

Wood Seating Specification Guide

What's New?

Spec News is available on in2.steelcase.com. Go to *Specification Guides*, under *AdStock Catalogs*, and download the current release's Spec News.

Availability

Electronic price list updated with release 166.D (U.S.) and 139.D (Canada), dated January 21, 2008.

► For a list of all trademarks, refer to the last page of this specification guide.

For Canadian Pricing

Calculate in the following order to avoid rounding errors:

- Multiply the base price and each option by 1.05.
- Round each to the nearest dollar.
- Add base and options for total list price.

Guidelines for Selecting Appropriate Ergonomic Seating

General-Use	High Interaction Low General-Use Seating Group Communicating Group Collaborating High-Performance Seating Individual Processing (task intensive) Individual Analyzing/Creating (multi-task) Lo w Autonomy High	• Short periods of sitting • Moderate computer use • In some cases, a general-use chair can be used for short-term, individual analyzing/creating.
High-Performance		• Long periods of sitting • Heavy computer use • The more repetitive the task (individual processing work), the more critical it is to have a high-performance chair with full adjustability.
Executive	Executive Seating	Today's executive is an active participant, not just a delegator. Image is very important in the executive suite, but time at the computer must also be a consideration. Whether image or ergonomics drive the choice, this range of seating is diverse to provide the perfect chair for any executive work setting. • Design that acknowledges image • Aesthetics and detailing that suit the setting • Ergonomic features matched to the kinds of work
Guest	Guest Seating	Guest seating must be adaptable to many roles: as side chairs, pulled up to the conference table, in the learning center, in the private office, or in high-traffic areas where long use-life is essential. Guest seating is not intended for long periods of seated work, but must provide short-term comfort and have a welcoming, comfortable look. • A style in harmony with the other furniture • A scale that suits the environment • A durability that fits the intended use
Stackable	Stackable Seating	Stackable seating is used when occasional, transportable, easy-to-store seating is needed. Whether used as side chairs, meeting chairs, in classrooms, or cafeterias, the challenge is to maintain an excellent aesthetic combined with great strength even though • Durability for high-volume, high-traffic use • Light weight for easy stacking and moving • Extra features if needed, such as tablet arms, bookracks, glides, transport and storage dollies, and ganging or alignment devices.
Lounge	Lounge Seating	Lounge seating is often multiple and is found throughout the organization from reception areas to executive offices. The selection is the broadest of any of our categories, ranging from traditional leather sofas to school and hospital seating. Lounge seating is the "first impression seating," critical to an organization's image. • Durability related to level of use • A design that looks right in multiples • Size, scale, and appearance that suits the environment

Basics of Ergonomic Seating

Basics of
Ergonomic Seating

Proper ergonomic seating can help workers perform more efficiently and avoid muscle and eye strain.

Neck is straight or slightly forward.

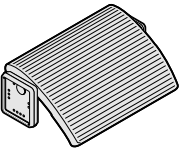

Shoulders are relaxed so arms hang naturally.

Back has full contact with the backrest (sit all the way back in your chair).

Elbows and forearms can rest comfortably on the arms of your chair, or on worksurfaces that are used for writing, paperwork, and other tasks.

Lower back fits into curved lumbar support.

Tension is adjusted so backrest tilts easily, yet provides smooth, even support.

If worksurfaces and keyboard support are not height-adjustable, raise your chair's seat height to achieve the appropriate relationship to your tasks. If this leaves your feet dangling above the floor, use a Details footrest.

Call Details, 1.800.833.0411, or your Steelcase dealer, for additional information or price list.

Top of monitor should be at eye level.

Screen is 20 to 30 inches from the eyes.

Screen is at eye level or slightly lower and directly in front of worker so head is not turned.

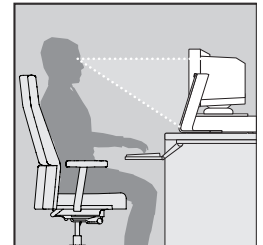

Keyboard is at elbow height.

Wrists should be straight when keying or mousing, not bent up or down.

When keying or mousing, forearms are parallel to the floor.

Thighs are parallel to the floor.

Feet are flat on the floor or on a footrest.

Keep frequently viewed objects, such as a VDT or source document, at or below the horizontal line of sight. Arrange display screen and documents to be equidistant from your eyes.

ANSI/HFES is the American National Standards Institute/Human Factors & Ergonomics Society. This organization's 1988 guidelines cover the ergonomic needs of task workers. These guidelines are currently under revision.

ANSI/BIFMA is the American National Standards Institute/Business and Institutional Furniture Manufacturer's Association. All Steelcase furniture meets or exceeds ANSI/BIFMA standards for structural quality.

Basics of Adjustability

Steelcase chairs offer varying levels of adjustability to meet the needs of many types of users. Adjustable chairs may offer one or more of these features:

Swivel feature allows the user to rotate the seat 360 degrees in either direction. (All)

Passive seat edge angle allows front edge of seat to drop down while seat angle remains unchanged. (Siento)

Synchro-tilt feature means the chair back and seat are synchronized to move in a 2:1 ratio. When the user leans back, the seat rises only half as much, allowing the user's feet to remain flat on the floor. (Siento, Theorem)

Pneumatic-height adjustment allows the user to remain seated while adjusting the seat height by way of a control button or lever. (All)

Back-tension adjustment allows the user to control the amount of resistance felt when leaning back in the chair. (All)

Swivel-tilt feature means the chair back and seat are fixed together and move in unison. When the user leans back, the seat rises so that the back-to-seat angle remains constant. (Gentry)

Manual-height adjustment allows the user to raise and lower seat height by spinning the seat while keeping the base stationary. Cannot be done from seated position. (Gentry, Theorem)

Variable back stop allows the user to lock the back upright and to preset their range of recline. (Theorem)

Knee-tilt (low front rise) minimizes the rise of the front of the seat when the chair is in a reclined position, allowing the user's feet to remain on the floor. This feature reduces pressure under the thighs, allowing for continuous blood circulation. (Mansfield, Masque)

Seat-angle adjustment allows the user to change the angle of the seat to a forward position. (Gentry knee-tilt models only.)

Upright back lock allows the user to lock the backrest in a full upright position or release it for full tilt motion. (Gentry, Mansfield, Masque, Siento)

Wood seating products are supported with an array of informational materials, tools, and software to help you plan an installation efficiently.

Product brochures and planning tools can be ordered through your Steelcase area office by calling 1.800.784.0358 or through the Steelcase Marketing Communications Web site at in2.steelcase.com.

Steelcase Inc. Corporate Capabilities Brochure

This publication offers a concise overview of Steelcase including insights into the attitudes and commitments that make the corporation unique. In addition, the brochure provides an illustrated listing of all the products and services offered and international activities are described.

Printed Materials

Surface Materials Reference Manual

This publication provides:

- An explanation of the surface materials and their categories
- "Available on" matrices
- Vertical surface fabric and seating upholstery selection listing
- Technical data for surface materials
- Surface material care and cleaning instructions

Planning Tools

Quick Delivery Handbook

This handbook describes all Steelcase, Turnstone, Details, and Steelcase Design Partnership products that are available for 3-Day (3-day shipment), Express12 (12-day delivery), or 15-Day (15-day shipment).

Casegoods and Seating Delivered in 12 Days

A comprehensive collection of "wood" casegoods and seating products available for 12-day delivery.
Form number S3461

Computer Tools

Electronic Catalog

Accurate sales quotations and purchase orders for Steelcase products are created with specification software that uses Steelcase Electronic Catalog data. Use the data to specify and price style numbers and options for every Steelcase product. The data is updated bimonthly by Steelcase and provided to software programs like the Hedberg Business System, 20-20 CAP Studio, and 20-20 Office Sales.

Furniture Symbol Graphic Data

Steelcase creates 2D and 3D furniture symbols (with attributes) for planning and initially specifying Steelcase products. This data is incorporated into several add-on software packages that work in either a Microstation or an AutoCAD drafting environment.

For more information about these and other software tools to help you plan effective work environments, please email fsl@steelcase.com.

Product Info

Electronic versions of this and many other specification guides in Acrobat PDF (Portable Document Format) allow you to scan, search, and print any page on virtually any computer. You can access these files at the Steelcase.com Web site or My Sales Online at in2.Steelcase.com.

Support

Steelcase Capabilities

Steelcase products are distributed, installed, and serviced through a network of more than 600 dealers worldwide. Steelcase is also represented with offices and corporate showrooms in 26 U.S. cities, 4 Canadian cities, and in France, Germany, Great Britain, and Japan. Every Steelcase product meets our exceptionally high standards of quality and durability and comes with the Steelcase assurance of excellence in service.

For assistance, please call your local dealer, the Steelcase Solutions Resource Team, or the Steelcase Solutions Fulfillment Team at 1.888.STEELCASE (1.888.783.3522).

Call the Steelcase Solutions Resource Team prior to placing an order, when working on a bid, or when you need information about product applications and specifications.

Call the Steelcase Solutions Fulfillment Team if you have submitted an order to Steelcase and you need to speak to your Solutions Fulfillment Team Representative about the order. Also call if you have any post-shipment quality or warranty concerns or service parts questions.

Outside the U.S.A., Canada, Mexico, Puerto Rico, and the U.S. Virgin Islands, call 1.616.247.2500.

For information about Steelcase, the name of your nearest Steelcase dealer, or for product literature, call 1.800.333.9939 or visit our Web site: www.steelcase.com.

Executive Seating

Siento	16
Mansfield	22
Masque	26
Theorem	30

Siento

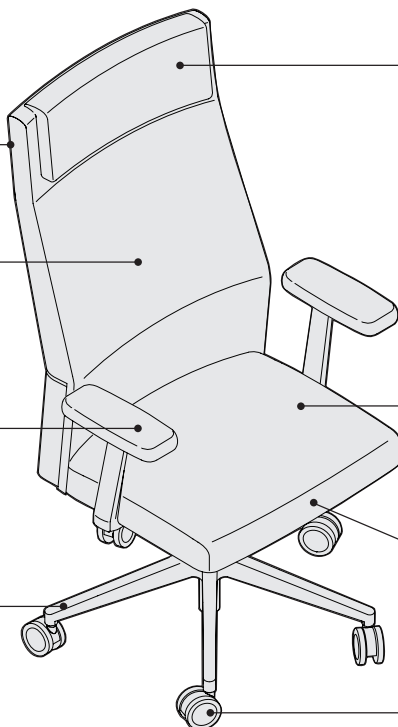

Siento desk chairs, designed in collaboration with Jorge Pensi, merge remarkable ergonomic comfort with a slim and sophisticated executive form.

Outer back is fully upholstered.

Patented LiveBack technology (found in Steelcase Leap chair) is embedded in the back to change shape and mimic the user's spine.

Arms are available as either T-arms or enclosed.

Five-arm base is available in polished aluminum, platinum, or black.

Headrest option provides additional head and neck support.

Seat height adjusts from 16" to 21" and is standard with pneumatic adjustment mechanism. Fixed-height option is also available.

Front seat edge flexes naturally to relieve pressure under the user's thighs.

3" hard dual-wheel casters are provided for use on carpet. Soft dual-wheel casters are available for use on hard floors or chair mats.

Product Details

High-back and mid-back desk chairs are available.

Arms are available as T-arms or enclosed. T-arms are available in urethane or fully upholstered. Enclosed arms are always fully upholstered.

All Siento chairs comply with ANSI/HFS and BIFMA standards.

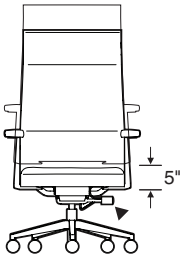

Actual Dimensions

	High-Back Desk Chairs with Headrest	High-Back Desk Chairs without Headrest	Mid-Back Desk Chairs
Overall depth	26"	26"	26"
Overall width—outside of T-arms	26¾"	26¾"	26¾"
Overall width—outside of enclosed arms	27½"	27½"	27½"
Overall height	46¾"—51¾"	46"—51"	40"—45"
Seat depth	17½"	17½"	17½"
Seat width	21"	21"	21"
Back height from seat	31½"	30"	24"
Width between arms	20½"	20½"	20½"
Arm height from seat	8"	8"	8"

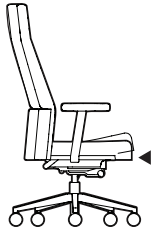

Adjustability Features

- Pneumatic seat-height
- Upright back lock
- Back tension control
- Synchro-tilt mechanism

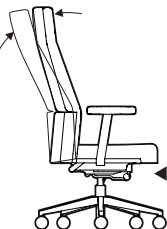

Adjustment Features

Seat height adjusts pneumatically. To lower, hold handle up while seated. To raise, hold handle up and keep your weight off the chair. Standard range of adjustability is 5" from 16"H to 21"H.

Seat edge flexes, relieving pressure under the user's thighs.

Upright back lock. Flick switch forward to lock; flick switch back to tilt.

Back tension control adjusts by turning knob. Turn knob forward to increase rate of tension, backward to decrease.

Synchro-tilt mechanism provides synchro-nized back movement while feet remain flat on the floor.

Surface Materials

Upholstery

- Fabric
- Fabric with soil-retardant treatment (option)
- Elmo Soft leather

Arms

- Black urethane T-arms
- Upholstered T-arms
- Enclosed upholstered arms

Column

- Black only

Base

- 0835 Black
- 4799 Platinum
- 8046 Polished Aluminum

Casters

- Black wheels with polished aluminum body on polished aluminum base

All Steelcase seating with standard upholstery fabrics complies with requirements of the BIFMA First Generation Voluntary Upholstered Furniture Standard, as well as State of California Technical Bulletins 116 and 117. All standard seating is labeled to be in compliance with California TB116/117.

Programs & Services

► See the *Surface Materials Reference Manual* for further detail about programs and services offered for seating.

The Customer's Own Material (COM) Program

offers the opportunity for customers to select fabrics that are not offered through the standard Steelcase surface materials program for use on Steelcase products. Through the COM program, Steelcase will test your materials for application on Steelcase products. Once approved, you can place your order. Steelcase will facilitate the entire ordering process and give you a production schedule. Steelcase will order the COM fabric directly from the textile manufacturer. For up-to-date information regarding fabric test results for all COM fabrics and details regarding yardage requirements for most Seating lines, visit the COM Web site. To locate the COM Web site:

- Visit www.steelcase.com
- Click on "Design Tools"
- Select "Custom Surface Materials"
- Select "Customer's Own Material (COM)"

Soil retardants are treatments that provide long-term soil and stain resistance to a fabric without affecting the shade or the integrity of the fabric. The following Steelcase Textiles and Designtex Graded-In fabrics are available pre-treated with soil retardant. (You do not need to select the soil-retardant option for these fabrics and incur the upcharge.)

- Brunswick
- Jacks
- Link
- Rough & Ready
- Roulette
- Sam
- Senecal
- Skittles
- Spyder

The following Designtex Graded-In fabrics are pre-treated with Crypton, Nanotex, or Teflon. (You do not need to select the soil retardant option for these fabrics and will not incur the \$20 upcharge).

- Acacia
- Appleseed
- Epiphany
- Halos
- Kabuki
- Kaleidoscope
- Klange
- Point
- Pueblo
- Singing in the Rain
- Terrain
- Tumbleweed

Soil-retardant treatment is available on all other seating fabrics at an additional upcharge per seating unit. To order this option, please select "Soil-Retardant Treatment" under "Optional Accessories."

For soil-retardant treatment on COMs, please select "Soil-Retardant Treatment" under "Optional Accessories." Minimums or additional yardage may be required. Please contact the vendor directly for specific information.

Extended lead times may be necessary for this service.

Contact your Steelcase Solutions Fulfillment Team Representative at 1.888.STEELCASE (1.888.783.3522).

Fire Codes

► See pages 135–139 for upholstery fabrics available for use with FCS modification.

Steelcase offers Fire Code Seating modification (FCS) on nearly all seating models. The most rigorous fire codes in the nation have been developed in California, and the Steelcase FCS modification is designed to meet those codes. Fire Code Seating (FCS) indicates that a product is constructed to meet the strict fire code requirements of high public occupancy areas such as theaters, meeting rooms, and lobbies. The FCS standards will meet both the State of California Home Furnishing Technical Bulletin 133 (Cal TB 133) and Boston Fire Code (BFC). Boston adopted the California Home Furnishing Technical Bulletin TB 133 test standard in 1992.

Fire code approval:

Siento executive desk models are available in the following fabric only: Leather

Local codes may have special requirements for upholstery.

Mansfield

Desk Chairs

Mansfield desk seating is a cost-effective, traditional collection with Chippendale aesthetics. Mansfield desk chairs complement Norfolk wood casegoods.

► See Mansfield guest chairs, page 68.

Brass tack accenting is optional.

Seat height adjusts from 18½"H to 21½"H. Pneumatic adjustment mechanism is standard.

Five-arm base with maple base caps is standard.

Antique brass-hooded ball casters are standard.

Welting on back is standard.

Camel back enhances traditional styling.

Arms are solid maple with upholstered arm rests.

Knee-tilt/low front rise mechanism with upright back lock is standard.

Product Details

Mid- and high-back desk chairs are available.

Five-arm base provides optimum balance. It is standard with maple base caps that are stained in the selected wood color.

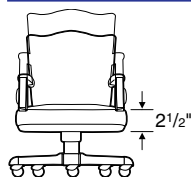

Actual Dimensions

	High-Back Desk Chairs	Mid-Back Desk Chairs
Overall depth	30½"	28½"
Overall width	24½"	24½"
Overall height	43⅞"–46⅜"	38¾"–41¼"
Seat depth	19½"	19½"
Seat width	19"	19"
Back width	21"	21"
Back height from seat	27½"	22½"
Width between arms	19"	19"
Seat to floor height	17⅝"–20⅛"	17⅝"–20⅛"
Arm height from floor	25⅜"–27⅞"	25⅜"–27⅞"

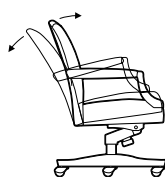

Adjustability Features

- Pneumatic height
- Knee-tilt mechanism
- Upright back lock
- Back tension

Adjustment Features

Pneumatic-height adjustment, standard on all desk chair models, allows seat height adjustment from 17 $\frac{5}{8}$ "H to 20 $\frac{1}{8}$ "H with fingertip pneumatic lever. To lower, hold handle up while seated. To raise, hold handle up and lift your weight off the chair.

Knee-tilt (low front rise) minimizes the rise of the front of the seat when the chair is in a reclined position, allowing the user's feet to remain on the floor. This feature reduces pressure under the thighs, allowing for continuous blood circulation.

Back tension control varies reclining back support from light to firm and adjusts by turning knob. Turn knob clockwise to decrease tension, counterclockwise to increase.

Tip: Be sure to unlock (release) the variable back stop before adjusting the back tension.

Upright back lock. To lock back upright, push lever down while sitting upright. To release back lock, pull lever up while sitting upright.

- Select "Customer's Own Material (COM)"

Soil retardants are treatments that provide long-term soil and stain resistance to a fabric without affecting the shade or the integrity of the fabric. The following Steelcase Textiles and Designtex Graded-In fabrics are available pre-treated with soil retardant. (You do not need to select the soil-retardant option for these fabrics and incur the upcharge.)

- Brunswick
- Jacks
- Link
- Rough & Ready
- Roulette
- Sam
- Senecal
- Skittles
- Spyder

The following Designtex Graded-In fabrics are pre-treated with Crypton, Nanotex, or Teflon. (You do not need to select the soil retardant option for these fabrics and will not incur the \$20 upcharge).

- Acacia
- Appleseed
- Epiphany
- Halos
- Kabuki
- Kaleidoscope
- Klange
- Point
- Pueblo
- Singing in the Rain
- Terrain
- Tumbleweed

Soil-retardant treatment is available on all other seating fabrics at an additional upcharge per seating unit. To order this option, please select "Soil-Retardant Treatment" under "Optional Accessories."

For soil-retardant treatment on COMs, please select "Soil-Retardant Treatment" under "Optional Accessories." Minimums or additional yardage may be required. Please contact the vendor directly for specific information.

Extended lead times may be necessary for this service.

Contact your Steelcase Solutions Fulfillment Team Representative at 1.888.STEELCASE (1.888.783.3522).

Fire Codes

► See pages 135–139 for upholstery fabrics available for use with FCS modification.

Steelcase offers Fire Code Seating modification (FCS) on nearly all seating models. The most rigorous fire codes in the nation have been developed in California, and the Steelcase FCS modification is designed to meet those codes. Fire Code Seating (FCS) indicates that a product is constructed to meet the strict fire code requirements of high public occupancy areas such as theaters, meeting rooms, and lobbies. The FCS standards will meet both the State of California Home Furnishing Technical Bulletin 133 (Cal TB 133) and Boston Fire Code (BFC). Boston adopted the California Home Furnishing Technical Bulletin TB 133 test standard in 1992.

Fire code approval:

Mansfield high-back model 140 and all variations of this model are available in the following fabrics only: Leather Vinyl

Local codes may have special requirements for upholstery.

Masque

Contemporary executive open arm desk chair. Thin, angular profile upholstered in leather and vinyl.

Fully upholstered outer back is standard.

Seat is generously proportioned in both depth and width. Seat height adjusts from 16"H to 19"H with standard pneumatic adjustment mechanism.

Five-arm base is metal with a black plastic overlay.

Hard dual-wheel casters are provided for use on carpet. Soft dual-wheel casters are available for use on hard floors or chair mats.

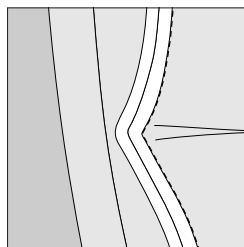

Inside surfaces are upholstered in leather. Outside back is upholstered in matching vinyl.

Lumbar contours provide lower back support.

Open arms are plastic with leather upholstered arm caps.

Waterfall front edge eases pressure on the backs of the user's legs and enhances circulation.

Product Details

High-back executive desk chairs are accented with stitching detail.

Five-arm base provides optimum balance.

Knee-tilt (low front rise) minimizes the rise of the front of the seat when the chair is in a reclined position, allowing the user's feet to remain on the floor. This feature reduces pressure under the thighs, allowing for continuous blood circulation.

Actual Dimensions

Overall depth	28"
Overall width	25 ³ / ₄ "
Overall height	42"-45"
Seat depth	19 ¹ / ₂ "
Seat width	20 ³ / ₄ "
Back width	20 ³ / ₄ "
Back height	26 ⁵ / ₈ "
Width between arms	20"
Seat to floor height	16"-19"
Arm height from floor	26"-29"

Adjustability Features

- Pneumatic height
- Upright back lock
- Back tension
- Knee-tilt control

Adjustment Features

Seat height adjusts pneumatically. To lower, hold handle up while seated. To raise, hold handle up and keep your weight off the chair.

Upright back lock. Push the pneumatic height control lever into lock, pull the lever out to tilt.

Back tension control adjusts by turning a knob. Turn knob clockwise to increase tension and counterclockwise to decrease tension.

Surface Materials**Upholstery**

- Black leather and vinyl
- Burgundy leather and vinyl

Tip: All inside surfaces are upholstered in leather and outside surfaces are upholstered in matching vinyl.

Samples of the leather are not available. However, they are similar in color to Steelcase L107 Black and L507 Vineyard leather.

Arms

- Black open arms with upholstered arm caps

Base and column

- Black base and column

Casters

- Black only

All Steelcase seating with standard upholstery fabrics

complies with requirements of the BIFMA First Generation Voluntary Upholstered Furniture Flammability Standard, as well as the State of California Technical Bulletins 116 and 117. All standard seating is labeled to be in compliance with California TB116/117.

Programs & Services

Soil retardant treatment is not available.

Fire Code Seating (FCS) modification is not available.

Local codes may have special requirements for upholstery.

Theorem

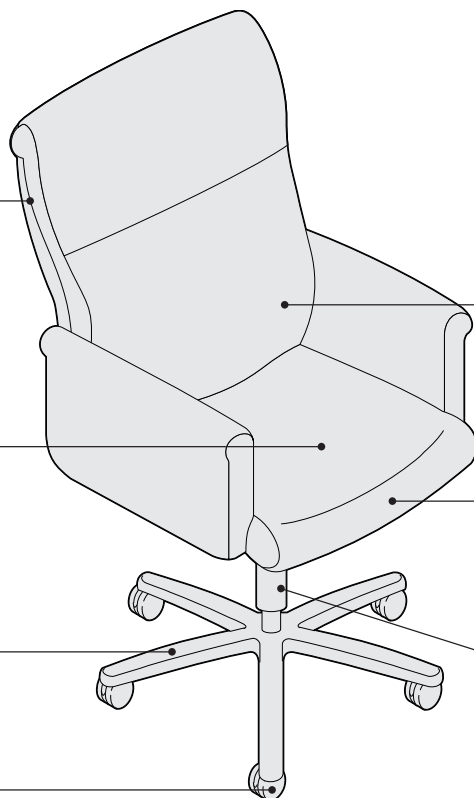

Theorem desk chairs, a Lisa Smith design, have a neutral, rectilinear design that is appropriate in contemporary or transitional settings. This chair line offers numerous ergonomic support features.

Double stitching accents the back and seat.

Seat height adjusts from 16"H to 21½"H and is available with manual or pneumatic adjustment mechanism.

Five-arm base is standard in black aluminum. Solid maple base caps are optional.

Hard dual-wheel casters are provided for use on carpet. Soft dual-wheel casters are available for use on hard floors or chair mats.

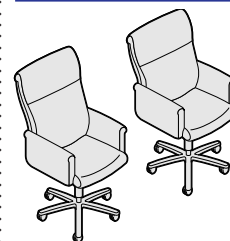

Lumbar contours provide lower back support.

Waterfall front edge eases pressure under user's legs and enhances circulation.

Synchro-tilt mechanism

Product Details

High- and mid-back desk chairs are available.

Enclosed arms are upholstered.

Extended-depth seat option, at 17½", adds 1½" to accommodate longer legs.

All Theorem desk chairs comply with ANSI/HFS and BIFMA standards.

Exception: The extended seat option exceeds ANSI/HFS seat depth restrictions.

Optional perforated leather seat and back adds ventilated comfort.

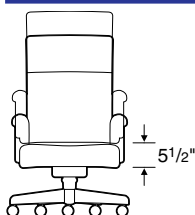

Actual Dimensions

	High-Back Desk Chairs	Mid-Back Desk Chairs
Overall depth	25"	25"
Overall width	27"	27"
Overall height	45"–50½"	40"–45½"
Seat depth	16"	16"
Seat width	20½"	20½"
Back width	20½"	20½"
Back height	30"	25"
Width between arms	20½"	20½"
Seat to floor height	16"–21½"	16"–21½"
Arm height from floor	24¾"–30¼"	24¾"–30¼"

Adjustability Features

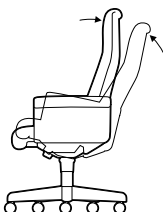

- Manual height
- Pneumatic height
- Variable back stop
- Back tension control
- Synchro-tilt mechanism

Adjustment Features

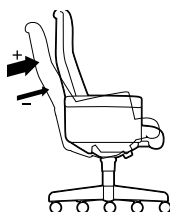

Manual-height adjustment is standard. Rotating the unoccupied chair raises or lowers the seat. Occupant's weight disengages the adjustment mechanism, so height won't change while chair is in use.

Pneumatic-height adjustment is available to allow push-button control from 16"H to 21½"H. To lower, pull lever on right side while seated. To raise, pull lever and lift your weight off the chair.

Variable back stop allows the back to stop at various tilt angles, including fully upright. Flick switch forward for full range of back angles. To limit back angle, recline to the desired position and flick switch back.

Tip: To lock in upright position, remove weight from back and flick switch back.

Back tension control varies reclining back support from light to firm and adjusts by turning knob. Turn knob clockwise to decrease tension, counterclockwise to increase.

Tip: Be sure to unlock (release) the variable back stop before adjusting the back tension.

Synchro-tilt mechanism provides synchro-nized back movement while feet remain flat on floor.

The Customer's Own Material (COM) Program

offers the opportunity for customers to select fabrics that are not offered through the standard Steelcase surface materials program for use on Steelcase products. Through the COM program, Steelcase will test your materials for application on Steelcase products. Once approved, you can place your order. Steelcase will facilitate the entire ordering process and give you a production schedule. Steelcase will order the COM fabric directly from the textile manufacturer. For up-to-date information regarding fabric test results for all COM fabrics and details regarding yardage requirements for most Seating lines, visit the COM Web site. To locate the COM Web site:

- Visit www.steelcase.com
- Click on "Design Tools"
- Select "Custom Surface Materials"
- Select "Customer's Own Material (COM)"

Soil retardants are treatments that provide long-term soil and stain resistance to a fabric without affecting the shade or the integrity of the fabric. The following Steelcase Textiles and Designtex Graded-In fabrics are available pre-treated with soil retardant. (You do not need to select the soil-retardant option for these fabrics and incur the upcharge.)

- Brunswick
- Jacks
- Link
- Rough & Ready
- Roulette
- Sam
- Senecal
- Skittles

General-Use Seating

Gentry	36

Gentry

Desk Chairs

Gentry chairs, designed by Arnie Dammermann, provide contemporary styling with a distinctive design that features clean, simple lines and natural contours.

► See Gentry guest chair, page 64.

Back provides solid ergonomic support.

Seat height adjusts from 16"H to 20½"H and is available with manual or pneumatic adjustment mechanism.

Optional knee-tilt mechanism with forward-tilt seat angle.

Five-arm base is black metal with black plastic base caps or maple base caps.

Waterfall seat edge relieves pressure behind user's legs and enhances circulation.

Hard dual-wheel casters are provided for use on carpet. Soft dual-wheel casters are available for use on hard floors or chair mats.

Product Details

Wood and thermoplastic models are available with high and low backs.

Guest chair is available with a maple frame only.
► Page 64

Arms on wood desk models are either enclosed upholstered or open maple with upholstered arm caps.

Arms on thermoplastic models are open and are black plastic colored.

Perforated leather is available on the seat and back to facilitate the flow of air.

Actual Dimensions

	High-Back Desk Chairs		Low-Back Desk Chairs	
	Open arms	Enclosed arms	Open arms	Enclosed arms

Back height	24"	24"	19"	19"
Width between arms	20"	20"	20"	20"
Seat to floor height	16"–20½"	16"–20½"	16"–20½"	16"–20½"
Arm height from floor	22½"–27"	22½"–27"	22½"–27"	22½"–27"

Adjustability Features

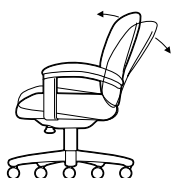

- Manual or pneumatic height
- Swivel-tilt control
- Knee-tilt control (optional)
- Upright back lock (on knee-tilt models only)
- Seat angle adjustment (on knee-tilt models only)
- Back tension control

Adjustment Features

Manual-height adjustment is standard on swivel-tilt base models. Rotating the unoccupied chair raises or lowers the seat. Occupant's weight disengages the adjustment mechanism, so height won't change while chair is in use.

Pneumatic-height adjustment, available on swivel-tilt base models, allows seat height adjustment from 16"H to 20½"H with fingertip pneumatic lever. To lower, hold handle up while seated. To raise, hold handle up and lift your weight off the chair.

Knee-tilt (low front rise) minimizes the rise of the front of the seat when the chair is in a reclined position, allowing the user's feet to remain on the floor. This feature reduces pressure under the thighs, allowing for continuous blood circulation.

Tip: Pneumatic-height adjustment is standard on knee-tilt models.

Seat angle control adjusts by shifting your weight to the back of the chair and flipping switch upward to engage. Disengage by shifting weight to the back of the chair and flipping switch downward.

Back tension varies reclining back support from light to firm and adjusts by turning knob. Turn knob clockwise to decrease tension, counterclockwise to increase.

Tip: Be sure to unlock (release) the variable back stop before adjusting the back tension.

Upright back lock. To lock back upright, push lever down while sitting upright. To release back lock, pull lever up while sitting upright.

Overall width	22 1/2"
Overall height	33 1/2"
Seat depth	16 1/4"
Seat width	16"
Back width	15 1/2"
Back height	17"
Width between arms	16 1/2"
Seat to floor height	18 3/8"
Arm height from floor	25"

Surface Materials

Upholstery

- Fabric
- Fabric with soil-retardant treatment (option)
- Leather

Frame

- European Beech
- Tip: Wood finishes applied to beech will match the color of stains applied to oak, walnut, or cherry but will not have the same natural grain.*

Glides

- Stainless steel only

Wood touch-up kits

- Available in specific finishes for field repairs
- ▶ Page 144

All Steelcase seating with standard upholstery fabrics complies with requirements of the BIFMA First Generation Voluntary Upholstered Furniture Flammability Standard, as well as the State of California Technical Bulletins 116 and 117. All standard seating is labeled to be in compliance with California TB116/117.

Programs & Services

▶ See the *Surface Materials Reference Manual* for further detail about programs and services offered for seating.

The Customer's Own Material (COM) Program

offers the opportunity for customers to select fabrics that are not offered through the standard Steelcase surface materials program for use on Steelcase products. Through the COM program, Steelcase will test your materials for application on Steelcase products. Once approved, you can place your order. Steelcase will facilitate the entire ordering process and give you a production schedule. Steelcase will order the COM fabric directly from the textile manufacturer. For up-to-date information regarding fabric test results for all COM fabrics and details regarding yardage requirements for most Seating lines, visit the COM Web site. To locate the COM Web site:

- Visit www.steelcase.com
- Click on "Design Tools"
- Select "Custom Surface Materials"
- Select "Customer's Own Material (COM)"

Soil retardants are treatments that provide long-term soil and stain resistance to a fabric without affecting the shade or the integrity of the fabric. The following Steelcase Textiles and Designtex Graded-In fabrics are available pre-treated with soil retardant. (You do not need to select the soil-retardant option for these fabrics and incur the upcharge.)

- Brunswick
- Jacks
- Link
- Rough & Ready
- Roulette
- Sam
- Senecal
- Skittles
- Spider

The following Designtex Graded-In fabrics are pre-treated with Crypton, Nanotex, or Teflon. (You do not need to select the soil retardant option for these fabrics and will not incur the \$20 upcharge).

- Acacia
- Appleseed
- Epiphany
- Halos
- Kabuki
- Kaleidoscope
- Klange
- Point
- Pueblo
- Singing in the Rain
- Terrain
- Tumbleweed

Soil-retardant treatment is available on all other seating fabrics at an additional upcharge per seating unit.

To order this option, please select "Soil-Retardant Treatment" under "Optional Accessories."

For soil-retardant treatment on COMs, please select "Soil-Retardant Treatment" under "Optional Accessories." Minimums or additional yardage may be required. Please contact the vendor directly for specific information.

Extended lead times may be necessary for this service.

Contact your Steelcase Solutions Fulfillment Team Representative at 1.888.STEELCASE (1.888.783.3522).

Fire Codes

▶ See pages 135–139 for upholstery fabrics available for use with FCS modification.

Steelcase offers Fire Code Seating modification (FCS) on nearly all seating models. The most rigorous fire codes in the nation have been developed in California, and the Steelcase FCS modification is designed to meet those codes. Fire Code Seating (FCS) indicates that a product is constructed to meet the strict fire code requirements of high public occupancy areas such as theaters, meeting rooms, and lobbies. The FCS standards will meet both the State of California Home Furnishing Technical Bulletin 133 (Cal TB 133) and Boston Fire Code (BFC). Boston adopted the California Home Furnishing Technical Bulletin TB 133 test standard in 1992.

Local codes may have special requirements for upholstery.

Collaboration

Collaboration guest chairs, designed by Dennie Pimental and John Duffy, have a classic design that is ideal for conference room, reception area, and dining room seating, or as guest seating in a workstation. Several arm inserts are available to create different visual details.

Inserts can match or contrast with frame color.

Back and seat are fully upholstered.

Upholstered seat features a webbed panel construction.

Arms may be enclosed with upholstery or maple inserts, or left open.

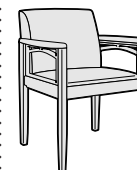

Frame is solid maple.

Glides are 1/2" diameter.

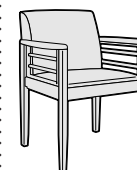

Product Details

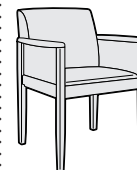

Open-arm chair is the simplest variation in the Collaboration family.

Arcade chair inserts introduce an arched motif.

Ladder chair inserts establish a strong horizontal direction.

Upholstered inserts enclose the arms with fabric-covered panels.

All inserts are factory-installed.

All chairs are available with plain hardwood arms.

Escapade

Escapade contemporary guest chairs are available with upholstered or wood slat backs.

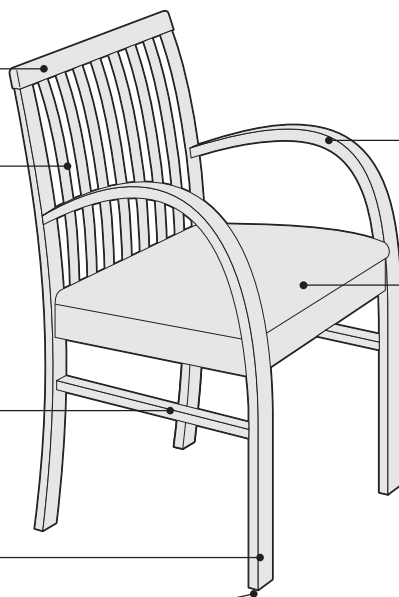

Frame is European beech wood.

Back is fully upholstered front and back or with vertical wood slats.

Stretcher rails provide additional support.

Legs are solid wood.

Glides are 1/2" in diameter.

Arms have an open arch that flows into the front legs. Finger joint is used in construction.

Upholstered seat features a webbed panel construction.

Product Details

Two models are available—upholstered back or vertical-slat wood back.

Actual Dimensions

Overall depth	22"
Overall width	23 1/2"
Overall height	35"
Seat depth	17 1/2"
Seat width	21 1/2"
Back width	20 1/4"
Back height	16 3/4"
Width between arms	19"
Seat to floor height	18 1/4"
Arm height from floor	28 1/2"

Surface Materials

Upholstery

- Fabric
- Fabric with soil-retardant treatment (option)
- Leather

Frame

- European Beech
- Tip: Wood finishes applied to beech will match the color of stains applied to oak, walnut, or cherry but will not have the same natural grain.*

Glides

- Stainless steel only

Wood touch-up kits

- Available in specific finishes for field repairs

All Steelcase seating with standard upholstery fabrics

complies with requirements of the BIFMA First Generation Voluntary Upholstered Furniture Flammability Standard, as well as the State of California Technical Bulletins 116 and 117. All standard seating is labeled to be in compliance with California TB116/117.

Programs & Services

▶ See the *Surface Materials Reference Manual* for further detail about programs and services offered for seating.

The Customer's Own Material (COM) Program

offers the opportunity for customers to select fabrics that are not offered through the standard Steelcase surface materials program for use on Steelcase products. Through the COM program, Steelcase will test your materials for application on Steelcase products. Once approved, you can place your order. Steelcase will facilitate the entire ordering process and give you a production schedule. Steelcase will order the COM fabric directly from the textile manufacturer. For up-to-date information regarding fabric test results for all COM fabrics and details regarding yardage requirements for most Seating lines, visit the COM Web site. To locate the COM Web site:

- Visit www.steelcase.com
- Click on "Design Tools"
- Select "Custom Surface Materials"
- Select "Customer's Own Material (COM)"

Soil retardants are treatments that provide long-term soil and stain resistance to a fabric without affecting the shade or the integrity of the fabric. The following Steelcase Textiles and Designtex Graded-In fabrics are available pre-treated with soil retardant. (You do not need to select the soil-retardant option for these fabrics and incur the upcharge.)

- Brunswick
- Jacks
- Link
- Rough & Ready
- Roulette
- Sam
- Senecal
- Skittles
- Spyder

The following Designtex Graded-In fabrics are pre-treated with Crypton, Nanotex, or Teflon. (You do not need to select the soil retardant option for these fabrics and will not incur the \$20 upcharge).

- Acacia
- Appleseed
- Epiphany
- Halos
- Kabuki
- Kaleidoscope
- Klange
- Point
- Pueblo
- Singing in the Rain
- Terrain
- Tumbleweed

Soil-retardant treatment is available on all other seating fabrics at an additional upcharge per seating unit. To order this option, please select "Soil-Retardant Treatment" under "Optional Accessories."

For soil-retardant treatment on COMs, please select "Soil-Retardant Treatment" under "Optional Accessories." Minimums or additional yardage may be required. Please contact the vendor directly for specific information.

Extended lead times may be necessary for this service.

Contact your Steelcase Solutions Fulfillment Team Representative at 1.888.STEELCASE (1.888.783.3522).

Fire Codes

▶ See pages 135–139 for upholstery fabrics available for use with FCS modification.

Steelcase offers Fire Code Seating modification (FCS) on nearly all seating models. The most rigorous fire codes in the nation have been developed in California, and the Steelcase FCS modification is designed to meet those codes. Fire Code Seating (FCS) indicates that a product is constructed to meet the strict fire code requirements of high public occupancy areas such as theaters, meeting rooms, and lobbies. The FCS standards will meet both the State of California Home Furnishing Technical Bulletin 133 (Cal TB 133) and Boston Fire Code (BFC). Boston adopted the California Home Furnishing Technical Bulletin TB 133 test standard in 1992.

Local codes may have special requirements for upholstery.

Mingle

Mingle guest chairs, designed by Bill Schacht and Lynda Chesser, have a tailored appearance that is sophisticated and pure in design, yet simple in scale. Mingle's design addresses a broad set of applications from an open plan systems environment to a closed office setting.

Exposed maple plywood back panel provides enhanced lumbar support to achieve a high level of comfort.

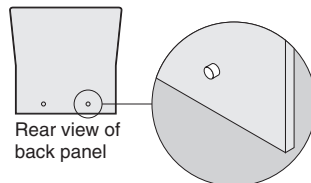

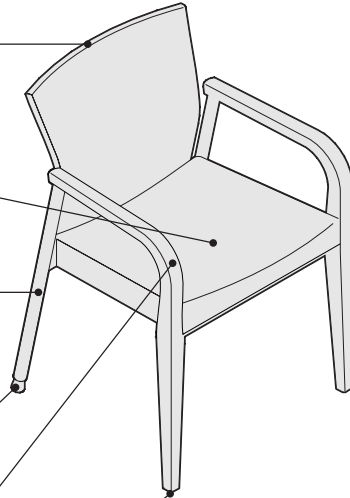

Upholstered seat features a webbed-panel construction.

Back legs and seat frame are metal for additional strength and durability. Legs are standard in black. Nickel powdercoat is available as an option.

Foot cap is standard with nickel finish.

Arms taper to flow into front legs.

Glides are 1/2" diameter on front legs and 1" diameter on back legs.

Metal button fasteners located at bottom of back panel secure seat and back attachment while providing an additional element of design.

Actual Dimensions

Overall depth	22 1/8"
Overall width	22 1/4"
Overall height	32"

Oriana

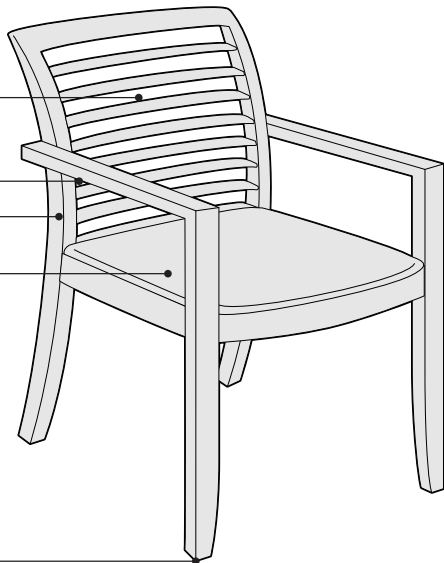

Oriana, designed by David Jenkins, is an interpretation of early ladder-back and slat-back seating designs. Its classic styling is suitable for both transitional and contemporary interiors.

Back is available in three design variations.

Arms are open.

Frame is maple.

Upholstered seat features a webbed panel construction.

Glides are 1/2" diameter.

Product Details

Back is available with horizontal slats, vertical slats, or closed upholstered construction.

Surface Materials

Upholstery

- Fabric
- Fabric with soil-retardant treatment (option)
- Leather

Frame

- Maple
- Tip: Wood finishes applied to maple will match the color of stains applied to oak, walnut, or cherry but will not show the same natural grain.*
- Customiz stain (option)

Glides

- Stainless steel only

Wood touch-up kits

All Steelcase seating with standard upholstery fabrics complies with requirements of the BIFMA First Generation Voluntary Upholstered Furniture Standard, as well as State of California Technical Bulletins 116 and 117. All standard seating is labeled to be in compliance with California TB116/117.

Programs & Services

▶ See the *Surface Materials Reference Manual* for further detail about programs and services offered for seating.

The Customer's Own Material (COM) Program

offers the opportunity for customers to select fabrics that are not offered through the standard Steelcase surface materials program for use on Steelcase products. Through the COM program, Steelcase will test your materials for application on Steelcase products. Once approved, you can place your order. Steelcase will facilitate the entire ordering process and give you a production schedule. Steelcase will order the COM fabric directly from the textile manufacturer. For up-to-date information regarding fabric test results for all COM fabrics and details regarding yardage requirements for most Seating lines, visit the COM Web site. To locate the COM Web site:

- Visit www.steelcase.com
- Click on "Design Tools"
- Select "Custom Surface Materials"
- Select "Customer's Own Material (COM)"

Soil retardants are treatments that provide long-term soil and stain resistance to a fabric without affecting the shade or the integrity of the fabric. The following Steelcase Textiles and Designtex Graded-In fabrics are available pre-treated with soil retardant. (You do not need to select the soil-retardant option for these fabrics and incur the upcharge.)

- Brunswick
- Jacks
- Link
- Rough & Ready
- Roulette
- Sam
- Senecal
- Skittles
- Spyder

The following Designtex Graded-In fabrics are pre-treated with Crypton, Nanotex, or Teflon. (You do not need to select the soil-retardant option for these fabrics and will not incur the \$20 upcharge).

- Acacia
- Appleseed
- Epiphany
- Halos
- Kabuki
- Kaleidoscope
- Klange
- Point
- Pueblo
- Singing in the Rain
- Terrain
- Tumbleweed

Soil-retardant treatment is available on all other seating fabrics at an additional upcharge per seating unit. To order this option, please select "Soil-Retardant Treatment" under "Optional Accessories."

For soil-retardant treatment on COMs, please select "Soil-Retardant Treatment" under "Optional Accessories." Minimums or additional yardage may be required. Please contact the vendor directly for specific information.

Extended lead times may be necessary for this service.

Contact your Steelcase Solutions Fulfillment Team Representative at 1.888.STEELCASE (1.888.783.3522).

Width between arms	19"
Seat to floor height	18 ³ / ₄ "
Arm height from floor	25 ³ / ₈ "

Fire Codes

▶ See pages 135–139 for upholstery fabrics available for use with FCS modification.

Steelcase offers Fire Code Seating modification (FCS) on nearly all seating models. The most rigorous fire codes in the nation have been developed in California, and the Steelcase FCS modification is designed to meet those codes. Fire Code Seating (FCS) indicates that a product is constructed to meet the strict fire code requirements of high public occupancy areas such as theaters, meeting rooms, and lobbies. The FCS standards will meet both the State of California Home Furnishing Technical Bulletin 133 (Cal TB 133) and Boston Fire Code (BFC). Boston adopted the California Home Furnishing Technical Bulletin TB 133 test standard in 1992.

Local codes may have special requirements for upholstery.

Terrazzo

Terrazzo guest chairs, designed by Brian Kane, have a classic and simple styling appropriate for a broad range of applications. A family of factory-installed back designs are available to create a variety of visual statements.

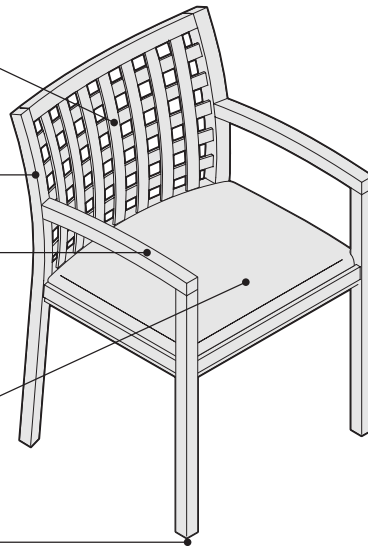

Lattice inserts are available in three designs. Slats are bowed to provide enhanced lumbar support.

Frame is European Beech.

Arms are arched to correspond with the curvature of the chair's back and are gently raised at the front to assist in entering and rising from the chair.

Seat is fully upholstered and features a webbed-panel construction.

Glides are 1/2" diameter.

Square lattice back chair

Macintosh lattice back chair

Horizontal lattice back chair

Actual Dimensions

Overall depth	21 3/4"
Overall width	21 1/4"
Overall height	32 1/4"
Seat depth	17 7/8"
Seat width	20"
Back width	21 1/4"
Back height	14"
Width between arms	18 3/4"
Seat to floor height	18 1/4"
Arm height from floor	25 1/4"

Product Details

Square lattice back creates a strong grid-like pattern.

Macintosh lattice back introduces a distinctive vertical space.

Horizontal lattice back divides the space with horizontal elements.

Topaz

Topaz offers two chair styles to complement traditional and transitional office environments.

Frame is European Beech.

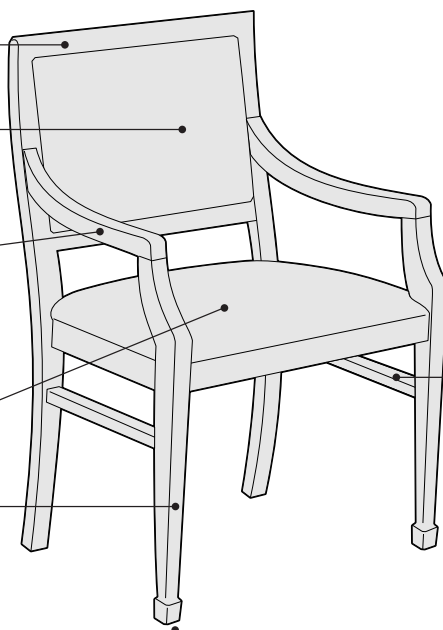

Back is upholstered and framed in wood. It is available either open or closed.

Arms are open. They are available with either a rectilinear or curvilinear design. Finger joint is used in construction.

Upholstered seat features a webbed panel construction.

Legs are solid wood. Front legs on open back model are carved for traditional detail.

Glides are 1/2" in diameter.

Stretcher rails on open back model provide added support.

Product Details

Two models are available—open back or closed back.

Open-back models have rectilinear arms, carved detail on the front legs, and stretcher rails.

Closed-back models have curvilinear arms that flow into the front legs.

All Steelcase seating with standard upholstery fabrics complies with requirements of the BIFMA First Generation Voluntary Upholstered Furniture Flammability Standard, as well as the State of California Technical Bulletins 116 and 117. All standard seating is labeled to be in compliance with California TB116/117.

Programs & Services

► See the *Surface Materials Reference Manual* for further detail about programs and services offered for seating.

The Customer's Own Material (COM) Program

offers the opportunity for customers to select fabrics that are not offered through the standard Steelcase surface materials program for use on Steelcase products. Through the COM program, Steelcase will test your materials for application on Steelcase products. Once approved, you can place your order. Steelcase will facilitate the entire ordering process and give you a production schedule. Steelcase will order the COM fabric directly from the textile manufacturer. For up-to-date information regarding fabric test results for all COM fabrics and details regarding yardage requirements for most Seating lines, visit the COM Web site. To locate the COM Web site:

- Visit www.steelcase.com
- Click on "Design Tools"
- Select "Custom Surface Materials"
- Select "Customer's Own Material (COM)"

Soil retardants are treatments that provide long-term soil and stain resistance to a fabric without affecting the shade or the integrity of the fabric. The following Steelcase Textiles and Designtex Graded-In fabrics are available pre-treated with soil retardant. (You do not need to select the soil-retardant option for these fabrics and incur the upcharge.)

- Brunswick
- Jacks
- Link
- Rough & Ready
- Roulette
- Sam
- Senecal
- Skittles
- Spyder

The following Designtex Graded-In fabrics are pre-treated with Crypton, Nanotex, or Teflon. (You do not need to select the soil retardant option for these fabrics and will not incur the \$20 upcharge).

- Acacia
- Appleseed
- Epiphany
- Halos
- Kabuki
- Kaleidoscope
- Klange
- Point
- Pueblo
- Singing in the Rain
- Terrain
- Tumbleweed

Soil-retardant treatment is available on all other seating fabrics at an additional upcharge per seating unit. To order this option, please select "Soil-Retardant Treatment" under "Optional Accessories."

For soil-retardant treatment on COMs, please select "Soil-Retardant Treatment" under "Optional Accessories." Minimums or additional yardage may be required. Please contact the vendor directly for specific information.

Extended lead times may be necessary for this service.

Contact your Steelcase Solutions Fulfillment Team Representative at 1.888.STEELCASE (1.888.783.3522).

Fire Codes

► See pages 135–139 for upholstery fabrics available for use with FCS modification.

Steelcase offers Fire Code Seating modification (FCS) on nearly all seating models. The most rigorous fire codes in the nation have been developed in California, and the Steelcase FCS modification is designed to meet those codes. Fire Code Seating (FCS) indicates that a product is constructed to meet the strict fire code requirements of high public occupancy areas such as theaters, meeting rooms, and lobbies. The FCS standards will meet both the State of California Home Furnishing Technical Bulletin 133 (Cal TB 133) and Boston Fire Code (BFC). Boston adopted the California Home Furnishing Technical Bulletin TB 133 test standard in 1992.

Local codes may have special requirements for upholstery.

Deck

Deck, stackable wood guest chairs designed by Brian Kane, combine function with a tailored aesthetic that is bound to become a modern classic.

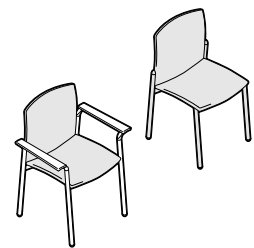

Back and seat are available fully upholstered, with wood back and upholstered seat or with wood back and wood seat.

Arms are available as wood or black expanded urethane.

Legs are standard in black textured paint and available as an option in sterling paint.

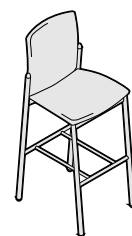

Glides are 1/2" diameter.

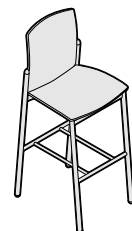

Wood back and upholstered seat

Deck stackable chairs with and without arms are available in three styles—fully upholstered back and seat, wood back and seat, and wood back with upholstered seat.

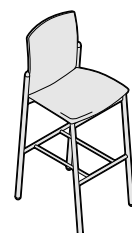

Chairs stack five high.

Fully upholstered back and seat

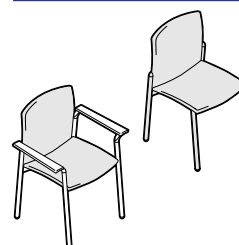

Wood back and seat

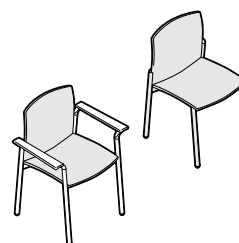

Wood back and upholstered seat

Stools are available fully upholstered, with wood back and seat, or with wood back and upholstered seat.

Soil-retardant treatment is available on all other seating fabrics at an additional upcharge per seating unit. To order this option, please select "Soil-Retardant Treatment" under "Optional Accessories."

For soil-retardant treatment on COMs, please select "Soil-Retardant Treatment" under "Optional Accessories." Minimums or additional yardage may be required. Please contact the vendor directly for specific information.

Extended lead times may be necessary for this service.

Contact your Steelcase Solutions Fulfillment Team Representative at 1.888.STEELCASE (1.888.783.3522).

Fire Codes

► See pages 135–139 for upholstery fabrics available for use with FCS modification.

Steelcase offers Fire Code Seating modification (FCS) on nearly all seating models. The most rigorous fire codes in the nation have been developed in California, and the Steelcase FCS modification is designed to meet those codes. Fire Code Seating (FCS) indicates that a product is constructed to meet the strict fire code requirements of high public occupancy areas such as theaters, meeting rooms, and lobbies. The FCS standards will meet both the State of California Home Furnishing Technical Bulletin 133 (Cal TB 133) and Boston Fire Code (BFC). Boston adopted the California Home Furnishing Technical Bulletin TB 133 test standard in 1992.

Local codes may have special requirements for upholstery.

Étude

Étude lounge seating includes a club chair, love seat, and sofa in transitional styling. The wood base and curved legs compliment both transitional and contemporary environments.

Simple, curved transitional styling.

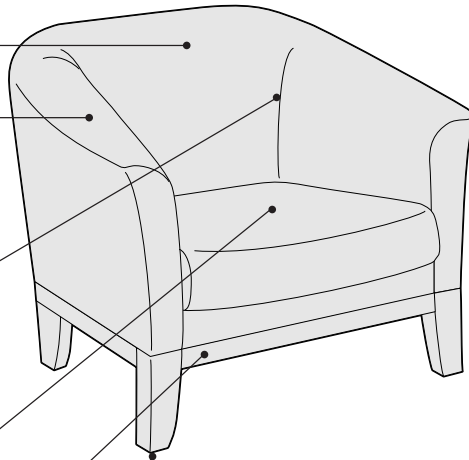

Arms follow a graceful curve.

Casual folds and gathers in back are designed to create a hand-crafted look.

Generous, comfortable proportions.

Base is maple.

Glides are 1/2" diameter.

Surface Materials

Upholstery

- Fabric
- Fabric with soil-retardant treatment (option)
- Vinyl
- Leather

Tip: Minor comfort wrinkles are inherent in the design of the seat and cushions.

Base and legs

- Maple
- Tip: Wood finishes applied to maple will match the color of stains applied to oak, walnut, or cherry but will not show the same natural grain.*
- Customiz stain (option)

Glides

- Stainless steel only

Wood touch-up kits

- Available in specific finishes for field repairs
- ▶ Page 144

All Steelcase seating with standard upholstery fabrics complies with requirements of the BIFMA First Generation Voluntary Upholstered Furniture Standard, as well as State of California Technical Bulletins 116 and 117. All standard seating is labeled to be in compliance with California TB116/117.

Programs & Services

▶ See the *Surface Materials Reference Manual* for further detail about programs and services offered for seating.

The Customer's Own Material (COM) Program

offers the opportunity for customers to select fabrics that are not offered through the standard Steelcase surface materials program for use on Steelcase products. Through the COM program, Steelcase will test your materials for application on Steelcase products. Once approved, you can place your order. Steelcase will facilitate the entire ordering process and give you a production schedule. Steelcase will order the COM fabric directly from the textile manufacturer. For up-to-date information regarding fabric test results for all COM fabrics and details regarding yardage requirements for most Seating lines, visit the COM Web site. To locate the COM Web site:

- Visit www.steelcase.com
- Click on "Design Tools"
- Select "Custom Surface Materials"
- Select "Customer's Own Material (COM)"

Soil retardants are treatments that provide long-term soil and stain resistance to a fabric without affecting the shade or the integrity of the fabric. The following Steelcase Textiles and Designtex Graded-In fabrics are available pre-treated with soil retardant. (You do not need to select the soil-retardant option for these fabrics and incur the upcharge.)

- Brunswick
- Jacks
- Link
- Rough & Ready
- Roulette
- Sam
- Senecal
- Skittles
- Spyder

Groove

Groove modular lounge seating offers functional and aesthetic variety, access to power and data, and can reconfigure at a moment's notice.

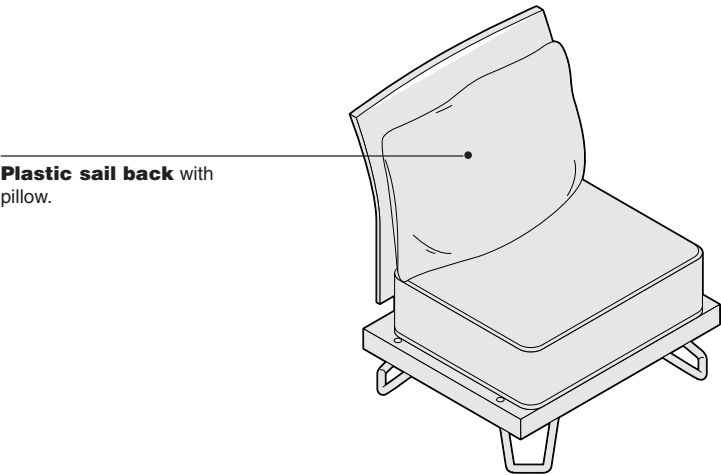

Seat cushion is fully upholstered.

Upholstered block back

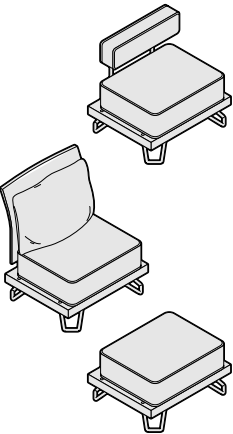

Wood base with or without grommets.

Legs are available in Polished Chrome only.

Plastic sail back with pillow.

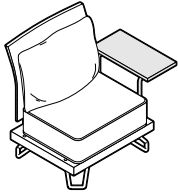

Product Details

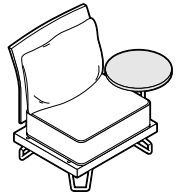

Groove lounge seating is available in two back styles—block back and sail back. Ottoman is also available. Chair and ottoman components are shipped separately and assembled in the field. Chairs can also be reconfigured in the field. For reconfigurations, order components through Service Parts.

Actual Dimensions

	Sail Back Chair	Block Back Chair	Ottoman
Overall depth	25¼"	25¼"	25¼"
Overall width	32¼"	32¼"	32¼"
Overall height	33¼"	28⅝"	15¾"
Seat depth	18"	18¼"	23"
Seat width	28¾"	28¾"	28¾"
Back width	30"	26"	N.A.
Back height from seat	17½"	12⅞"	N.A.
Seat to floor height	15¾"	15¾"	15¾"

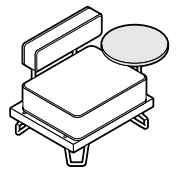

Sail back with tablet arm

Sail back with round arm

Block back with tablet arm

Block back with round arm

Round or tablet arm, ordered separately and field-installed, can be attached to left- or right-side of chairs.

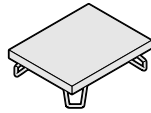

Table without grommets

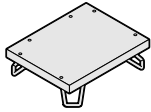

Table with grommets

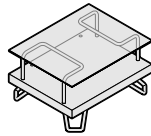

Table with acrylic top

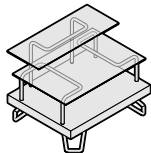

Table with acrylic top and shelf

Groove tables are available in a variety of configurations. Table components are shipped separately and assembled in the field. Tables can also be reconfigured in the field. For reconfigurations, order components through Service Parts.

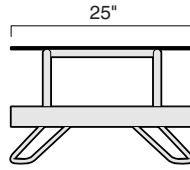

Table with acrylic top comes standard with larger acrylic piece.

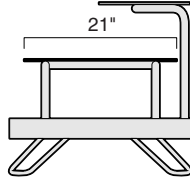

Table with acrylic top and shelf comes standard with smaller acrylic piece. Smaller acrylic top must be specified when ordering shelf kit. To create a buildup, you must order a smaller acrylic top with shelf kit.

Acrylic top sits on clear glides for tabletop applications. For shelf applications, acrylic is permanently affixed with clear screws.

Acrylic can be installed glossy side up or matte side up.

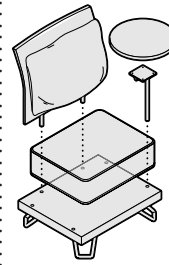

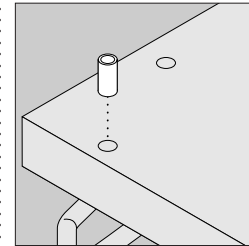

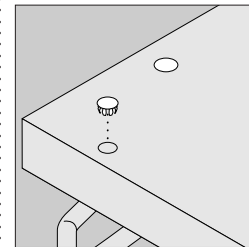

Table with grommets must be ordered to create buildups using table top, shelf, chair backs, and arm kits.

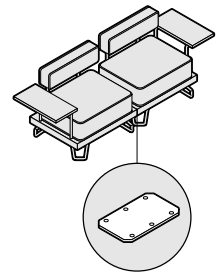

Tip: Grommets cannot be used to route cords or cables.

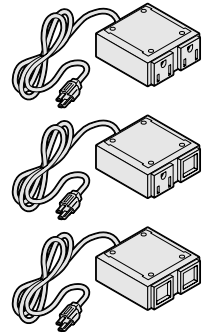

Grommet sleeves provide stability for components and must be in place to properly install components.

Caps, standard with table with grommets, are used to cover the grommet holes when not in use. Underside of table has storage place to hold caps when not in use.

Ganging bracket is available to link chairs in the field for permanent connection.

Power/data boxes are available to provide additional electrical outlets and voice and data receptacles where needed. Power/power, power/data, and data/data versions are available. Boxes are field-installed and can be mounted to the underside of base anywhere access to power and data is needed.

Programs & Services

- See the *Surface Materials Reference Manual* for further detail about programs and services offered for seating.

The Customer's Own Material (COM) Program

offers the opportunity for customers to select fabrics that are not offered through the standard Steelcase surface materials program for use on Steelcase products. Through the COM program, Steelcase will test your materials for application on Steelcase products. Once approved, you can place your order. Steelcase will facilitate the entire ordering process and give you a production schedule. Steelcase will order the COM fabric directly from the textile manufacturer. For up-to-date information regarding fabric test results for all COM fabrics and details regarding yardage requirements for most Seating lines, visit the COM Web site. To locate the COM Web site:

- Visit www.steelcase.com
- Click on "Design Tools"
- Select "Custom Surface Materials"
- Select "Customer's Own Material (COM)"

Soil retardants are treatments that provide long-term soil and stain resistance to a fabric without affecting the shade or the integrity of the fabric. Surface Materials

This listing includes all the surface material choices that are available for the products in this specification guide.

Resources

For more information about surface materials, refer to the following resources:

Additional surface materials specification tools are available to assist you in the specification process—the Surface Materials Binders.

Surface Materials

Binders include:

- Surface Materials Reference Manual
- A complete set of swatch cards for hard surfaces, vertical surface fabrics, and seating upholstery

Metal

4798 Sterling Metallic
7026 Nickel
7207 Black
8046 Polished Aluminum
9201 Polished Chrome

Paint

0835 Black
4799 Platinum Metallic
7207 Black

Wood

► See *Wood Color Availability Matrix* on page 140 for color availability by product line and wood species.

Tip: The wood used in the construction of chairs is either maple or European beech. Wood finishes applied to maple or beech will match the color of stains applied to oak, walnut, or cherry, but will not have the same natural grain.

Exception: Groove is a wood-veneered product.

Wood Seating color choices

3402 Clear Cherry (Aged)
3412 Natural Cherry
3422 Medium Cherry
3522 Clear Maple*
3572 Amber on Maple
3592 Blonde on Maple
3602 Desert Oak
3612 Warm Oak
3692 Espresso Oak
3702 Clear Walnut
3712 Natural Walnut
3722 Dark Mahogany on Walnut
3752 Medium Walnut
3762 Dark Walnut
3772 Medium Mahogany on Walnut

**Because no stain is used in the clear-coat process, a sign-off will be required prior to orders being accepted for this finish. The sign-off sheet is available through Steelcase advertising stock. Form number 05-0001370*

Customiz stain is a service that allows you to create your own stain color. Minimum order quantities, per unit up-charges, and a one-time customer processing fee apply.

► See the *Surface Materials Reference Manual* for more information.

Plastic

Available on:

- Snodgrass 474 Series chair frames
- 6205 Black
6250 Coffee
6256 Graphite

Upholstery

Tip: Some of the vinyl colors listed below were slated to be culled in October 1999; however, they will remain available to existing customers indefinitely. A project is in process to improve the Steelcase seating vinyl color offering.

Designtex Graded-In Program

All Designtex Graded-In fabrics are now supported just like standard fabrics when ordered on Steelcase furniture. The Designtex Graded-In Program also includes the Environmental Impact Collection which offers sustainable textiles in affordable price groups. For additional information and fabric samples, contact your local Designtex sales representative at 1.800.221.1540.

Designtex upholsteries are graded into Steelcase Price Groups 2 through 9:

Price Group COM/COL**(Customer's Own Material/Leather)****Fabric Approval and Yardage**

To confirm whether a particular COM material has already been tested for use on a specific Steelcase product or to determine actual yardage requirements:

- Visit www.steelcase.com
- Click on "Design Tools"
- Select "Custom Surface Materials"
- Select "Customer's Own Material (COM)"

For additional information regarding Customer's Own Material, call 1.888.STEELCASE.

Wood Seating Upholstery Matrix

Not every fabric is available on every chair. This matrix gives an overview of the upholstery fabrics that can be specified on each seating product line.

Fire Code Wood Seating Upholstery Matrix

Fire Code Wood Seating
Upholstery Matrix

Wood Seating Upholstery: Availability of Fire Code Treatment

Fire Code Seating (FCS) indicates that a product is constructed to meet the strict fire code requirements of high public occupancy areas.

The following matrix lists each seating line and denotes fabrics that are available, available with exceptions, and not available.

	Alcove	Alerion	Collaboration	Community Lounge	Company	Dearborn	Deck	England	Escapade	Étude	Gentry General-Use	Gentry Guest	Groove Lounge	Mansfield Executive	Mansfield Guest	Masque	Mingle	Oriana	Siento	Snodgrass	Terrazzo	Theorem	Topaz

Fire Code Seating (FCS) Exceptions for Wood Seating

The Fire Code Seating (FCS) modification is available on nearly all Wood seating. There are some chair and fabric combinations that will not pass the test criteria for Fire Code Seating. This is often due to the chair configuration, large surface areas that support combustion, and the fiber content of some fabrics. For your convenience, we have listed the chair line exception models and the fabric combinations that **are available**. If a fabric is not listed, it is not available with the FCS option on the exception chair models.

England

England enclosed-arm model 0113 **is available** with FCS in the following fabrics only:

- Leather
- Seating Vinyl

Étude

Étude club chair 0811 **is available** with FCS modification in the following fabrics only:

- Leather
- Seating Vinyl

Gentry

Gentry enclosed-arm models 0644W, 0634W, 0644B, 0634B, and all variations of these models **are available** with FCS modification in the following fabrics only:

- Leather
- Seating Vinyl

Mansfield

Mansfield high-back model 140 and all variations of this model **are available** with FCS modification in the following fabrics only:

- Leather
- Seating Vinyl

Masque is not available with the FCS modification.

Snodgrass

Snodgrass enclosed-arm model 474427W and all variations of this model **are available** with FCS modification in the following fabrics only:

- Leather
- Seating Vinyl

The Fire Code Seating option is available on certain chairs with COM. Fire code approval is based on chair model and specific textile combinations.

To find out if a specific COM is FCS approved on a Steelcase seating product, check the COM Web site at www.Steelcase.com:

- Click on “Design Tools”
- Select “Custom Surface Materials”
- Select “Customer’s Own Material (COM)”
- Select “Search test results”

Due to the many different combinations of fabric contents and changes that could be made by Steelcase to seating models, fabrics that have been previously approved for fire code may need to be re-tested for qualification.

For complete information about specifying COM on FCS modified chairs, call your Steelcase COM consultant at 616.475.2426 or fax inquiries to: 616.698.4700. Please provide the following information about your COM when making an inquiry:

- Supplier and fabric name
- Flammability testing
- Topical treatments
- Fabric weight
- Fiber content of the fabric
- Seating model number intended for application

The price for the FCS modification with COM is \$60 U.S. on all non-wood seating units and \$60 U.S. on all wood seating units. Please add the price to Price Group COM column within each Steelcase price list.

FCS Testing

Please submit a COM Application Testing Request form for FCS evaluation prior to sending any fabric. A COM consultant will contact you with more information.

Yardage requirements will vary per chair test. If your material requires FCS testing, submit a completed COM application Testing Request form and material to: Steelcase Inc.

Attn: COM Testing
6100 East Paris Avenue
Caledonia, MI 49316

\$700 net testing fee is required for a full scale chair burn test. FCS testing lead time is 3-4 weeks.

Flame Retardance of COM Fabrics

Steelcase assumes no liability for COM fabrics with a flame-retardant finish and recommends that samples of the fabrics in question be submitted to the proper authority for certification.

If a flame-retardant finish is required, please advise your Steelcase Sales Services representative or regional office of the following information:

- Flammability code that must be passed
- Application of the fabric to be finished (i.e., upholstery, wall, panel, etc.)
- Weight of the fabric
- Need to apply other chemicals to the fabric (i.e., soil repellents)
- Type of backing
- Yardage requirements

With this information, Steelcase can contact the appropriate outside finisher and generate a quote. Treatment prices vary with quantity and fabric selection.

Wood Color Availability Matrix

Not every wood color is available on every seating component. This matrix gives an overview of which wood colors can be specified for each seating component.

			3402 Clear Cherry (Aged)	3412 Natural Cherry	3422 Medium Cherry	3522 Clear Maple**	3572 Amber on Maple	3592 Blonde on Maple	3602 Desert Oak	3612 Warm Oak	3692 Espresso Oak	3702 Clear Walnut	3712 Natural Walnut	3722 Dark Mahogany on Walnut	3752 Medium Walnut	3762 Dark Walnut	3772 Medium Mahogany on Walnut

Tip: The wood used in the construction of chairs is either maple or European beech. Wood finishes applied to maple or beech will match the color of stains applied to oak, walnut, or cherry, but will not have the same natural grain.

**Groove and Deck tables are wood-veneered product lines.*

***Because no stain is used in the clear-coat process, a sign-off will be required prior to orders being accepted for this finish. The sign-off sheet is available through Steelcase advertising stock.
Form number 05-0001370*

Guidelines for Directional Fabrics

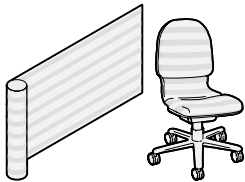

Guidelines for
Directional Fabrics

What is the issue?

Some textiles are plain and look the same regardless of which direction the fabric is applied to the product. But many customers prefer fabrics that have patterns that give a clear direction to the textile. Because there are limits to how directional fabrics can be applied to panels and chairs, it is important to understand directional fabrics to avoid being disappointed.

Talking about direction

Fabrics come on rolls. The long threads that run parallel to the length of the roll are called the warp. The perpendicular threads that run parallel to the width of the roll are called the filling.

Railroaded means the height dimension of the product is perpendicular to the warp of the fabric; *warp horizontal* and *across roll* are other terms for running the fabric in this direction. All Steelcase standard fabrics are railroaded. The yardage requirements for railroaded cutting are calculated using the width of the fabric, quantity ordered, style of chair(s), and pattern repeat.

Woven way means the height dimension of the product is parallel to the warp of the fabric; *warp vertical* and *down roll* are other terms for running the fabric in this direction. The yardage requirements for woven way cutting are calculated using the width of the fabric, quantity ordered, and style of chair(s).

What determines fabric direction?

The width of the roll of fabric and the techniques that are used to apply it to the product can both determine the direction. Standard default direction for seating products with Steelcase standard fabrics is railroaded. No exceptions are possible. COM fabrics are standard woven way. You may specify a COM fabric to be cut in a specific direction if the product allows it to be applied. The purchase order must clearly state the cutting direction if it is other than standard.

Tip: If you are changing the cutting direction of fabric, yardage requirements may increase, resulting in an additional upcharge. This upcharge will be applied to the purchase order.

► See *Yardage Requirements* in the *Surface Materials Reference Manual* for specific information.

If you have any questions regarding cutting direction guidelines, please call the Steelcase Solutions Resource Team at 1-888-STEELCASE or 1-888-783-3522. You can also find this information on our Web site:

- Visit www.steelcase.com
- Click on "Design Tools"
- Select "Custom Surface Materials"
- Select "Customer's Own Material (COM)"

COM pattern exceptions

Sometimes COM fabrics have patterns that look awkward or inappropriate if they are applied in the standard direction (woven way). Those cases are addressed with these two pattern exception rules.

Incorrect

Correct

Incorrect

Correct

1

Fabrics with stripes or flame stitch will be applied so that the patterns are vertical.

Incorrect

Correct

Incorrect

Correct

2

Fabrics with patterns of people, vines, or flower arrangements will be applied so that the pattern is vertical.
