

# Tian Xia 2 RGB suspension

Carlotta de Bevilacqua 2008

Cable suspended cylindrical luminaire that offers a direct, indirect, and diffused halogen lighting and diffused colored fluorescent lighting.

- structure in polished aluminum with mirror finish and thermoplastic resin mirrored diffuser
- ceiling canopy in polished aluminum incorporates a microprocessor and remote controlled, infrared receiver
- three separately managed light systems:
  - the RGB fluorescents (12 in total) are positioned in the cavity of the diffuser cylinder, and produce the 6 different color ranges and a white light
  - 1 300W indirect halogen and 1 300W direct halogen can each be dimmed independently
- a color filter is provided for direct halogen light
- light performance is controlled by a remote control unit
- suspension cables in stainless steel
- mounting to standard electrical junction boxes
