

SERIES 2000

You'll look back on this as one of
your smarter decisions.

Timeless style. Dependable substance. Now you can balance both needs beautifully with Series 2000.

Smart. Inside & out.

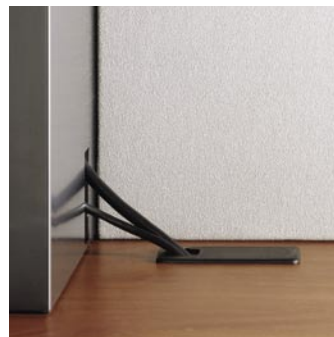

Durable, it will survive multiple moves.
Attractive, it will appeal to everyone.

If only all your decisions were this easy.

Robust.
Worksurfaces are a generous 1 1/4" thick and cores are heavily insulated. Metal-to-metal connections produce solid bonds to survive multiple moves.

Solid.
In modesty & end panels, two pieces of 22-gauge steel sandwich a structural foam core for strength, rigidity and sound absorption.

Clever.
Wire management systems throughout hutch walls and locking cabinets allow for ideal placement and integration of electronic devices.

Clean.
Hidden underneath the worksurfaces, cable management trays maintain the system's clean architectural lines.

Smooth.
Optional easy-down hutch closures prevent accidental slamming and bring an even higher level of sophistication to your workspace.

Safe. Series 2000 meets or exceeds all BIFMA standards and comes with a lifetime warranty on all components.

Long-term value.

The style is timeless. It has to be.
Series 2000 was built to last.

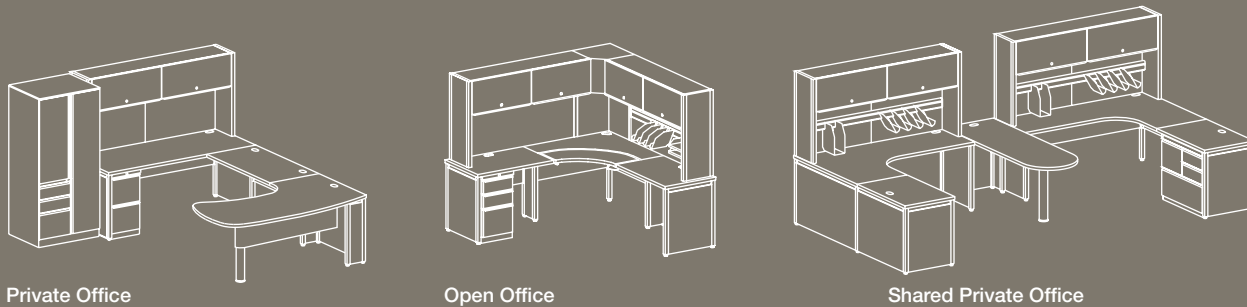

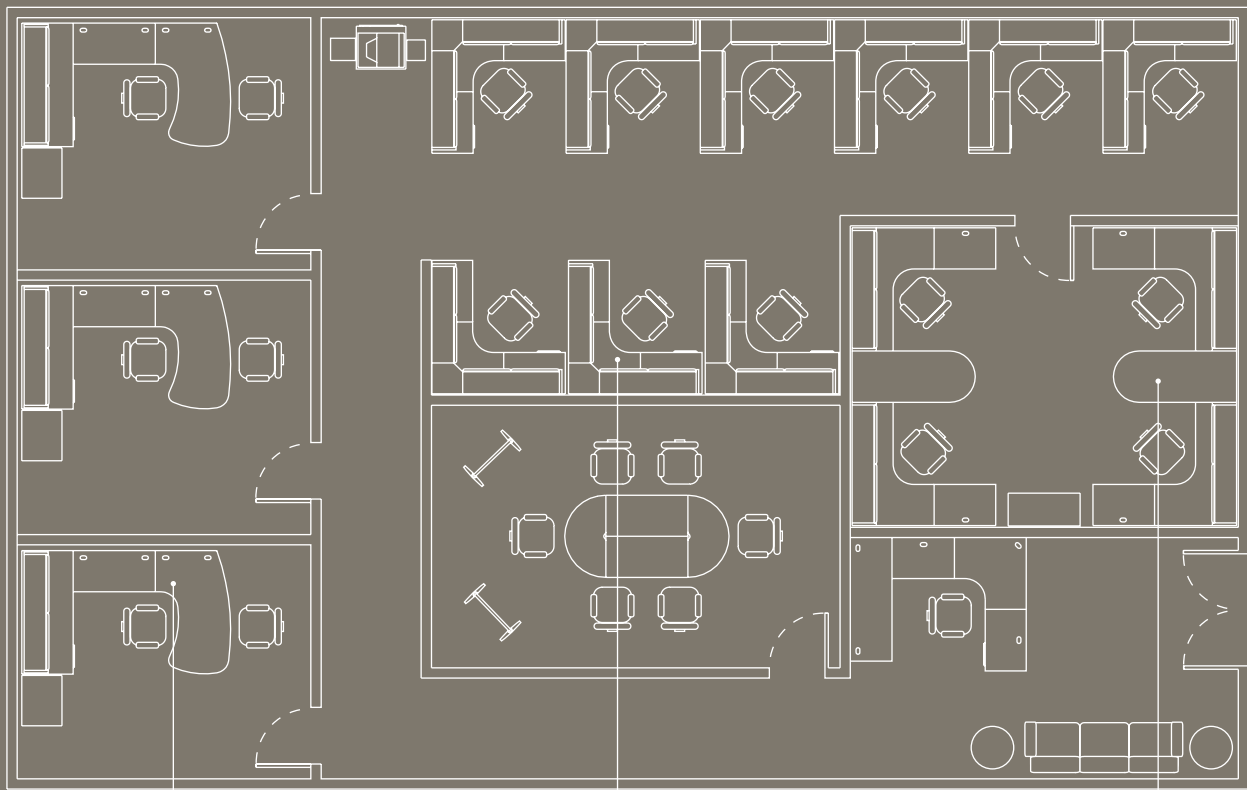

Low risk. High rewards.

Adaptable, enduring and always in style,
this is surely a wise investment.

MAXON

With a quarter-century of experience, Series 2000 was designed for versatility and engineered for reliability. Count on MAXON for rapid installation and seamless integration, on time, every time.
