Haworth carefully selects materials used in the manufacturing of products to ensure consistent and acceptable color.

Wood is susceptible to color change from exposure to UV rays. Haworth controls this by using surface finishes to reduce color change. However, change may be more evident in light-colored finishes.

All Haworth Wood Casegoods receive the Haworth EcoShield™ water-based, UV cured finish, except for Suite which receives a hand-applied, water-based finish.

EcoShield and hand-applied, water-based finished products are not designed to go together and are not recommended for use within the same space.

Masters Series has a water-based, UV cured EcoShield finish.

- Wood grain laminate grain switches direction to horizontal at 60"W. Recommend dividing into multiple pieces when you want to synchronize vertical grain.
- Separately specify wall mount spacers to align the front face of lower tackboards or wall mounted glass tiles with the front face of a Open Sided Shelf.
- Commonly used above a separately specified tackboard.
- If a tackboard is required between 1.5H lower storage and 1.5H or 2H upper storage contact Tailored Solutions; tackboard height is not available as standard product.
- An Open Sided Shelf does not have a front valance and is not recommended for use with a task light; if specified the task light will be visible.
- See Specification Guide for weight limits.
- **To achieve proper alignment when installing Open Sided Shelves side by side, installation must be performed using eparts tool #TS00-137Z and field supplied dowels .315”(8mm) x 1.25"(31.75mm).**
- There is a .25”(6mm) gap between the shelf and lower storage or worksurface which can be used toroute power.
