TRAY RACK SERIES

The tray rack tables and tray rack shelf epitomize all the BassamFellows' values in a single piece: honesty of materials, solidity of construction, utility, adaptability to environment, and visual presence.

The design idea: create a table without the traditional form of a top and legs. Instead, the tray rack and shelf are honestly constructed using solid wood sections that are layered and stacked to support removable carved trays.

The modular tray rack system is highly adaptable to different living or commercial environments. The tray rack table is suitable for any use where an end table is required. From bedside to the executive office, the removable trays are perfect for serving or entertaining. The tray rack hall table provides a home for keys, mail and other loose items in an entry or reception area. The tray rack shelf serves to display and organize items – from elegant towel storage to retail applications. Alternatively, when used as a series, the tray rack shelf forms a practical room divider or open credenza.

The tray rack system is suitable for both residential or contract use. Custom heights available. Maximum shelf unit height of 183.5cm (72 1/4").
