Wood Tilt-Turn Window

(rev. 6.21.06)

Product Overview

Introduction

We are proud to add the flexible and stylish wood tilt-turn window to our product line. Popularized in Europe, the tilt-turn opens to the interior like a casement window when the handle is rotated 90 degrees, or tilts in slightly when the handle is rotated 180 degrees. The tilt position allows for gentle circulation during inclement weather, while the swing position allows for convenient cleaning and maximum airflow. Multiple lock points provide added stability and security, and

the durable hardware allows for oversized applications. Our wood tilt-turn window can be customized with screens, glazing options, and various hardware finishes.

Hardware Options

Wood tilt-turn window hardware is available in the following finishes:

- Polished Brass
- Matte Black
- Oil-Rubbed Brass
- White
- Brushed Chrome
- Satin Nickel
- Antique Brass
- Polished Chrome

Custom hardware and handles are available.

Glazing Options

Standard glazing for the wood tilt-turn window uses 5/8" overall insulated glass. Custom glazing and tinted glass are also available.

We offer two different edge details:

- Contemporary
- Traditional

See the General Info section for more details.

Wood Species

Our standard wood species are the following:

- Pine
- Vertical Grain Douglas Fir
- Mahogany

Alternative and exotic wood species are also available.

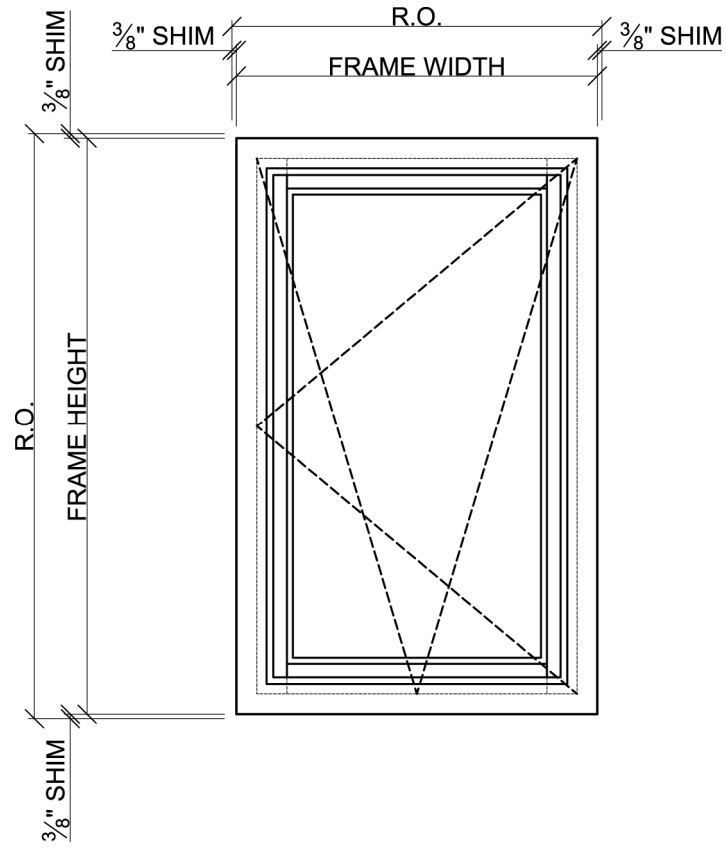

Other Options

The wood tilt-turn can also be made with custom grille patterns and brick or stucco exterior moulding. Contact Pacific Architectural Millwork for additional options and customization.
