Design: 'Corpus'

**Designer: Steven Smith**

Steven Smith graduated in 1983 with an MA in furniture design from Buckinghamshire College, High Wycombe, having done his first degree in 3D design at Birmingham Polytechnic prior to this. He set up as a freelance designer in 1991 and is now based in the south east of England.

**Features:**

This is a comprehensive collection of multi-purpose stacking chairs with an understated design aesthetic, offering elegance and sophistication with superb comfort, versatility and durability. Numerous permutations are possible with optional arms, linking, writing tablets and three sizes of backrest; three-quarter, full and high back. Designed and tested for severe contract use with matching cantilever chair and reception seating. The cantilever comes with arms and three-quarter back only. Reception chair and sofas with complimentary low tables with diffused glass or laminate/veneer tops. Elliptical, tubular steel legs throughout the range and slim lined curvaceous upholstery. Subtle dimpled surface to the slender, flowing, and extremely elegant moulded armrest. The fold away linking device, and mobile stacking, combined with a high degree of comfort over long periods of time, make Corpus the ideal conference or lecture chair in corporate, educational or hotel environments.

**Finishes:**

All chair and table frames can be Epoxy Polyester Powder Coated (EPPC) from our range of metal finishes, including bright or satin chrome plate. All plastic components and PU arms are black. Linking devices are finished in bright chrome.

**Marketplace:**

Extremely versatile collection of chairs, largely intended as a family of office chairs to cater for a number of needs. These include for visitors, receptions, meetings and conferences.
