Product Overview

Introduction

The wood fixed window is the foundation of our window line – at once elegant and distinctive, with a multitude of features that enable you to customize it however you choose. Fixed windows encompass both direct set windows, which have a jamb only and their glass glazed directly into the frame, and fixed casement windows, which have a sash and frame but cannot open like regular casements.

Configure your direct set or fixed casement window with numerous glazing options, grid patterns, and a variety of shapes and sizes. Every window we sell is crafted with the signature Pacific Architectural Millwork quality that adds long-lasting beauty and value to any environment.

Glazing Options

Standard glazing for the wood fixed window uses 5/8" overall insulated glass. Custom glazing and tinted glass are also available.

We offer two different edge profiles:

- Contemporary
- Traditional

(See General Info for more details.)

Wood Species

Our standard wood species are the following:

- Pine
- Vertical Grain Douglas Fir
- Mahogany

Alternative and exotic species of wood are also available.

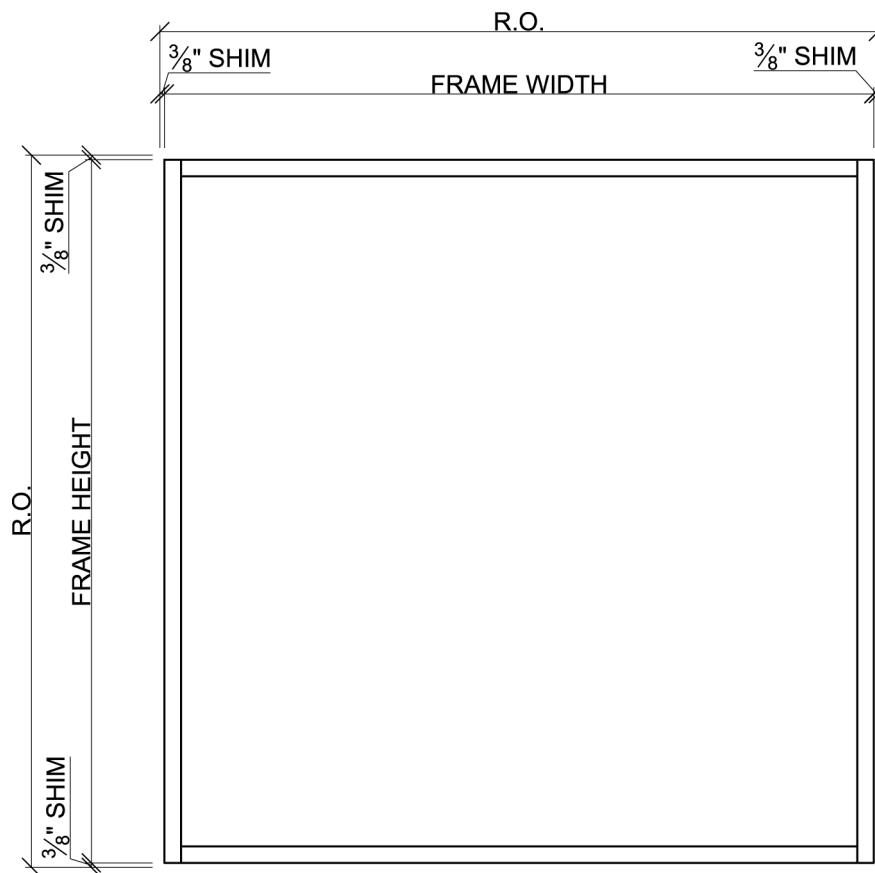

Other Options

The wood fixed window is also available with decorative true-divided or simulated-divided lites and optional brick or stucco exterior moulding. Contact Pacific Architectural Millwork for additional options and customization.
