## **cloud softlight by molo**

cloud softlight is the most recent addition to the family of flexible honeycomb structures that molo creates from paper and textiles. cloud softlight can create a luminous overhead canopy, hung in clusters, tailored to the individual space they are shaping. Alternately, individual pendants in four different sizes can be suspended. The hollow cloud forms are internally lit by LED light, making the sculptural three dimensional forms mysteriously radiant when viewed from any direction. You decide the topography of your own cloudscape, positioning how it rises and falls through and over a space. Discover the possibilities to shape an intimate, gentle quality of space under the cloud, move through and above it with a staircase or anything else you might imagine...

## cloud softlight

product		dimensions height x diameter	material	colour	voltage	product code
cloud softlight 1.2m (4') ø cluster (3 pieces)		3 cloud pendants 2 small 1 medium	textile	white	100 - 240 VAC	CLT-WH-C4
cloud softlight 1.8m (6') ø cluster (3 pieces)		3 cloud pendants 1 small 1 medium 1 large	textile	white	100 - 240 VAC	CLT-WH-C6
cloud softlight 2.4m (8') ø cluster (5 pieces)		5 cloud pendants 2 small 1 medium 1 large 1 x-large	textile	white	100 - 240 VAC	CLT-WH-C8
cloud softlight						
small pendant		560mm (22") ø	textile	white	100 - 240 VAC	CLT-WH-PS
medium pendant		860mm (34") ø	textile	white	100 - 240 VAC	CLT-WH-PM
large pendant		1180mm (46") ø	textile	white	100 - 240 VAC	CLT-WH-PL
x-large pendant		1620mm (64") ø	textile	white	100 - 240 VAC	CLT-WH-PX
