

**CONSTRUCTION**

- A** Housing - One main part and a decorative louvre are spun aluminium and are mechanically fixed to a central aluminium tube. This tube is welded to a moulded 356 aluminium alloy cap that integrates a fastening system. An internal plate equipped with hinges and made of steel provides access to the ballast and its electrical components. The 2-3/8" adapter fastening system adapts to a vast range of SDL brackets. Consult the brochure "Poles and accessories" for the selection of a bracket.
- B** Frame - Made of one piece moulded 356 aluminium alloy, mechanically fixed to the housing and integrates a hinge system that receives the lens frame.
- C** Lens frame - Made of one piece moulded 356 aluminium alloy and integrates a hinge system that adapts to the frame. Quick access to the lamp is made possible by loosening only one screw. A high-strength EPDM gasket ensures sealing and prevents dust from infiltrating inside the luminaire.

**OPTICS**

- D** Lens - Made of tempered glass, clear, flat and heat resistant. A drop lens made of one piece thermoformed polycarbonate, clear and impact resistant is also available.
- E** Reflector - Made of segmented specular aluminium for multi-image duplication of the luminous arc. Offers a photometric distribution of IES type II, III, IV or V.

**ELECTRICAL COMPONENTS**

- F** Ballast - Easily accessible, the ballast is mounted on a removable heavy gauge galvanized steel tray, is equipped with a quick disconnect wiring system and is factory pre wired and tested. It has a high power-factor of 90% or more and is either CWA, CWI, HX, or reactor type. All electrical components are CSA and UL approved.
- Socket - Made of porcelain and 4KV pulse rated. For 175W or less, medium base and for 200W or more, mogul base (lamp not included).

**FINISH**

- All surfaces are chemically treated against corrosion through a multi-stage immersion process. The polyester powder finish is applied by a thermostatic process offering an excellent protection conforming to ASTM G7, D-2247 and B-117/D-1654 standards. Standard colours are black, bronze and white with a textured finish. Consult SDL's "Colour Selection Guide" for others.

**OPTIONS**

- Photoelectric cell - Integrated in a button type polymer housing. CSA and UL approved.

**HARDWARE**

- All exterior hardware is made of stainless steel.

**WARRANTY**

- This product has a three year warranty on the finish and against any manufacturing defect. The ballast and its components are covered by the manufacturer's warranty.
