Hybrid™

'think. design. create'...

The philosophy of fluidconcepts™ is to provide unique, design-driven, contemporary furnishings for the workplace. Thoughtful experience and leading-edge manufacturing techniques combine to form the springboard for our innovative product designs and comprehensive service. fluidconcepts' products offer creative solutions while still addressing today's real workplace issues, such as technology accommodation, installation simplicity, modular expansion and reconfiguration, and inventory management. Meeting and exceeding environmental standards is also core to our vision as exhibited in our material use, manufacturing processes, and engineering practices. Integral to our vision of providing world class service and support to end users, dealers and designers, fluidconcepts offers a uniquely high level of customization and design tailored to your specific needs. By striving to surpass client expectations from design, to installation, to post-occupancy evaluation, fluidconcepts consistently brings new meaning to "differentiated by design".

Hybrid™

fluidconcepts

Hybrid™ is a unique post and beam workplace solution which performs across a wide spectrum of office environments including high and low workstation clusters, call centers, private offices, full height walls and reception areas. The architectural building blocks are easily planned within 3 planes and multiple angles. They consist of vertical posts and horizontal beams which support worksurfaces, storage, space dividers, electrical and data/telecom services, and workstation accessories.

Planning Flexibility.

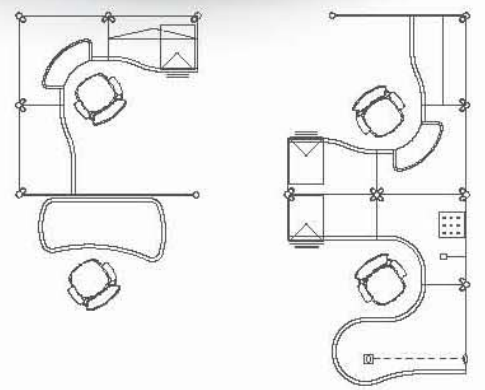

Posts are available in 4 or 8-channel configurations, and in round or oval profiles, which enables 90, 120 and 135 degree planning. Posts can be initially specified as continuous, segmented, or added later to stack onto existing posts. Post heights are available at 29", 36", 42", 49", 67", 84", from floor to ceiling, or in custom heights.

Height Adjustment.

Worksurfaces and storage are attached to the columns' continuous vertical channel which provides infinite height adjustment.

Power and Wire Management.

A wire channel or modesty panel connects every column enabling ample wire flow, cable management, and houses our harness-linked 8 wire/3 or 4 circuit power system, and 1-4 data/telecom access ports. Posts provide a conduit for power/data wire delivery from ceilings and floors.

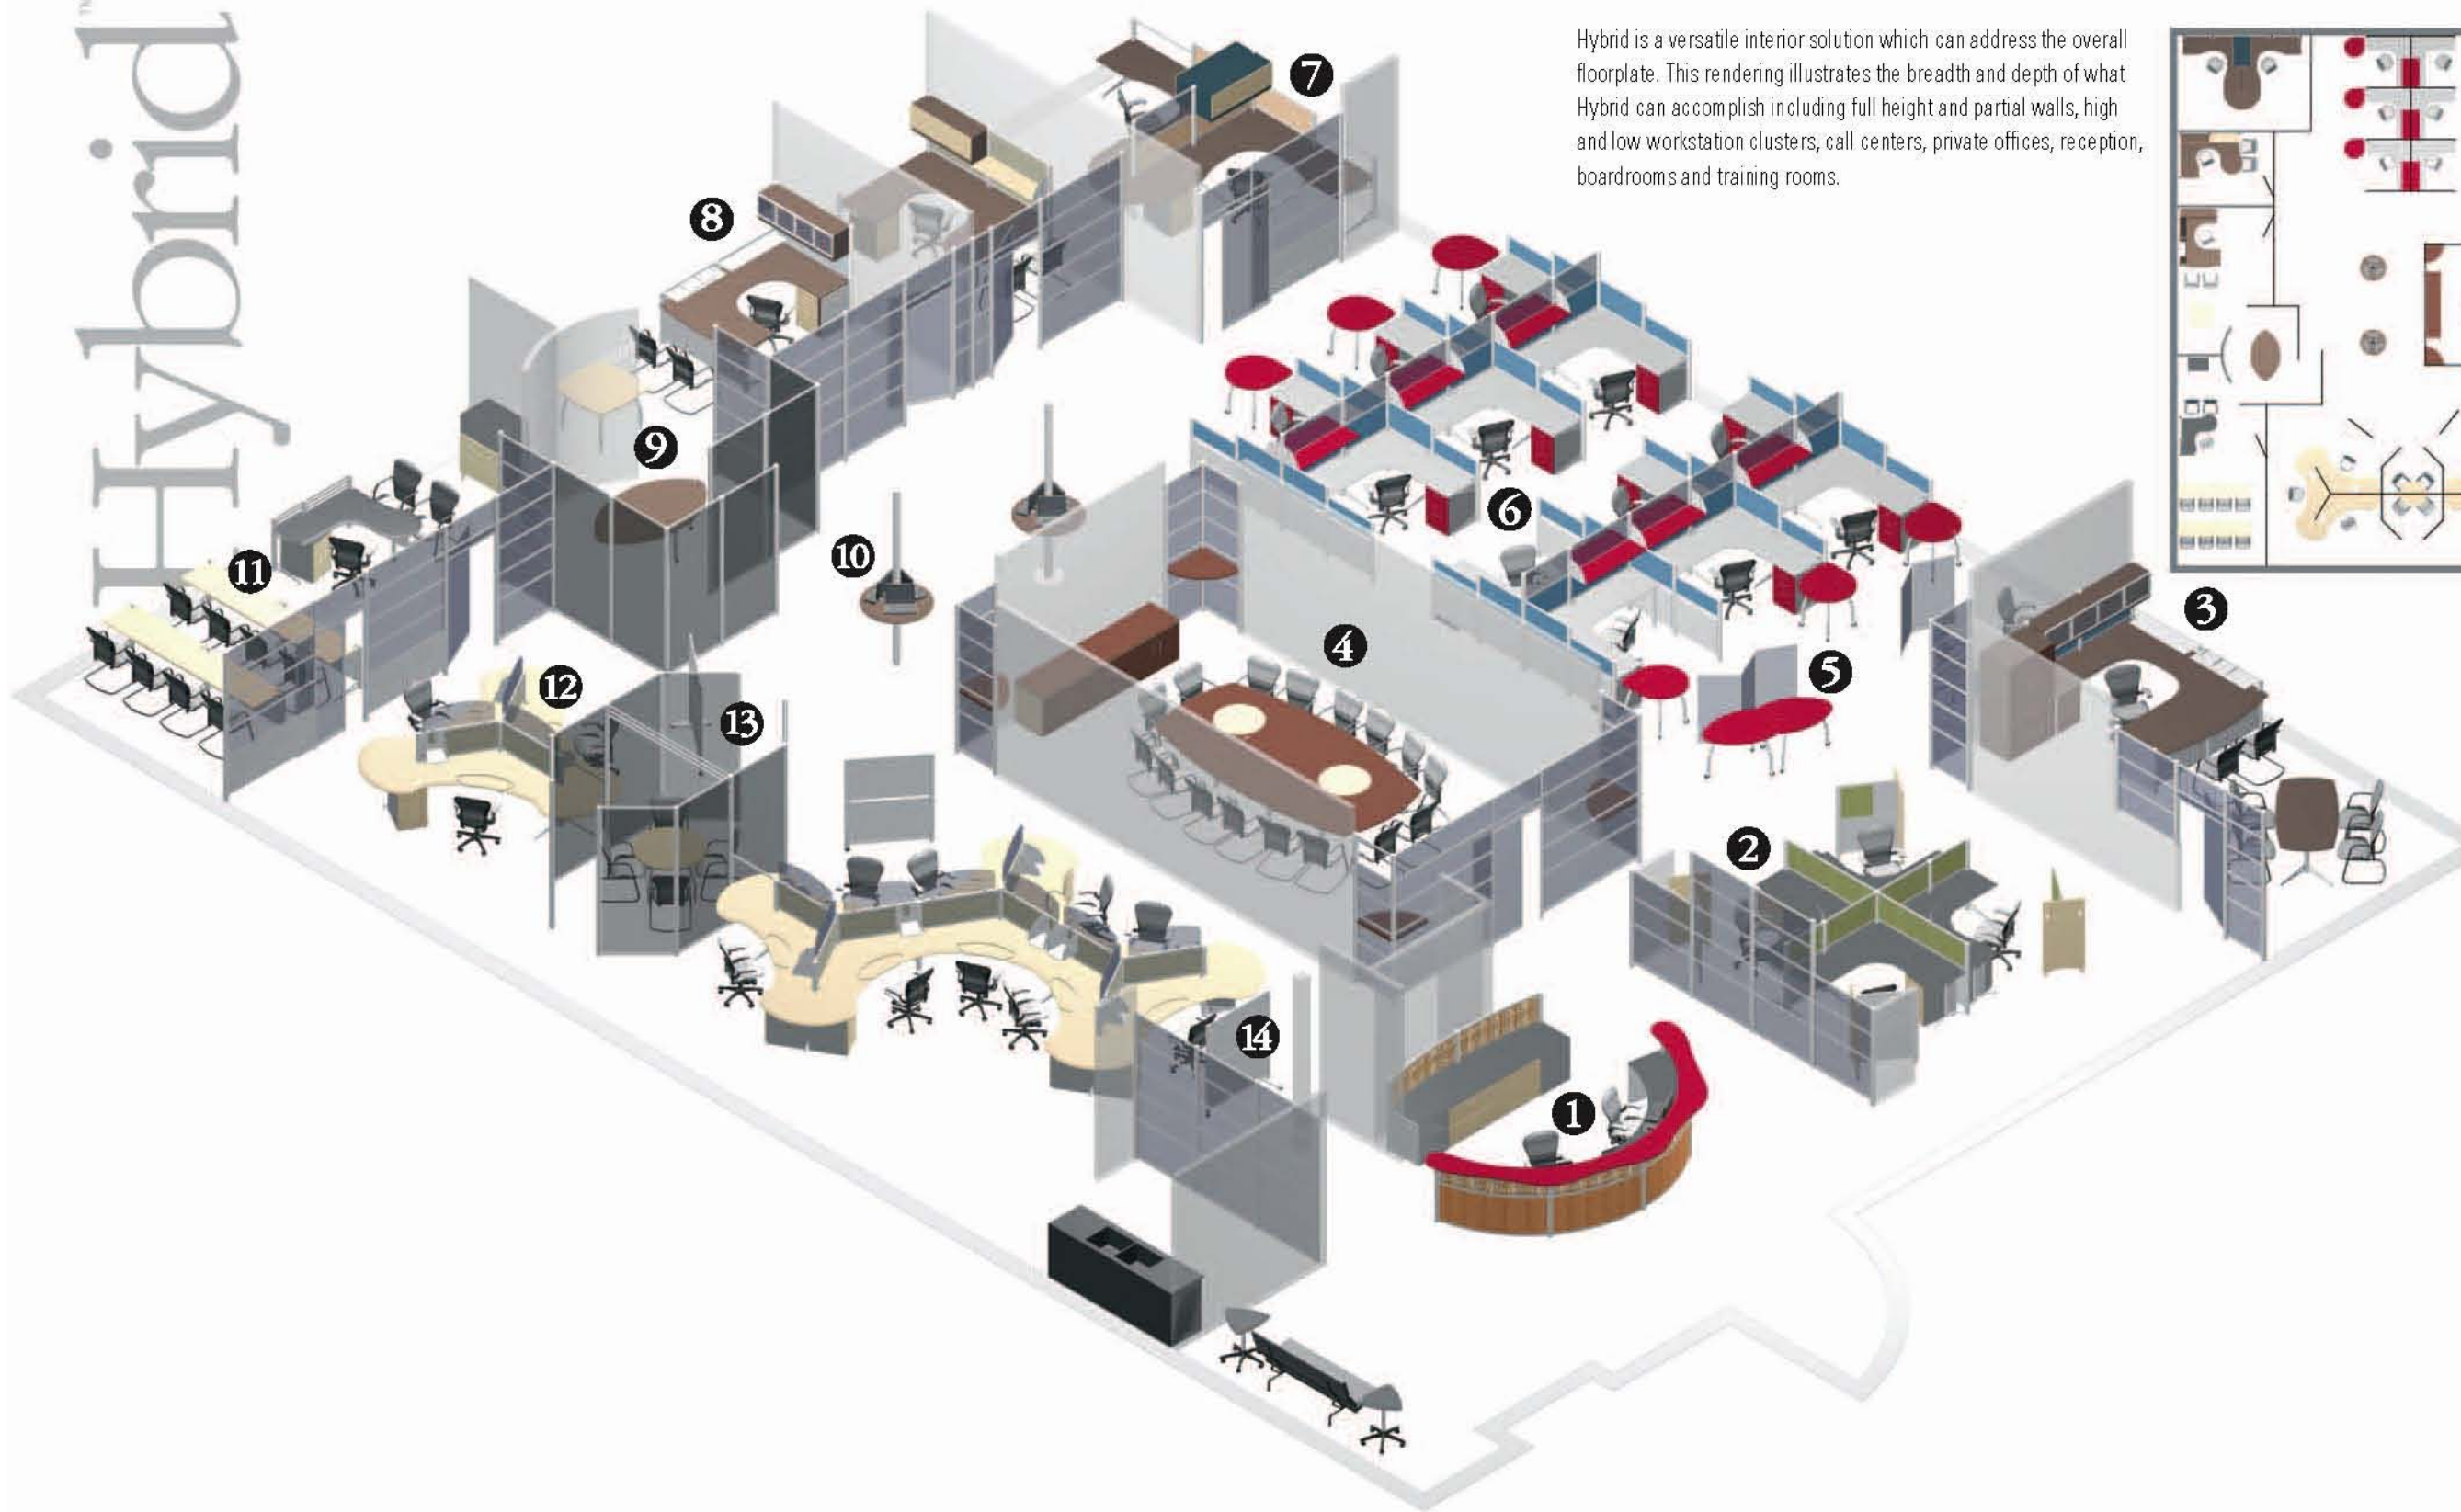

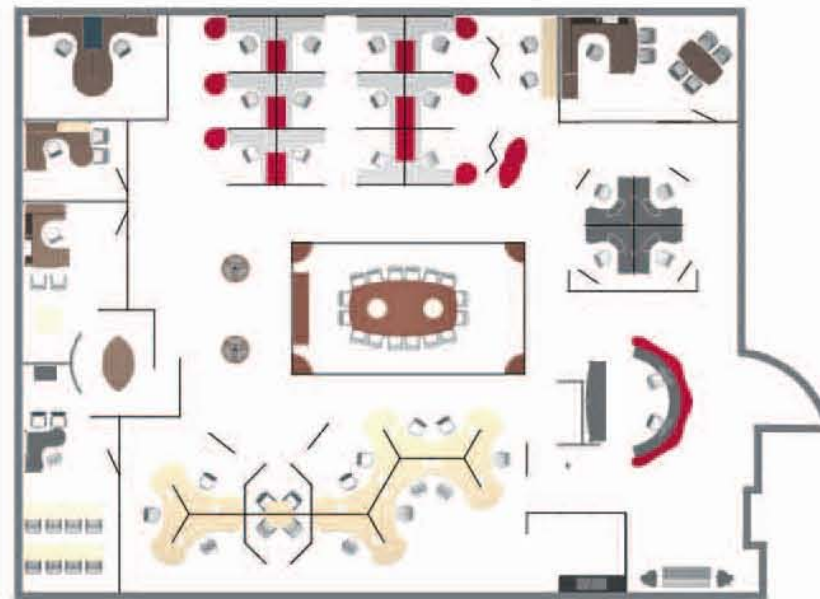

Sustainability

Product can be disassembled into its simplest raw material components for re-processing. Hybrid posts, beams, worksurfaces, dividers and storage are all highly recyclable.

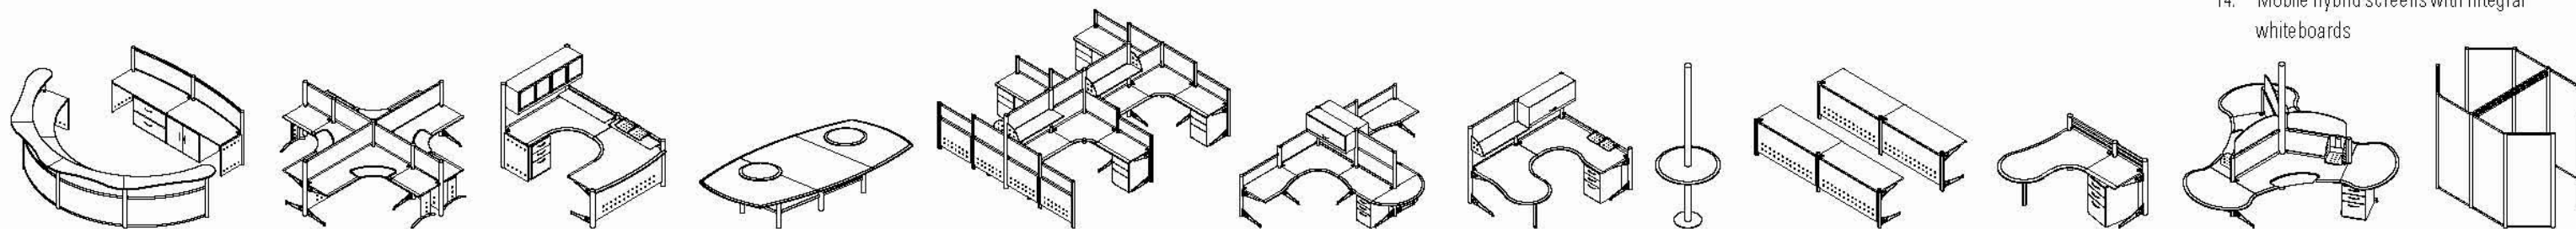

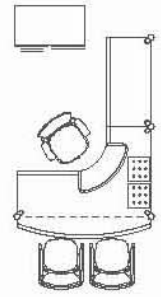

Hybrid™

Hybrid is a versatile interior solution which can address the overall floorplate. This rendering illustrates the breadth and depth of what Hybrid can accomplish including full height and partial walls, high and low workstation clusters, call centers, private offices, reception, boardrooms and training rooms.

1. Curved reception workstation and curved rear credenza
2. Quad Cluster with 49" high posts
3. Managerial workstation with Hybrid wall segments
4. Boardroom table with partial Hybrid wall integrated with drywall
5. Hybrid mobile table and lightweight pivot screens
6. L-shaped workstations with open shelving and spine service delivery
7. Dual back-to-back cluster workstation/ Hybrid full height wall with sliding door
8. Managerial workstation/Hybrid full height walls with hinged door
9. Enclosed meeting room, mobile tables/ full height Hybrid walls with lightweight solar stretch dividers
10. Touch-down stand-up workstation with ceiling service delivery
11. Linked training desks with electrical/ data services
12. 120° call center workstations with upmount frosted dividing screens
13. Shared meeting room with lightweight solar stretch dividers
14. Mobile hybrid screens with integral whiteboards

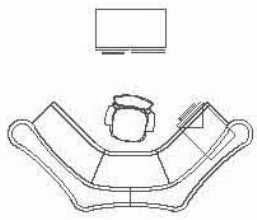

Computer Workstation

72" x 96" bow front L-desk with keyboard tray, finishes-sparkle cappucino hard coat work surface with bevel up edge, anodized aluminum posts and beams, silver modesty panels, frosted acrylic divider, chocolate and silver matrix storage unit with recessed round pulls.

Freestanding Workstation

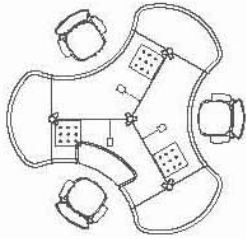

72" x 72" P-top with return and mobile lateral pedestal – finishes – chocolate hard coat worksurface with bevel up edge, anodized posts and beams, silver and chocolate storage unit with recessed round handle pulls.

135° Reception Workstation

Finishes - silver hard coat worksurface and transaction top with bevel up edge, maple veneer modesty panels, anodized aluminum posts and beams, chocolate and silver matrix storage unit with recessed round pulls.

Call Center workstation

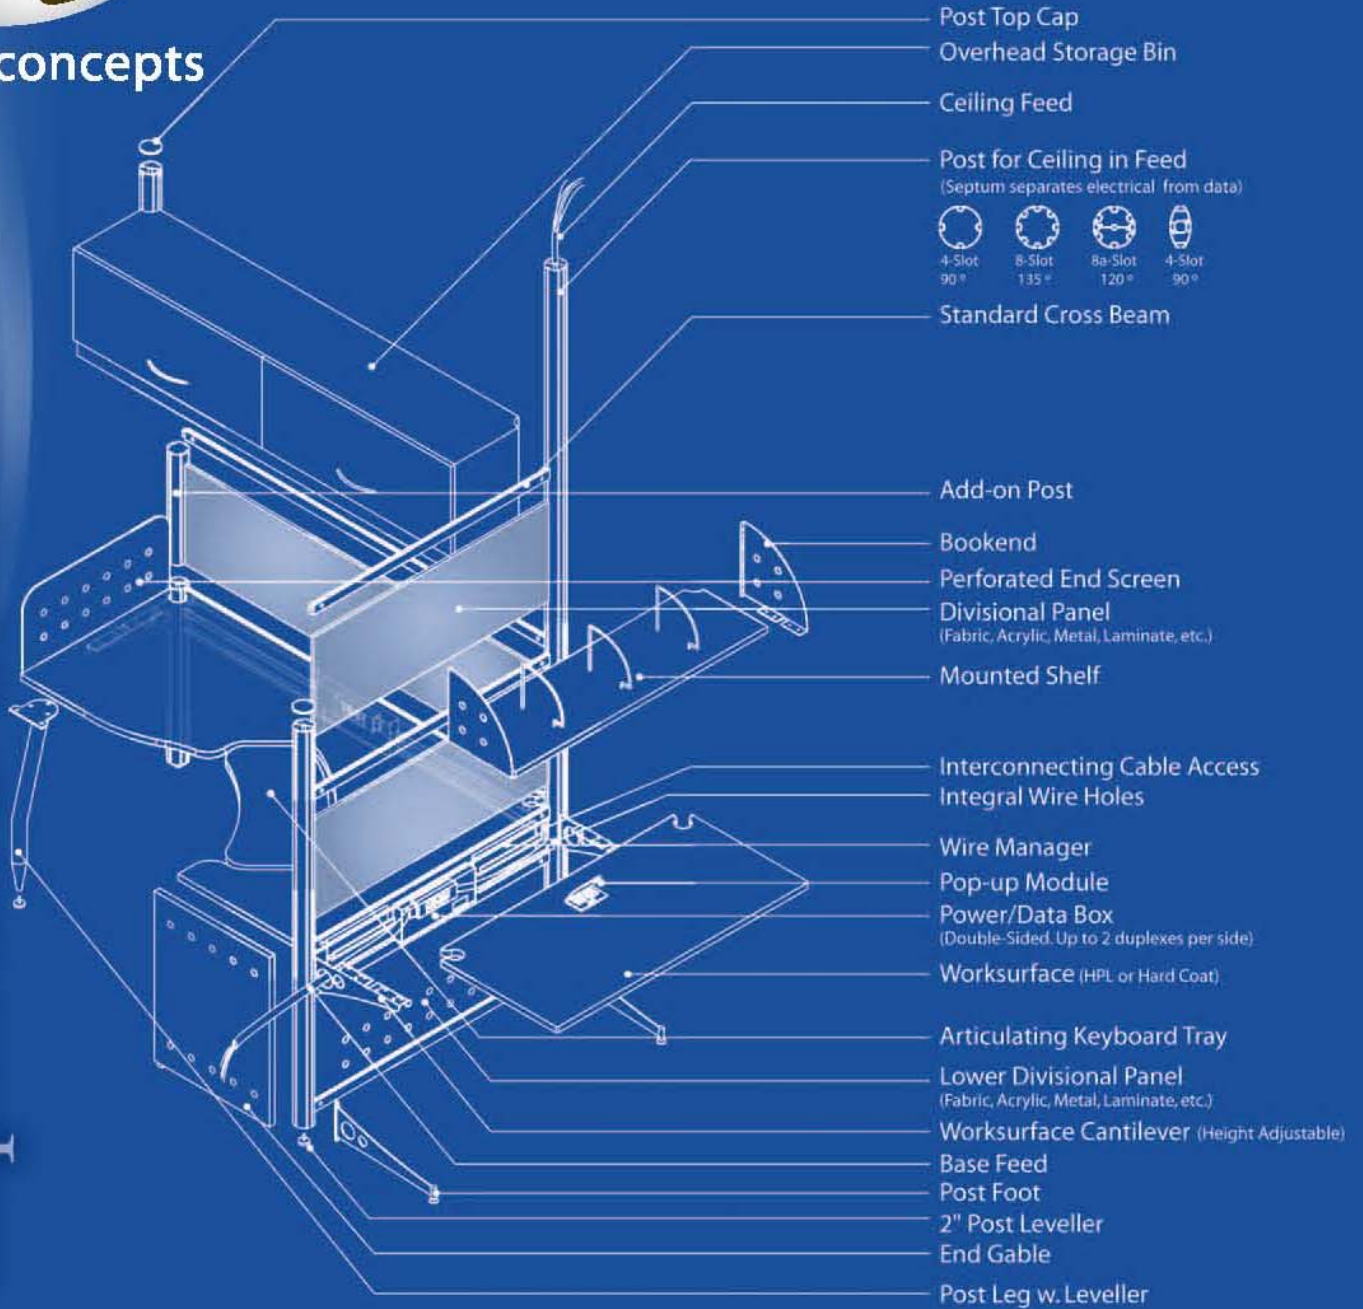

42" x 42" 120 degree 3 person cluster, 49" high posts with tackable fabric dividers, finishes - capuccino, latte and vanilla hard coat worksurfaces with sit-stand articulating keyboard platforms, grenadine posts and beams.
