

Krinklglas®

DECORATIVE REINFORCED TRANSLUCENT PANELS

Colorful, economical, shatterproof — available in standard thicknesses (1/8", 3/16", 1/4") and sizes (4' x 8', 4' x 10', 5' x 8', 5' x 10'). Special thicknesses and sizes on request.

COLORS KRINKLGLAS®, with textured surfaces, is made in many "standard" single colors or multicolors (several colors artistically mixed to give a multi-hued effect) as well as custom and matching coloring. Our TRADITIONAL panels are single colors or multicolors with no added lines, designs or other features.

PATTERNS/SPECIALTIES Any single color or multicolor panel can also be produced with special black lines, debossings (impressions) of popular symbols, or other designs, patterns and surfaces. For example, if you want the combination of No. 13A multicolor with Cathedral Lines, simply specify Cathedral No. 13A. Ask for separate brochure on custom made murals and artwork.
