RADIUS MEETING SERIES

Designed by Wolfgang C.R. Mezger

THE RADIUS MEETING FROM DAVIS

RADIUS MEETING...intimate meeting spaces with modular comfort

Wolfgang C.R. Mezger extends the Radius Lounge Series by creating a high back version that offers intimate seating in open areas. This design is exceptional in hotel lobbies, corporate lounges, student lounges, or any environment where you need more privacy than a typical lounge grouping offers.

The RADIUS MEETING Series has the same components as the original series including the addition of a new 45° angle seating unit and a high round table that follows the curves of this new angled unit.

shown, right to left: RA-5101-R-CH Right End Leg, RM-9300 Three Seat Unit, RA-5201-CH Ganging Leg, two - RM-9545 45° Inside Curved Seats, RA-5201-CH Ganging Leg, RM-9300 Three Seat Unit, RA-5101-L-CH Left End Leg / Chrome

RADIUS MEETING...curved units create a more private setting

This series has 30°, 45°, and 90° inside and outside curved units that can be configured with straight or curved units to follow floor layouts. Or, they can be used freestanding as shown below. This is made of six 45° units with the larger diameter curve designed specifically for meeting applications. The table shown was created to be at the correct height and scale to fit the circumference of the circle of the inner seats.

RADIUS MEETING...straight units make waiting areas more private

A simple waiting area can turn into a private meeting area with RADIUS MEETING. The high back design adds privacy, as well as, a visual break in lounge environments. Units may be placed back-to-back or connected together with curved seating units or tables. There are numerous freestanding occasional tables available in this collection that coordinate with the many configurations derived from this collection.

The tables are offered in an acrylic surface or in several types of standard veneers. Tables may also be attached at the ends, connected in between seating units, or at corners.

All metal parts are available in chrome or five standard powdercoate finishes. Legs have adjustable glides to level units.
