

Anti-Graffiti Powder Coatings

x-graf™

ANTI-GRAFFITI Powder Coatings

A 3D perspective illustration of a white brick wall. The wall is covered in thick, black, stylized graffiti that reads 'GRAFFITI' in a jagged, blocky font. The graffiti is applied to the front face of the bricks, and the letters are slightly raised, casting soft shadows on the bricks behind them. The wall recedes into the distance, creating a sense of depth.

TAKE IT ALL OFF!

PROTECH

OXYPLAST

Graffiti is a constant problem in our society today. Besides being unsightly, graffiti is harmful to our infrastructure and costly to remove. **X-Graf™**, Protech's line of anti-graffiti powder coatings, now makes it easy to clean away the eyesore that is graffiti. These powders are formulated to allow the easy removal of graffiti using readily available solvents. They are extremely durable, corrosion and stain resistant and demonstrate excellent weatherability. **X-Graf™** powders come in a wide range of colors and textures and are the ideal application for mailboxes, highway signs, lockers or any other potential target of the graffiti vandal.

ADVANTAGES
