

A large "family" with a common theme - comfort.

- Durable construction
- Modest price
- Clean design

WORKING
FOR
YOU

**What makes Versa® one of
KI's most popular chairs?**

Versa offers big comfort in a small-scale chair. Its clean lines work well in any environment. While it's modestly priced, don't let that fool you. Versa is built to last. Not only does it exceed all BIFMA test standards, it beats KI's higher internal test standards. More than a single chair, Versa is a family of seating to meet all your needs.

■ Versa® Standard

The Versa Standard chair features padded, contoured seats for exceptional comfort and a fully upholstered back. It's available in a wide range of fabric choices to complement any environment, including KI fabric and vinyl, Pallas® Textiles and C.O.M.

■ Versa® Wood

The warm, natural tones of wood are an inviting element in any room. The Versa Wood chair is available in clear coat over maple, oak, cherry, mahogany and walnut stains.

■ Versa® Poly

High traffic? Hard use?
Bring it on. And bring in the
seating that can stand up to
the toughest environments—
Versa Poly chairs. Made of
durable polypropylene, these
chairs are built for hard use
and long life. Versa Poly chairs
are also a breeze to clean.

■ Versa® XL

People come in different sizes and shapes. So should chairs. That's why KI created the Versa XL. It's the perfect solution when you need a chair that is built to comfortably seat the larger-sized individual. This bariatric chair features a 30-inch wide seat and is rated at 500 pounds. It's also backed by KI's 10-Year Structural Integrity Warranty.

■ Versa® Conference

Nothing is worse than sitting through a long conference in an uncomfortable chair. As time ticks on, aches and numbness set in and attention wanes. The solution? The Versa Conference chair. It has thicker cushions and larger dimensions than the standard Versa and offers exceptional comfort for extended seating. This puts the audience's attention back where it belongs...on business.

■ Versa® Café Stools

The Versa Café Stool combines the clean design and durability of the Versa chair with the height of a stool. The Versa Café Stool is available in polypropylene, fabric and wood.

■ Versa® Wallsaver

Versa Wallsaver chairs are a great way to prevent damage and marring of your wall surfaces. The chair's rear legs touch the base of the wall, preventing the chair back from contacting the wall surface. Wallsavers are in high demand, especially in the healthcare market. Yet, they are perfect for any space where you want to maintain the beautiful look of your walls. Wallsavers are available on Versa Standard, polypropylene and wood versions.

■ Versa® Junior

Safety, durability and great kid appeal. That's what you'll find in Versa Junior chairs and tables. Designed and manufactured to be stable and safe. Underside of seat and tabletops are free of sharp edges and rough surfaces. Chairs have polypropylene seats and backs and are available in three sizes.

■ Versa® Basic

Clean design and a budget price make Versa Basic an attractive stack chair for any environment. Front legs are distinguished by a subtle curve, a detail unique to Versa Basic's design. With everything this chair has to offer, the only thing "basic" about it is the cost.

**You make the rules.
We make the rest.®**

Of course KI solutions work better for you. They're made for you. No one pays more attention to customer needs than we do. We don't design our furniture to win awards (even though it does). We don't rely on one-size-fits-all solutions (even though they would make our life easier). We find out what the market needs. And, we make it. The same applies to our service, distribution... everything we do. KI solutions work, because we're working for you.
