Ordering C.O.M., C.O.L., and C.O.V.

BONDUEL, GREEN BAY, LAVERNE, and TUPELO

How to Specify C.O.M. Upholstery

Textile designs often have intricate patterns. Not all individuals will interpret fabric direction in the same manner.

As a standard procedure, KI cuts fabrics off the roll in a horizontal fashion as shown in Diagram A at the right. By cutting in this fashion, most waste is eliminated. Our requirements for yardage in this book are based on this type of cutting. When directional or patterned fabrics are used, they often require more yardage than solid colors.

By providing KI with a completely filled-out copy of the form on this page, we will be able to expedite your order. We find it particularly helpful with directional or patterned upholstery material. It is critical that copies of this form accompany test quantities as well as production quantities of C.O.M.

C.O.M. must be supplied in continuous yardage.

C.O.M., C.O.L. and C.O.V. Testing

KI will require for testing actual yardage to upholster one chair. The testing requirements depend on which chair you have selected on your order.

Test samples will be applied to the order and will be held for 6 months if needed. After 6 months, the sample can no longer be applied to your order. For all products to be tested, send test samples for approval to:

KI
1330 Bellevue Street
Green Bay, WI 54302
Attn: C.O.M. Specialist

To expedite the procedure, attach a copy of the "C.O.M. Information Form" on this page.

All C.O.M., C.O.L. and C.O.V. must be labeled with the purchase order number.

C.O.M., C.O.L. and C.O.V. Production

Customer's fabrics and leathers must be approved prior to acceptance for production. Upon test approval, a 1' square sample swatch of upholstery material must accompany the order. KI assumes no responsibility for wear, defects or performance of customer's own fabrics, vinyl or leather. C.O.M., C.O.L. and C.O.V. orders are available on a deferred delivery basis.

Orders for production of C.O.M., C.O.L. and C.O.V. upholstered products are not scheduled for processing until upholstery material is received. Upon receipt, KI will provide an acknowledgement and an estimated shipping date.

KI recommends that leather be ordered in yardage. Leather must be usable. The outer edges cannot be calculated as square feet or yardage.

The C.O.M., C.O.L. and C.O.V. yardage requirements accompanying products in the pricing section are for 10 chairs/seats or less, 54" wide nondirectional material. On larger orders, less material is required.

For exact production yardage requirements, call 1-800-424-2432, ext. 2707.

C.O.M., C.O.L. and C.O.V. Order Processing

For products shipped from Green Bay, WI facility, ship upholstery material to:

KI
Attn: C.O.M. Storage
1330 Bellevue Street
Green Bay, WI 54302

For products shipped from Tupelo, MS facility ship material to:

KI Tupelo
Attn: C.O.M. Storage
2112 South Green Street
Tupelo, MS 38801

For products shipped from Bonduel, WI facility, ship material to:

KI
Attn: C.O.M. Storage
204 West South Street
Bonduel, WI 54107

For products shipped from LaVerne, CA facility, ship material to:

Impress/Kismet/Medical & Laboratory Stools
Attn: C.O.M. Storage
2009 Wright Ave.
LaVerne, CA 91750

Intricate Patterns

In the event of specific requirements for positioning of intricate patterns or pattern repeats on seats and backrests, provide a sketch noting requirements, as in Diagram B, along with materials for testing, and with the order.

Diagram B

Treated Materials

If C.O.M. requires processing such as Scotchgard® or acrylic backing, it often shrinks. To prevent delays in delivery or back ordering due to shrinkage, please have your processor remeasure after processing and assure adequate yardage shipment.

Split Orders

If a portion of the shipment which does not require C.O.M., C.O.L. or C.O.V. applications is to be processed and shipped early, KI will enter the order immediately at your request. These split shipments are subject to minimum order changes.

Contact the C.O.M. Specialist at 1-800-424-2432, ext. 2707, with questions or to verify a split order.

Excess Upholstery Material

KI will dispose of excess upholstery material at the time of shipment unless expressly requested to return it with the product shipment.

Cancelled or Changed Orders

KI assumes no responsibility for extra C.O.M., C.O.L. or C.O.V. material due to a change of upholstery or cancellation of an order. It is the customer's responsibility to arrange for return of this material.

C.O.M., C.O.L. and C.O.V. Information Form

A copy of this form should accompany test requests and production orders. Please fill it out completely, and, if your order has been acknowledged, provide the acknowledgement number.

SPECIFICATIONS

Torsion® Seat

Seat and Backrest

Seats and backrests are molded compound curved polypropylene with a textured finish. Seat is two-piece construction. Upholstered chairs have partially exposed polypropylene surfaces. Fabric is upholstered over 9/16" foam on the backrest and 15/16" on the seat.

Backrest Supports

Two die-cast aluminum backrest supports attach the backrest to the Torsion® mechanism. A steel tube is cast into each backrest support for added strength.

Torsion® Mechanism

The back flex is achieved by the Torsion® mechanism. It consists of two flat torsion springs captured at both ends by brass bushings which in turn engage with the backrest supports. The Torsion® mechanism creates gradually increasing resistance over the full

12° of back flex.

Design

Designed by Giancarlo Piretti and manufactured in the USA by Krueger International, Inc. under license from Pro-Cord S.p.A.

Dorsal® Seat

Seat and Back

Two-piece injection-molded thermoplastic seat and backrest with textured seat and backrest surface, on front only. Seat and backrests are joined by a maintenance-free steel hinge with integral spring mechanism. The hinge to be covered with high-strength plastic bellows. Upholstered chairs have fabric covered, extra thick, soft foam backrest and seat cushions fastened to an inner shell. Four molded-in sills on underside of seat attach to spider with hi-lo screws.

Design

Designed and developed by Emilio Ambasz and Giancarlo Piretti for OPENArk B.V.

Manufactured in the USA by Krueger International, Inc. under license from OPENArk B.V. Dorsal® is a registered trademark of OPENArk B.V. and is used under license by Krueger International, Inc.

Wood Seat

Seat construction shall consist of a formed, maple species wood laminate seat with handle and book bag hook geometry incorporated into the back of the shell. Attachment hardware shall be flush mounted with top surface for comfort.

Intellect Wave™

Shell

One-piece contoured shell shall be made of static-free, high-impact polypropylene. Colorfastness ensured through complete color impregnation throughout the molded part. Strength and durability shall be assured through an engineered internal structural cavity which eliminates the need for unsightly ribs on the back of the shell. Rolled edges for

comfort and strength. Textured front and back. Wide, ergonomic handle molded into chair back for ease of mobility. Shell fastens to frame with six 3/16" multi-grip, high-strength steel rivets.

Seat Height Adjustment

Seat height adjustment shall be available via pneumatic cylinder. Lever-controlled pneumatic height adjustment has infinite height selection within the range. Seat swivel shall be standard. An optional auto height, auto return cylinder is lever-controlled pneumatic height adjustment with infinite height selection within a range and returns seat to the highest forward position when unoccupied, leaving an orderly look to any room.

Worksurface

Worksurface construction shall be 3/4", 45# density, MDF worksurface with .030" laminate, .020" paper backer, and 74P PVC edge. Square and rectangular worksurfaces shall have comfort curve on user side and 1.5" radius corners. Tops are predrilled.

360^o® Classroom Furniture

General Information

**Wire Book Rack
(360WBR)**

**Plastic Book Box
(360PBR)**

Dimensions

Overall width	23"	23"
Overall depth	12"	12"
Worksurface height	4"	4"

Worksurface depth adjustment shall allow for 4" of belly room adjustment via holes in the spider plate and metal inserts in the worksurface

Frame

Desk frame shall consist of one unitized welded frame consisting of a 1.00" x 3.00" x 14-gauge elliptical steel tube, 1.75" OD x 14-gauge round steel tubing, 13 ga. formed pipe, and a 0.250" thick steel plate. The 13 ga. steel tube is formed to a taper to accept the pneumatic cylinder for the seat.

Front and Rear Rollers

Front and rear rollers embedded in a grey TPU overmold to reduce floor marring. Front roller orientation with die-cast aluminum housing shall allow wheelbarrow type movement of desk when seat is lifted. Weight-activated rear roller orientation in die diecast aluminum housing shall allow desk rotation around worksurface column. Rear rollers compress when desk is occupied transferring the weight

to three glides preventing movement. Glides will have a non-skid grey base.

Finishes

Metal surfaces are finished with baked-on, electrostatically-applied, 30 sheen epoxy powder coating.

Wire Book Rack

Wire book rack construction is of .250" diameter steel wire.

Plastic Book Box

Plastic book box construction is of .150" thick thermal-formed polystyrene.

INFORMATION

C.O.M. Testing and Production Requirements

Not all materials are suitable for upholstering Torsion® or Dorsal® seats. A 1 yd. x 54" sample must be submitted and approved prior to acceptance of an order. If the fabric is directional in pattern or weave, the direction must be indicated on the submitted sample, and

additional yardage may be requested.

Test samples must be sent to:

KI
Attn: C.O.M. Specialist
1330 Bellevue Street
Green Bay, WI 54302

Dorsal® Student Desk

General Information

Dorsal® Student Desk
Unupholstered (DSD)

Features		
Polypropylene seat shell		•
Articulating backrest		•
Available upholstery		•
Powder coated finish		•
Tubular steel frame		•
Laminate surface		•
Adjustable glides		•
Dimensions		
Seat height		17-3/4"
Seat width		18-3/4"
Table width		23"
Table depth		18"
Table inclination		3°
Table edge to seat back		17-1/2"
Overall Dimensions		
Height		32-1/4"
Width		23"
Depth		36-3/4"

SPECIFICATIONS

Frame

Powder coated 14-gauge, 1-1/2" o.d. tubular steel. Floor cross brace is 1" x 2" x 14-gauge tubular steel. Frame under seat is 3/4" o.d x 14-gauge tubular steel.

Shell

Unupholstered chairs have a matte thermo-plastic shell with textured body-contact areas on the backrest and seat. Upholstered chairs have fabric-covered, extra thick, soft foam backrest and seat cushions fastened to an inner shell. Automatic mechanism governs backrest movement.

Table

1" thick, Novoply™ particleboard core with high-pressure laminate surface and vinyl bull-nose edge.

Glides

Adjustable glide with steel-capped ends.

Optional Book Rack

1/4" diameter welded wire construction. Chrome finish only. Factory Installed.

INFORMATION

C.O.M. Testing and Production Requirements

Not all materials are suitable for upholstering this product. A 1 yard x 54" sample must be submitted and approved prior to acceptance of an order. If the fabric is directional in pattern or weave, the direction must be indicated on the submitted sample, and additional yardage may be requested.

Test samples must be sent to:

SPECIFICATIONS

Frame

Powder coated 16-gauge 7/8" square tubular steel welded to two 14-gauge, 3/4" o.d. tubular steel set mounting members. A 14-gauge, 3/4" o.d. support is welded to the front legs.

Shell

Two-piece injection-molded theremoplastic seat and back joined by a steel hinge with integral flex mechanism. Hinge covered by plastic bellows. Unupholstered chairs have a textured surface on the front of the seat and back. Upholstered chairs have thick foam back and seat cushions fastened to inner shell and covered with fabric.

Tablet Arm

Tablet arms are 5/8" thick 11-ply plywood core with laminate surface and clear coat edge.

Glides

Steel or plastic glides.

Book Rack

Solid steel rod construction. Rack inserts into stack button holes in front and rear legs.

SPECIFICATIONS

Frames

Duplex nickel chrome plated or powder coated .75 x 1.5" o.d. x 15-gauge elliptical steel tubing.

Seat and Back

Solid, molded, 1/4" thick, ABS plastic attached to frame with screws.

Tops

Solid, molded ABS plastic with comfort curve along back edge, integral pencil grooves on each side. As with any large flat plastic surface, the support structure underneath may cause surface imperfections. Request samples for approval. Choose from solid tops or glue-in high pressure laminate tops. Glue-in high-pressure vertical-grade laminate insert is bonded into recessed area on desk top and has a shallow transition between laminate and the ABS edge. The center section of the Two-Student Table is black molded ABS plastic that separates work areas and provides cable man-

agement.

ADA Top

Worksurface construction shall be 3/4". 45# high density particleboard core with 0.030" high pressure laminate top, phenolic backing sheet, and 74P (2mm) edge. Radius corners with comfort curve along user side.

Glides

Front and rear nylon glides feature a warm grey molded bottom with a flat contour for better weight distribution. The grey bottom is molded to the glide body for a secure bond. Optional steel rear glides are also available (recommended for carpet applications). Embedded felt rear glides are also available. The rear glides are angled to prevent tipping and act as a wall saver.

Chair and Double-Entry Handle

Ergonomically designed handles are located behind seat back on chair or either size double-entry desk. Made of black nylon.

Book Box

Optional solid, molded ABS plastic book box installs by sliding into integral steel track on underside of desk or two-student table (two book boxes can be used with the two-student table). Book box can be used as storage tote when removed from the unit. Stacks up to ten high. Can be used as a computer keyboard tray when in the extended position. Can be fitted with optional mouse tray.

Mouse Tray

Arched piece of solid, molded ABS plastic can be added to optional book box when used as keyboard tray. Slides side-to-side for either left- or right-handed use.

SPECIFICATIONS

Shell

One-piece contoured shell shall be made of static-free, high-impact polypropylene. Colorfastness ensured through complete color impregnation throughout the molded part. Strength and durability shall be assured through an engineered internal structural cavity which eliminates the need for unsightly ribs on the back of the shell. Rolled edges for comfort and strength. Textured front and back. Wide, ergonomic handle molded into chair back for ease of mobility. Fastens to frame with six 3/16" multi-grip, high-strength steel rivets. Upholstered chairs have partially exposed polypropylene surfaces. Fabric is upholstered over 9/16" foam on the back and seat and fastened to an inner shell with screws.

Frames

Cantilever Chair, 4-Leg Chair, 4-Leg

w/Casters, Music Chair, and Cafe Stool
The frame is constructed of a 12-gauge base plate powder coated black. The bottom is molded to the glide body for a secure bond. Optional steel rear glide caps are also available (recommended for carpet applications).

Task Chair and Stool

The frame is constructed of a 12-gauge base plate powder coated black.

Book Rack (under seat)

External framework of 5/16" diameter solid wire rod welded to the chair frame. Cross braces of 5/16" diameter solid wire rod welded between the external framework.

Glides

Cantilever Chair and Cafe Stool

Glides are made of two components—the body and the glide cap. The glide body is made of heavy-duty nylon plastic. The standard glide features a warm grey molded bottom with a flat contour for better weight distribution.

The bottom is molded to the glide body for a secure bond. Optional steel rear glide caps are also available (recommended for carpet applications).

4-Leg Chair and Music Chair

Swivel Carpin Floor Saver glides are standard and should be used on all VCT tile floor applications but should not be used on carpet floors. Swivel type, polished zinc-plated steel glides are optional.

Task Chair and Stool

Adjustable molded, high-impact plastic glides.

Casters - Task Chair, Task Stool, and 4-Leg Chair w/Casters

Carpet Casters

Double wheels of high-impact thermoplastic. High-impact plastic frame. Black finish only.

Hard Floor Casters

Double wheels of soft plastic. High-impact plastic frame. Black finish only.

Pneumatic Height Adjustment - Task Chair and Stool

Lever-activated pneumatic cylinder enables seat height adjustment from 16-1/2" to 21-1/2" (large chair), 14" to 16-1/2" (medium chair), and 20-1/4" to 30-3/4" (stool).

Base

Task Chair

24" injection-molded, glass-reinforced nylon 5-blade base.

Task Stool

26" injection-molded, glass-reinforced nylon 5-blade base.

Armrest - Task Chair and Stool

A tubular steel frame supports self-skinning urethane armrests. The support is bolted to the seat underside. Armrest paint color and top pad are always black. (Field installable)

-----------------	-------------------

SPECIFICATIONS

Shell

One-piece contoured shell shall be made of static-free, high-impact polypropylene. Colorfastness ensured through complete color impregnation throughout the molded part. Strength and durability shall be assured through an engineered internal structural cavity which eliminates the need for unsightly ribs on the back of the shell. Rolled edges for comfort and strength. Textured front and back. Wide, ergonomic handle molded into chair back for ease of mobility. Fastens to frame with six 3/16" multi-grip, high-strength steel rivets. Upholstered chairs have partially exposed polypropylene surfaces. Fabric is upholstered over 9/16" foam on the back and seat and fastened to an inner shell with screws.

Frames

Cantilever Chair, 4-Leg Chair, 4-Leg

w/Casters, Music Chair, and Cafe Stool
The frame is constructed of a 12-gauge base plate powder coated black. Frame shall be duplex nickel chrome plated or powder coated after all welding processes are complete.

Task Chair and Stool
The frame is constructed of a 12-gauge base plate powder coated black.

Book Rack (under seat)
External framework of 5/16" diameter solid wire rod welded to the chair frame. Cross braces of 5/16" diameter solid wire rod welded between the external framework.

Glides

Cantilever Chair and Cafe Stool
Glides are made of two components—the body and the glide cap. The glide body is made of heavy-duty nylon plastic. The standard glide features a warm grey molded bottom with a flat contour for better weight distribution.

The bottom is molded to the glide body for a secure bond. Optional steel rear glide caps are also available (recommended for carpet applications).

4-Leg Chair and Music Chair
Swivel Carpin Floor Saver glides are standard and should be used on all VCT tile floor applications but should not be used on carpet floors. Swivel type, polished zinc-plated steel glides are optional.

Task Chair and Stool
Adjustable molded, high-impact plastic glides.

Casters - Task Chair, Task Stool, and 4-Leg Chair w/Casters

Carpet Casters
Double wheels of high-impact thermoplastic. High-impact plastic frame. Black finish only.

Hard Floor Casters
Double wheels of soft plastic. High-impact plastic frame. Black finish only.

Pneumatic Height Adjustment - Task Chair and Stool
Lever-activated pneumatic cylinder enables seat height adjustment from 16-1/2" to 21-1/2" (large chair), 14" to 16-1/2" (medium chair), and 20-1/4" to 30-3/4" (stool).

Base
The Pedestal Base Chair has a 24" injection-molded, glass-reinforced nylon 5-blade base. The Pedestal Base Stool has a 26" injection-molded, glass-reinforced nylon 5-blade base.

Task Chair
24" injection-molded, glass-reinforced nylon 5-blade base.

Task Stool
26" injection-molded, glass-reinforced nylon 5-blade base.

Armrest - Task Chair and Stool
A tubular steel frame supports self-skinning urethane armrests. The support is bolted to the seat underside. Armrest paint color and

Frames

Tablet Arm Chair and Double Entry

Desk

0.75" x 1.5" O.D. x 15-gauge elliptical steel tubing welded to a 14-gauge steel plate. Frame shall be duplex nickel chrome plated or powder coated after all welding processes are complete.

Combination Desk

0.75" x 1.5" O.D. x 15-gauge elliptical steel tubing welded to a 12-gauge steel plate. Frame shall be duplex nickel chrome plated or powder coated after all welding processes are complete.

Fixed Height - 4-Leg Desk and Trapezoid Desk

0.75" x 1.5" O.D. 15-gauge elliptical steel tubing welded to a heavy 11-gauge steel plate. Frame shall be duplex nickel chrome plated or powder coated after all welding processes are complete. Legs fasten to top with K50 2.24 x 13mm Torx head screws.

Fixed Height - Cantilever Desk and Two

Student Desk

0.75" x 1.5" O.D. 15-gauge elliptical steel tubing welded to a heavy 11-gauge mounting bracket. Frame shall be duplex nickel chrome plated or powder coated after all welding processes are complete. Frames fasten to top with K50 2.24 x 13mm Torx head screws.

Adjustable Height - 4-Leg Desk, Trapezoid Desk, and ADA 4-Leg Desk

1.68" x 0.99" OD 17-gauge elliptical steel tube welded to a heavy 11-gauge steel plate. Top section of leg powder coat finish after all welding processes are complete. Telescoping lower section of 0.75" x 1.5" OD 15-gauge elliptical steel tube in bright chrome finish; locks with 1/4" screw in 1" increments in a 22"-34" height range. Legs fasten to top with K50 2.24 x 13mm Torx head screws.

Adjustable Height - Cantilever Desk and ADA Cantilever Desk

0.75" x 1.5" OD 15-gauge elliptical steel tube welded to a heavy 11-gauge steel mounting bracket. Telescoping lower section in bright

chrome finish; locks with 1/4" screw in 1" increments. Adjustable height range is 24"-30" and ADA height range is 28"-34". Legs fasten to top with K50 2.24 x 13mm Torx head screws.

Book Basket (under desk)

Chrome plated 7mm dia. solid steel wire attached to underside of top with eight K50 2.24 x 13mm Torx head screws.

Book Box (under desk)

Molded thermoplastic polypropylene installs quickly to underside of the top with nine K50 2.24 x 13mm Torx head screws. Translucent finish helps provide a safe environment while allowing for some degree of personal privacy. Molded-in pencil tray keeps items conveniently inside book box within easy reach, not on the floor or in the back of the book box.

Book Bag Hook

1/4" solid wire rod quickly installs to underside of top with two K50 2.24 x 13mm Torx head screws. Chrome finish provides long

lasting wear resistance.

Glides

Cantilever Desk, Double Entry Desk, and Two Student Desk

Glides are made of two components—the body and the glide cap. The glide body is made of heavy-duty nylon plastic. The standard glide features a warm grey molded bottom with a flat contour for better weight distribution. The bottom is molded to the glide body for a secure bond. On Two Student Desks, the center leg has two adjustable threaded glides to level the desk on uneven floors. Optional steel rear glide caps are also available (recommended for carpet applications).

4-Leg Desk, Trapezoid Desk, and Combination Desk

Swivel Carpin Floor Saver glides are standard and should be used on all VCT tile floor applications but should not be used on carpet floors. Swivel type, polished zinc-plated steel

glides are optional.

Top

Cantilever Desk, 4-Leg Desk, Combination Desk, Double Entry Desk, and Two Student Desk

Solid, molded thermoset plastic with pencil groove or high-density particleboard core covered with .03" high-pressure laminate top and .02" phenolic backing sheet and 74P PVC edge. Worksurfaces shall have comfort curve on user side and 2-3/8" radius corners. Hard plastic top is 5/8" thick and the laminate top is 3/4" thick. Rectangle tops measure 19" x 26" and the trapezoid tops measure 20-1/2" x 32". ADA tops measure 36-1/2" x 20" and the hard plastic ADA tops do not have a comfort curve or pencil groove. Two Student Desk has two comfort curves.

Tablet Arm Chair

Tablet boards are 5/8" 11-ply plywood core with high-pressure laminate with clear coat edge and plain backer sheet. The effective

working surface of the standard tablet arm is 14" x 11" and the effective working surface of the laptop tablet is 18" x 14".

HOW TO ORDER

Indicate the following information on order form:

- Quantity of each item.
- Model number, including options. See "How To Build a Model Number".
- Any special service required.

Note: •The ☐ indicates that a choice is required.
•The absence of the ☐ indicates that no choice is required.

HOW TO BUILD A MODEL NUMBER

- A

Select basic model.
- B

Select tablet arm direction.

LH

= Left hand

RH

= Right hand
- C

Select frame color.

Refer to color addendum at ki.com or in KI Price List or KI Fabrics & Finishes binder.

Standard colors: No upcharge.

Premium colors: Add \$2 list; 3 week lead time.

Chrome frame: Add \$11 list.
- D

Select shell color.

Refer to color addendum at ki.com or in KI Price List or KI Fabrics & Finishes binder.

Standard colors: No upcharge.

Premium colors: Add \$3 list; 3 week

lead time.

KI Fabrics & Finishes binder.

- E

Select surface finish.

Refer to color addendum at ki.com or in KI Price List or KI Fabrics & Finishes binder. Surface finish offerings are based on edge style selections.

Standard colors: No upcharge.

Premium colors: Add \$7 list; 3 week lead time.
- F

Select glide option.

FS

= Nylon Carpin floor saver glides

SG

= Steel glides
- G

Select carton code.

CTN

= Cartoned

NP

= No packaging

Cartoned: Add \$29 list/each.
- H

SPECIFICATIONS

CHAIRS - Posture Series 10 & Teacher's Series TC

Frame

Chrome-plated 18-gauge, 1" o.d., non-swaged steel tubing.

Seat & Back

Contoured 5/8" thick, solid, molded thermoset plastic attached to frame with screws.

Glides - Posture Chair Series 10

Swivel-type steel glides (nylon optional).

Casters - Teacher's Chair Series TC

2" diameter dual-wheel type.

Arms - Teacher's Chair Series TC

1/2" wide molded firm plastic foam on 18-gauge, 1" o.d. steel support welded to frame.

Underseat Book Rack-Series 10

Chrome plated 9.5mm dia. solid steel wire with four solid 8mm dia. wire crossbraces. Attached with two 3/16" high strength steel

rivets in rear legs. Measures 13" x 16".

Underseat X-Bracing Series 10

8-gauge, 1/2" o.d. tubing.

DESKS - Series 20, 30, 40, and 60

Frame

Chrome-plated 18-gauge, 1" o.d., non-swaged steel tubing with 18-gauge, 3/4" o.d. u-shaped lower brace welded to legs.

Top

Solid, molded thermoset plastic w/ rounded edges & pencil groove or high-density particleboard core covered with .030" high-pressure laminate top and .020" phenolic backing sheet w/ sealed clear lacquer edge. 18"x24"x5/8". Study ADA (IL40) top measures 20"x36-1/2"x5/8". Trapezoid (IL60) top measures 21"x33"x5/8".

Glides

Swivel-type steel glides (nylon optional).

Open-Front Book Box - Series 20

One-piece, 20-gauge cold-rolled steel with embossed sides and bottom. 22" x 15-1/4" x 4-3/4"

Lift-Lid Book Box - Series 30

One-piece, 20-gauge cold-rolled steel. Full-length hinge. Two self-balancing lid supports. Interior dimensions = 22-1/4" x 15-1/4" x 5"

Book Basket - Series 40 & 60

Chrome plated 7mm dia. solid steel wire attached to underside of top with eight #10 x 5/8" SMPTH - Zinc screws.

Translucent Book Box - Series 40 & 60

Optional solid, molded thermoplastic polypropylene book box. Translucent finish helps provide safe environment while allowing for some degree of personal privacy. Molded-in pencil tray keeps items conveniently inside book box within easy reach, not on the floor or in the back of the book box. Measures 15" wide, 14" deep, and 4" high.

LAMINATE TOP DESK - Series 50

Tops

7/8" thick high-density particleboard core with 0.030" high-pressure laminate top and phenolic backing sheet predrilled to accept frame.

Frame

1.25" OD 18 gauge seam welded tubular steel legs. Telescoping lower section of tubular steel in bright chrome finish; locks with set screw in 1" increments from 22"-32". Side legs assemblies with 14 gauge perforated side aprons and book bag hook. Front modesty panel made from 14 gauge steel with patented interlocking teeth to fit in leg.

Book Tray

16 gauge hemmed steel with tabs to attach to side aprons with screws.

Shipping

Desks will ship k.d. and book trays will ship 4 trays per carton.

Instruct[™] Specifications

All Terrain® Instructors' Desk

Unit is based on a 22" deep x 22" wide and 35-1/2" high storage tower. The tower has three adjustable metal shelves and one laminate rollout shelf at the bottom of the storage unit. At the top of the storage tower is a landing pad that is made of 3/4" laminate with 74P edge, this surface is raised 3-3/4" above the top of the storage tower with aluminum extrusions.

A 1-1/4" thick laminate covered surface with a 74P edge is attached to the side of the storage tower on one end and supported by a 3" diameter support leg on the other end of the unit. There is a perforated partial modesty panel that is suspended from the underside of the surface. This modesty panel covers the area from the storage unit to the support leg.

There are three open grommets and one covered grommet for wire management on the storage tower. One grommet is on the top of the storage unit directly below the one covered grommet on the landing pad. The other two grommets are above and below the worksurface on the inside of the desk unit.

All Terrain® Mobile Instructors' Desk

This unit has an All Terrain® Binder Tower with the lectern option. Also there are four open grommets at the top and bottom of each of the binder's sides. There is a surface that is attached to the side of the Binder Tower and supported on the other end by an All Terrain® Table leg with casters. There is a perforated partial modesty panel that attaches to the leg and the binder tower.

700 Series® Instructors' Desk

This unit is identical to the standard 700 Series® Desk with the following changes. The desk has a peninsula shaped top that overhangs the desks frame to allow for collaboration with students. The frame of the desk has a 12" deep bookcase that is the end panel opposite the peninsula overhang. The bookcase is 30" or 36" wide, which is the depth of the desktop. This unit is non-handed, there is no left or right, the side with the bookcase can be reconfigured after install should the need arise.

WorkZone® Instructors' Desk

The WorkZone® Instructors' desk is based on a standard WorkZone® square shoe unit that has a worksurface supporting pedestal (BBF configuration) to support the extended side of the square shoe and a cantilevered frame on the other end. The surface is 1-1/4" thick with a high-pressure laminate.

All Terrain® Binder Tower (Lectern option)

The lectern option can be added to any All Terrain® Binder Tower that has both a landing pad and outriggers. The podium option is an angled landing pad to allow better viewing for the instructor.

All Terrain® binder towers are available in heights and drawer combinations to suit personal or shared storage requirements.

Binder towers specified without drawers are optimized for book, binder or bin storage.

These units include two adjustable shelves.

Units may be specified with a single file drawer that can be used for letter files, legal files or bins, or for A4 files. Units with a file drawer include one fixed and one adjustable shelf and may also be specified with pullout pencil drawer.

All Terrain® binder towers may be specified with or without a door, on casters or glides with outriggers. The binder tower always includes a laminate either directly attached or as a raised landing pad. These tops can be specified as bowed front rectangular or as shaped.

- Unit based on 22"D x 22"W and 35-1/2" high storage tower
- Tower had three adjustable shelves and one rollout shelf at the bottom (rollout shelf will be the same as the specified laminate)
- Top of storage tower is a landing pad
- Perforated modesty panel
- 74P edge
- Unit has black grommets to allow wires to be run into and out of the storage tower
- Left and right configurations are based on location of work surface (left worksurface pictured)
- Back of the tower has ventilation holes for circulation

**You make the rules.
We make the rest.®**

Of course KI solutions work better for you. They're made for you. No one pays more attention to customer needs than we do. We don't design our furniture to win awards (even though it does). We don't rely on one-size-fits-all solutions (even though they would make our life easier). We find out what you need. And, we make it. The same applies to our service, distribution channels...everything we do. It's all built around knowing what you want and giving you the choice. KI solutions work, because we're working for you.
