FENIX...comfortable, classic, and award winning

Wolfgang C.R. Mezger designs his first executive chair for Davis and it was a winner at NeoCon®. The unsurpassed sculptural appearance of the Fenix Chair was labeled the “true next generation of office seating.” Clean and classic lines offer unique comfort...at a remarkable price.

FENIX...new mechanism adds exceptional comfort

Fenix offers built-in passive ergonomics that is extremely comfortable with full body support. The "Flex Tilt" mechanism was designed specifically for the Fenix Chair. It allows the seat and back form to rock backwards in the same manner as a synchro-tilt. The uniqueness of this mechanism is that it bends under the thigh area, which makes the user feel more supported in the rocking movement. While moving backwards, the flared arms maintain their position so the user can relax their body with their arms still in a working position.

Designed to appear as a one-piece shell, the Fenix Chair has a very distinctive look that is more appealing to the executive.

FENIX...emission testing

The Fenix Chair series meets all the necessary qualifications to be certified for **Indoor Advantage™ GOLD/ Indoor Air Quality Certification.**

This testing conforms to ANSI/BIFMA Furniture Emissions standards for open plan and private office and CA section 01350 specifications. Certification Reg. No. SCS-IAQ-01669.

## FENIX...a mid back with attitude

The mid back Fenix is a perfect scale for the smaller frame users, but offers a great footprint of only 27" wide for conferencing. It utilizes the same proprietary mechanism that allows the user to relax, while still keeping their feet on the floor and hands in work mode.

The beautiful sculptural shell paired with rich leathers or vibrant textiles will make a design statement in any office environment.
