

Flex™ Sleepers ■

Sleepers with options.

- Multiple configurations
- Convenient storage
- Effortless mobility

WORKING
FOR
YOU

Sleepers that put patients and guests at ease.

Optional casters allow you to move the chair across a room or hallway. Front wheels are fixed, while the locking rear wheels rotate 360 degrees.

Sleep surface side only. This space saving design adds storage and convenience. Lift the seat to store bedding, an overnight bag or personal items.

Easy to read instructions guide you through the process. The attached pull strap lets the patient's guest easily convert the sleeper to a loveseat or a lounge chair.

Flex™ Sleepers

With a welded structural steel inner frame that provides strength and stability, Flex Sleepers are the perfect choice in sleepover seating. The solid hardwood arms add warmth. For design continuity, Flex Sleepers are part of the Flex collection.

Flex Sleepers also offer field replaceable arm panels, seat and back cushions, as well as convenient under-seat storage. The pull handle is standard in black, but also available in sand, warm grey or desert beige.

Whether you choose the lounge or loveseat design, optional moisture barriers are available to help protect the fabric. When using suitable fabric, Flex Sleepers meet TB133.

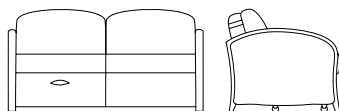

Easy to use, Flex Loveseat Sleepers have three configurations to fit in any footprint. With so many options for mobility, storage and arrangement, Flex Sleepers are the smart choice for any healthcare environment.
