Zoom...expanding the definition of a boardroom table to meet today's business needs.

Zoom reflects the solid image expected of a boardroom conference table, while its flexible design expands for multiple functions. Conference tops and linking tops are available in solid wood with a standard offering in ash, beech, cherry, and European maple. Special woods, top sizes, and power/data/audio support are also possible as shown in the photo.

shown: custom shape Zoom Meeting table in 6000 European Maple with custom modesty panels and microphones.

ZOOM MEETING...MULTI-FUNCTIONAL

Today's boardrooms are used for a variety of activities. Recognizing the changing needs of today's boardrooms, Zoom's modular design allows for the optimum configuration for each occasion. Because tables are not connected, they slide easily into different configurations with the aid of the design of the metal plate base and solid wood tops.

ZOOM MEETING...CONFIGURATIONS

The solid wood Zoom Meeting boardroom system reflects the image expected of an executive conference table, while its flexible design expands for other functions including lecture, training, orientation, presentation, lunch, or seminar.

SOLID WOOD CONSTRUCTION

Each solid wood top is made from the wood of one tree to keep consistency in the creation of each top. Mod-4 and Mod-5 tops have metal bars that are inserted into non-visible routed areas to offer lasting quality and to prohibit warping. This technique allows for the tops to have a thin profile, while also offering a physically lighter construction. Lightness in weight, as well as scale, also enhances the mobility to reconfigure the tops in an easier manner.

Small knots, flairs, and wind checks are part of the natural characteristics of solid wood. In that every table top is made from one tree trunk, each top may vary in color and pattern due to natural, individual tree growth.

CUSTOM LENGTHS & WOODS

In addition to the standard table lengths, Zoom can be custom ordered to a specific measurement. Tops can be constructed from 7'9" to 13' long with two bases. Zoom can also be custom built from other beautiful solid woods: Red Oak, Pear, or American/ European Walnut.

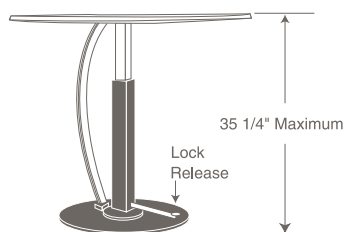

BASE OFFERING

All Zoom table base plates are offered in black powdercoate finish only. The 6" diameter Zoom leg is available in polished chrome, and black, silver, matte black or matte silver powdercoate finishes.

MOD - 1 ADJ

This adjustable height unit can be used in conjunction with conference tops or freestanding. The foot lever activates the top to be lowered or raised, requiring no electrical mechanism. It accommodates functions such as lecturing, training, orientation, and presentation. Inner telescoping column, control lever, and springs available in chrome only. Outer column and base plate available in black only.

ZOOM MEETING... PROJECTION UNITS

The electronically controlled, height adjusting projector platform is built into a Mod-2 unit to accommodate the specifications of most overhead or digital projectors.

Two electrical outlet units are included that supply power and data connections.

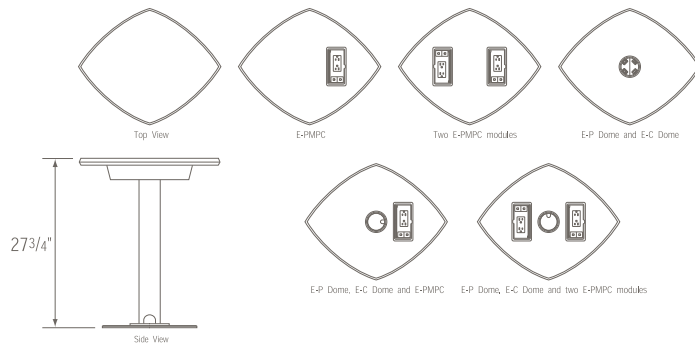

Brush reveal around projector shelf accommodates cords and prohibits finger pinching. Two button control operates to raise or lower projector shelf.

This unit may also be ordered with an adjustable shelf instead of the lift mechanism, so it may be used as just a storage unit.

ZOOM-PT... POWER TABLE

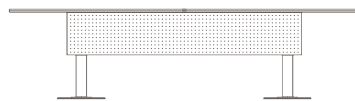

This special unit offers a mobile power source for Zoom Meeting. It is a freestanding unit that may be specified with a variety of data, voice, and power modules. The top is solid wood with matching base detail to tables. The top is solid wood with matching base detail to tables.

POWER/DATA/VOICE OPTIONS

Additional power/data units are available and may be mounted into table tops or underneath table units. Microphones may also be installed in solid wood tops, contact factory for specifications.

Metal perforated modesty panels are also available for conference top units on straight or curved sides.

ZOOM-LECTERN

As simple and versatile as the modular table program, this Zoom Lectern offers a sleek and clean profile for any boardroom. The top adjusts to three angles for speaker's use.
