ZENO...the chair

Slightly provocative...definitely a work of art...the Zeno Chair Series exudes the statement "less is more." The slim, sweeping aluminum frame gently supports the curvature of the pressed beech wood shell. Uncomplicated, yet widely employable as a luxurious conference chair or guest chair in the private office, public seating, or hospitality arena.

ZENO...the selections

Designed by Wolfgang C.R. Mezger, the Zeno Chair Series affords numerous possibilities both in functions and features. The line consists of arm and armless chairs in beech wood shells or with upholstered interiors. Arms are available in beech wood or black resin overlays. Optional tablet arms are offered on all chairs.

The beech wood may be specified in standard Davis beech finishes, or in the new transparent finishes...ZE-COLOR, specially developed for this chair collection. Metal frames are available in a polished chrome top surface with glass bead-blasted sides, textured black or black powder coat.

Armless / Interior Upholstered Shell / Chrome Finish

ZENO...stacking the odds

Armless, arm and tablet arm chairs may be stacked. Built-in bumpers on the frame and glides on the legs support and protect chairs when stacked. A transport trolley is available for ease of movement.

Transport Trolley

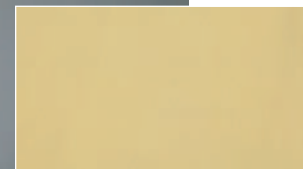

ZE-COLOR...adding color to your seat

Specifically selected for the Zeno Series, ZE-COLOR finishes provide a range of eight transparent pigments that allow the beauty of the beech wood shell to show through.

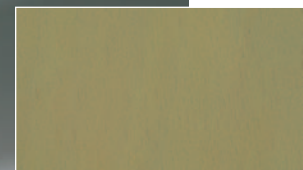

The color range was chosen to blend with the most popular fabrics in the contract market today.

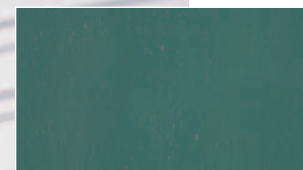

1501 Glacier

1502 Moonstone

1503 Citron

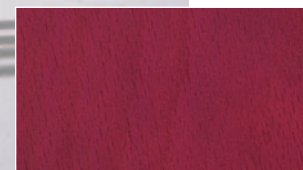

1504 Aspen

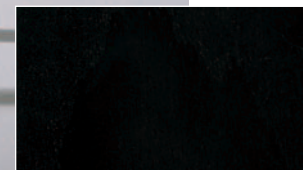

1505 Delft

1506 Plum

1507 Sangria

1508 Black Ink

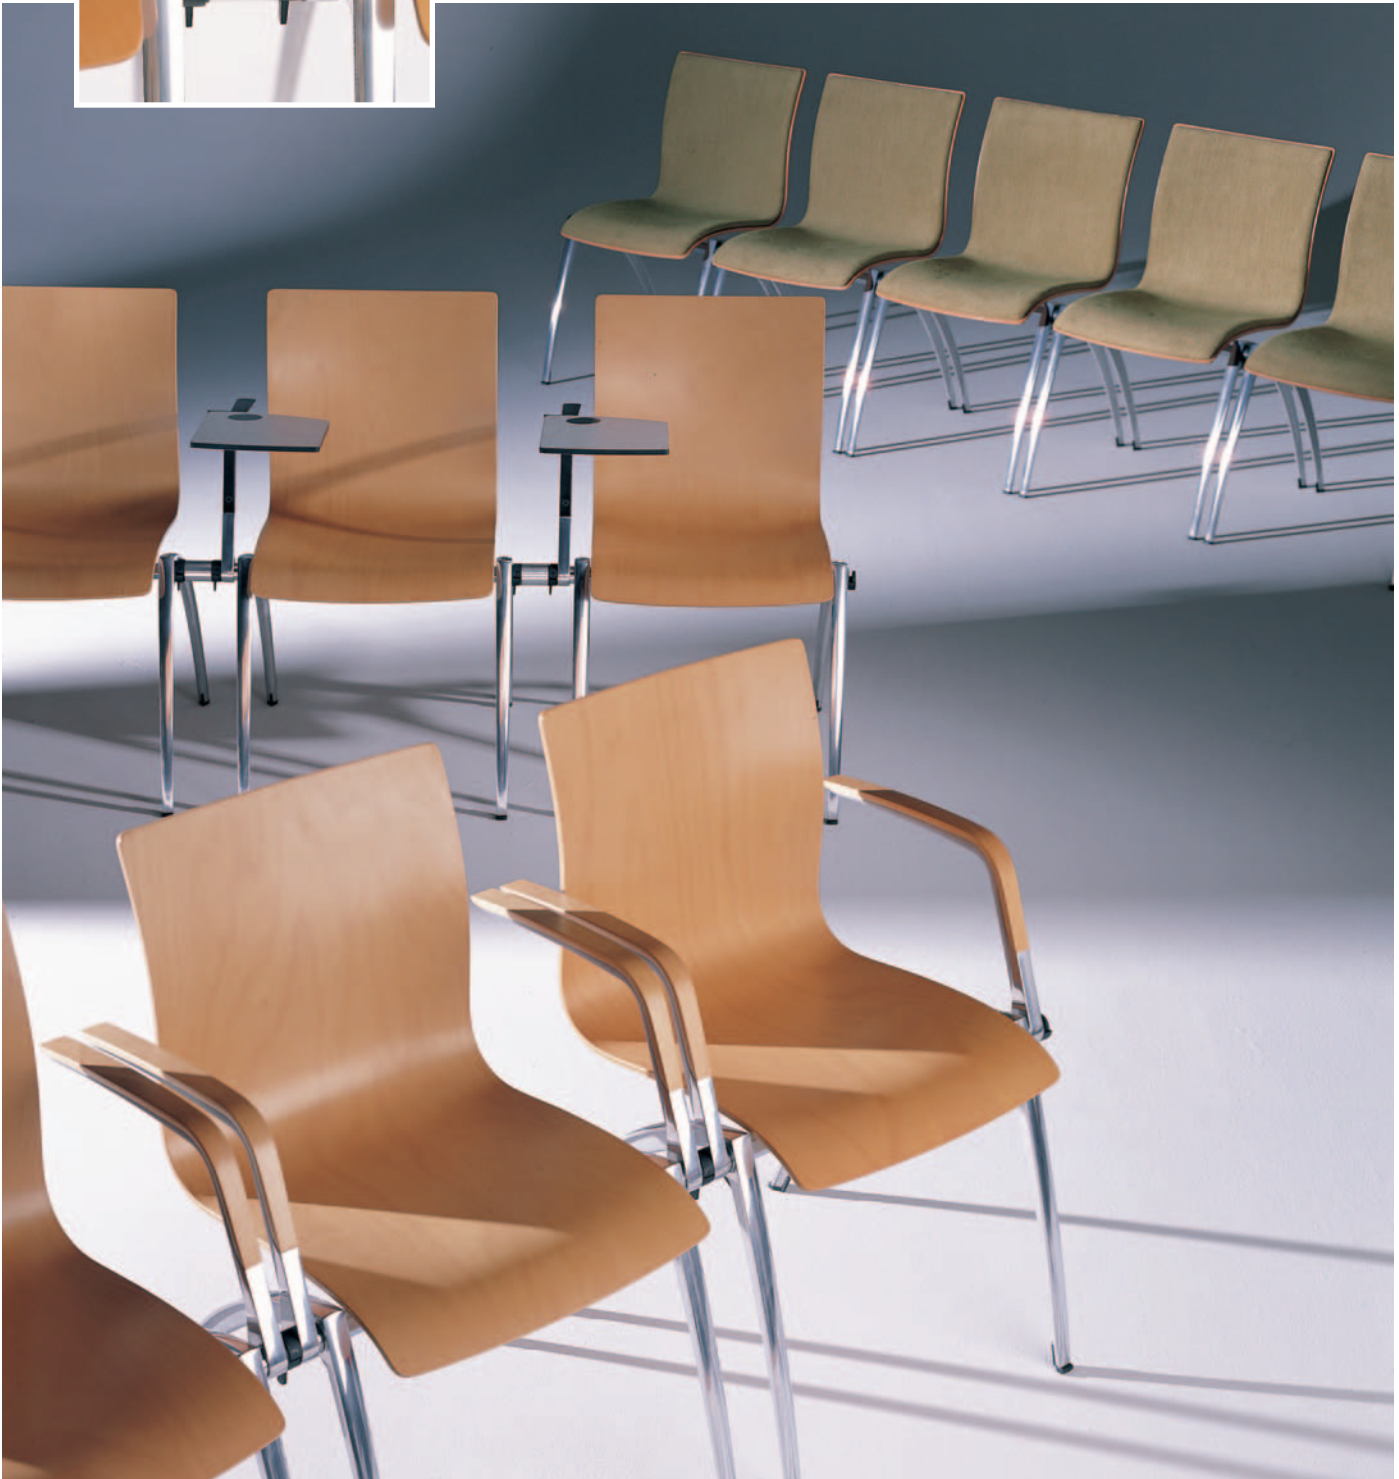

ZE-LD links Arm to Arm, Arm to Armless and Armless to Armless

ZE-LDTA links Tablet Arm to Arm or Armless

ZENO...linking the audience

For those occasions where seminar or theater seating is necessary, a linking device may be ordered for armless, arm or tablet arm chairs.

ZENO...studious support

A tablet arm may be specified on any armless or arm chair. The tablet is constructed of black resin with a white laminate top and bottom surface.

The arm portion may be specified in beech wood or black resin.

When not in use, the tablet folds to the side of the chair.

ZENO TANDEM... on a beam

The flexibility of the shell design allows for an offering of three, four and five-seat beam units. Partitioning wood arms may be ordered at ends or between seats. Fully upholstered seats are available on beam units to offer a plusher cushion for high traffic areas.

Several tables are offered in the Zeno Tandem Series. Beam tables may be ordered as a substitution for any seat on a beam. A unique pivoting corner table is recommended for re-configurational or angular space requirements. The freestanding table may be utilized in many types of lounge floor plans. All tables are available in beech wood or plastic laminate.
