Ivy League

Reclaim

Uniframe

Maestro Chairs

WorkZone

Versa Wood Chairs

Venue Tables

Torsion Seating

Squalicum High School in Bellingham, Washington blends the latest technology, natural elements and flexible space usage into a beautiful and comprehensive learning environment. Resource centers feature emerging technology; classrooms are clustered for focused, integrated learning; attractive office areas enhance productivity; and the commons provides a performance and meeting center for the community. In all of these areas, adaptable KI furnishings ensure low lifecycle costs due to the longest

warranties in the business. "The furniture, recommended by the designer, looks very sharp and has a nice feel," said Squalicum Principal Bob Jones. ■ In classrooms, KI's Ivy League student chair/desks provide unbeatable strength and durability while WorkZone teachers' desks maximize instructors' space with concealed wire management and optimal storage. ■ In the commons, Reclaim containers make trash collection and recycling convenient.

■ The social heart of the school is the commons area. Meetings, school activities, cafeteria seating, banquets and performances are easily accommodated in this multi-purpose area. The space readily adapts to these various needs with the use of Uniframe tables with bench seating and Uniframe round tables with stackable Maestro chairs. "Because the area serves so many functions, the tables get moved around quite a bit...nearly every day," said Jones. Uniframe tables easily fold, move, rearrange and store with controlled,

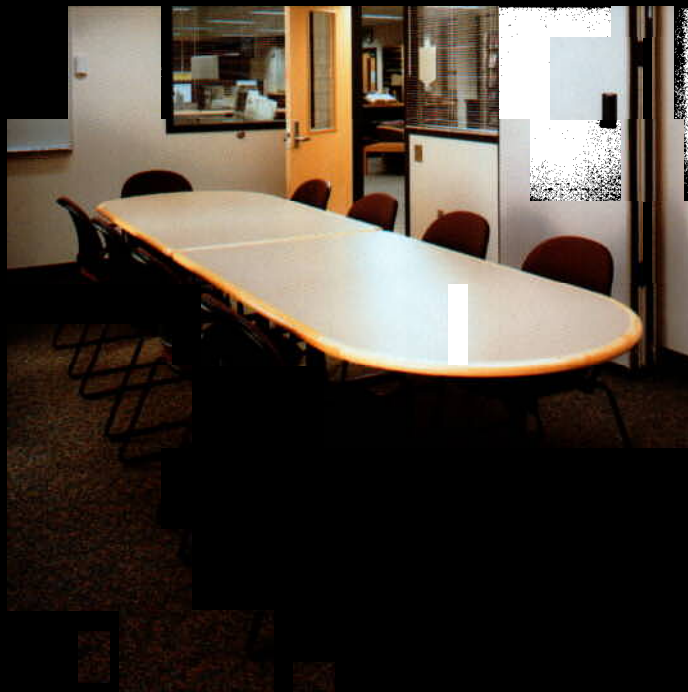

effortless operation. KI's unique Perfect Edge on tabletops provides unparalleled edge protection during frequent moves and seals the top core for enhanced sanitation in this food service environment. The stylish Maestro chairs provide exceptionally comfortable seating and facilitate flexible space usage when stacked 38 chairs high on a mobile storage dolly.

■ In the resource centers, user-friendly WorkZone tables deliver power with accessible wire management and keep workspaces free of clutter. WorkZone is an affordable, flexible computer desk solution. Classic Versa wood chairs enrich the room's ambiance and humanize the technology with the warmth of wood.

■ In partitioned conference rooms, KI's Venue tables in a custom D shape add versatility and style. When the room is undivided, two adjacent D shapes form a spacious racetrack meeting table. When

the room is divided, a single D shape table on each side of the partition provides ample seating. For conference seating, Torsion chairs provide the ultimate in ergonomics, style and practicality. They offer exceptional comfort at a reasonable price in fabric designs that notably enhance the environment. ■ According to Jones, KI furniture was one of the best decisions made during the planning of Squalicum High School. "It adds a lot to the feel and function of the entire building."
