WESTBORO

TIMELESS DESIGN

The Westboro collection is a transitional design equally at home in traditional or more contemporary settings. Three-ply radial cut veneer is painstakingly finished in your choice of a warm Honey Cherry or a rich Rouge Mahogany finish. These striking finishes are further enhanced by flaired top and base molding that adds architectural interest to the entire collection. Extra open pedestal in connecting corners of single pedestal desks and credenzas features one grommet in the inside panel for CPU storage applications. You can customize the look of your office through your choice of either the sleek wooden door overhead unit or the New TriCabinet hutch with etched glass doors, glass shelves and curio accent lights. The Tri-hutch also offers the option of an open or closed hutch back to suit your specific application. For a lighter touch you might consider the elegant table desk which offers classic lines with modern day convenience.
