

PRODUCT

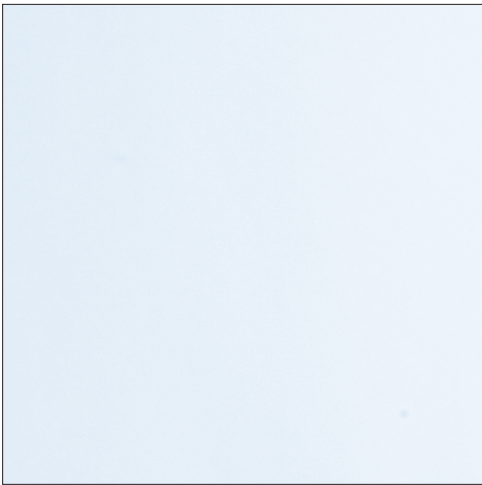

Low-Iron Satin Etched

GLASS TYPE

Decorative

DESCRIPTION

Satin Etched looks dramatically different when applied to low-iron glass. The one-sided, extra-smooth finish looks even more dramatic and striking on the low-iron glass compared to the same thickness in clear, satin-etched glass. This glass is often used for high-end shower door and interior applications. The finish is consistent throughout the sheet and does not easily pick up fingerprints, cutting oils or cerium oxide.
