

Metacolor floor

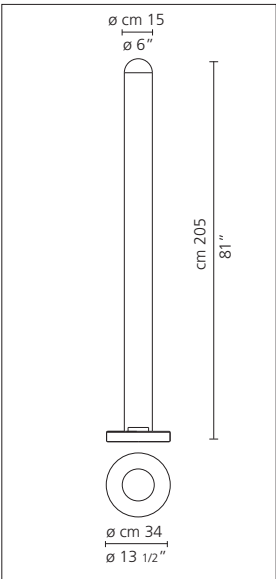

Ernesto Gismondi

Floor standing luminaire for indirect and diffused fluorescent lighting, utilizing the patented Metamorfofi 3 remote controlled color light technology.

- pillar shaped diffuser in opal white acrylic
- body/base in metal and polyester with incorporated micro processor and reception sensor for remote control activation and regulation of the colored fluorescent light sources
- additional fluorescent blue light sources near base of the lamp gives the luminaire a unique presence in any space
- concealed castors in base allow for mobility

Metamorfofi Fluorescent Techonology

“Metamorfofi” is a technological breakthrough, providing ambient light in endless gradations of color atmospheres, to follow or to create the mood and desire of the user in the changing moments of life. Utilizing color fluorescent light sources, 1 red, 1 blue, 1 green, controlled separately and simultaneously by a patented microprocessor, from a distance, a remote control acts on a receiver sensor, also enclosed in the luminaire and connected to the microprocessor and can be selected on the remote control by pressing a single button. 10 atmospheres have been defined and are created to interact with different aspects of life and experience.
