

Krinklglas®

DIMENSIONAL PLASTICS CORPORATION

Benefits of Krinklglas®

1. Proven in thousands of installations since 1964.

2. Dade County approved as a fiber glass reinforced copolymer UV stabilized plastic paneling by The South Florida Building Code Compliance Office. Approval #97-0804.01

3. Fire Retardant...Can be formulated as a fire retardant material.

4. Saves money on lighting costs. Because of its natural properties, Krinklglas will let daylight into the room eliminating the need for curtains and shades, while obtaining privacy. It is also suitable for classrooms with televisions and computer monitors.

5. Virtually the only fiberglass reinforced copolymer panel in multiple color combinations.

6. Shatterproof...virtually unbreakable ...safer and stronger than glass.

7. Lighter ... 1/2 the weight of glass.

8. Unique multi-faceted surface and prismatic light diffusion characteristic provides gem-like brilliance and the appearance of faceted glass, yet is more practical, durable and versatile.

9. Available in a wide variety of patterns and designs, including "debossed" effects in diamonds, circles, squares, and artistic figures and shapes; mosaics; simulated lead lines in various styles.

10. Less expensive and much more durable than stained glass, with significantly less maintenance, yet just as beautiful.

11. Available in any vibrant color under the sun, plus over 20 multi-hued combinations.

12. Impervious to all weather conditions; proven durability for over 25 years. Warranty against severe fading for 5 years.

13. Company designers can create exclusive original designs or replicate existing designs or artwork. Any shade of color can be matched for a custom order.

14. Special vandal proof panels, with metal inlay, provides added physical security and visual deterrence available.

15. Density ranges from clear translucent to opaque

16. Chemical and scratch/abrasion resistant...easily cleaned with ordinary household cleaners or paint thinner, surface luster is easily restored with polyurethane.

17. Spray paint and graffiti are easily removed with Mineral Spirits or Laquer Thinner.

18. Does not deform under heat like thermoplastic. Does not crack in extreme cold condition.

19. Can be cut to most flat shapes. We do straight and curved cuts on request. (Based on customer-furnished templates).

20. Can be drilled and cut at the work site with conventional tools.

21. For both exterior and interior use.
