CARRÉ...simple connections

Simplicity is the foundation of the design statement made by the table series...Carré. A single, tapered quarter leg creates a union between top surfaces that is both functional and distinctive in its aesthetic appeal.

Carré "teardrop" table shown with Davis' Motion chairs.

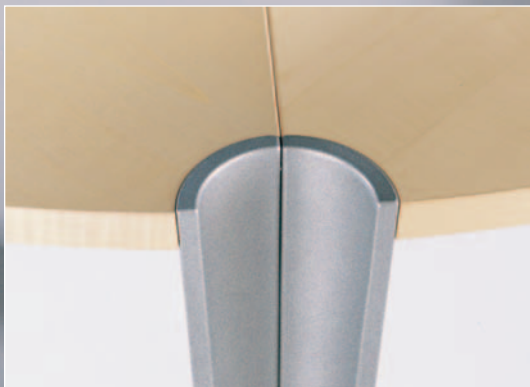

Satin Chrome Leg / Cherry Veneer

Textured Black Leg / Beech Veneer

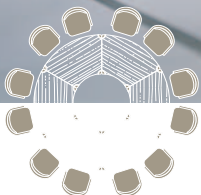

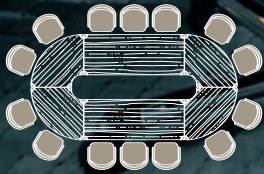

Textured Silver Leg / Sycamore Veneer

CARRÉ...the leg

Tapered-quartered legs are inset into the table top surfaces in such a manner that allows them to form half, three-quarter or full circles. Legs are offered in Satin Chrome and Powdercoate Finishes — Black, Silver, Matte Black, Matte Silver, Textured Black, and Textured Silver.

CARRÉ...veneer selections

All table tops are offered in four veneer species — Beech, Ash, Sycamore or Cherry. As a bonus to the design statement, the direction of veneer grain may be specified to enhance the aesthetic impact of the table. Many tables are offered with two different grain directions — straight or angled. Each table configuration is made-to-order to assure veneer pattern match throughout the table top sections.

Grain direction is angled on each 60° top to add a visual movement to the table.

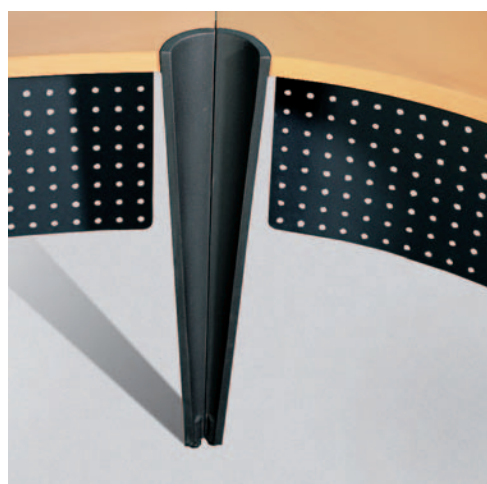

CARRÉ...table units

All tops are sold as complete table units with the appropriate number of legs and connecting devices. Tops are grouped by their connecting sides: 34", 40" and 60". All are segment tops, available in 45°, 60° and 90°, will connect to 34" units only. Half rounds and end segments are used as end units; some have four legs and may be used freestanding. Corner units may be used to create full circles or turn corners for larger configurations.

Carré “u-shaped” table with modesty panels and electrical modules shown with Davis’ Webb chairs, TJC Towers storage units, and Zeno armless chairs in foreground.

Legs and Modesty Panels in Textured Black

Legs and Modesty Panels in Textured Silver

CARRÉ ...modesty panels

For occasions where tables are used for presentations or in large open configurations, modesty panels are available. These panels are constructed of perforated metal and are offered in Powdercoat Finishes — Black, Silver, Matte Black, Matte Silver, Textured Black, and Textured Silver.

Connecting Device

CARRÉ ...connecting device

Tables are joined together with a simple connecting device that is tightened by hand — no tools required. Two connecting devices per table joint are included with the table and will follow layout requirements.

CARRÉ ... tops now offered in laminates

Carré Tables may be specified in Nevamar or Wilson Art laminates with either T-mold or solid wood edges. Wood edges are available in Beech, Cherry or Sycamore with a natural finish. T-mold is offered in black only.
