BASIC... simple, yet complex

Having won the Red Dot Award in 2006, this table series has proven itself to be a classic design. The simple styling of the leg and top surface creates a clean, streamline look, while it hides a complex folding mechanism that allows the tables to be folded and reconfigured or rolled away at a moments notice.

BASIC... quick release mechanism

The main focus of the BASIC Table Series is the wear-resistant folding mechanism, which permits the folding and unfolding of the pair of legs without turning the table.

With one hand you hold the table and with the other pull the lever that releases the leg mechanism to close or open the pair of legs on one end. The leg assembly is part of a full structure that the top is attached, creating a sturdy structure for the table surface.

There are both folding and fixed legs available. The fixed legs are utilized when you do not need to store the tables, and they may be mixed with folding legs because they look the same...they just cost less.

Both table models are offered in 63" or 79" lengths. The folding tables are available in 24" and 31 1/2" widths. The fixed tables come in 24", 31 1/2", and 39 1/2" widths. Fixed tables are also available in 39 1/2" and 55" square.

Custom sizes are available upon request, but folding tables cannot go below 63" due to folding mechanism.

BASIC... stacking carts

All folding top sizes have corresponding stacking carts. It is recommended to stack tables only eight high. The handle may be removed for easy access.

BASIC ... reconfigure at ease

Whether it is for a training room or a simple meeting, BASIC allows for fast and simple reconfiguration. The onboard connecting device joins the two legs together and may simply be disconnected using no tools.

Modesty panels are connected to the legs and do not require tools to attach or remove. They are only offered in aluminum laminate.

Tops are available in a special laminate offering — five self-edge solid colors and ten wood laminate colorations. All tops may also be specified in beech, cherry, maple, or oak veneer with Davis' Standard Wood Finishes with solid wood edge bands.
