

Three® Lounge Sleeper ■

Design flexibility within a patient room.

- Easy conversion
- Space-saving design
- Under-seat storage

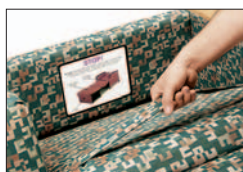

Adaptable for a wide range of care-giving environments.

When movement is a must, optional casters allow you to move the chair across a room or hall; rear wheels are locking and all wheels rotate a full 360 degrees.

The sleeper offers under-seat storage for bedding, an overnight bag or personal items.

The pictorial instructions and attached pull let the patient's guests quickly convert the sleeper into a loveseat or lounge chair.

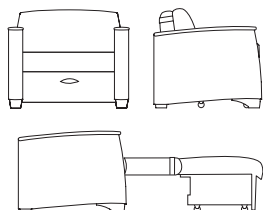

Three® Lounge Sleeper

The Three Lounge Sleeper is designed to put patients and their guests at ease with inviting, stylish seating options that create a relaxing, warm atmosphere. With one easy pull, the Three Lounge Sleeper utilizes a patented mechanism that quickly and effortlessly converts the seat and back into a sleep surface for guests. Field-replaceable upholstery covers are a standard option.

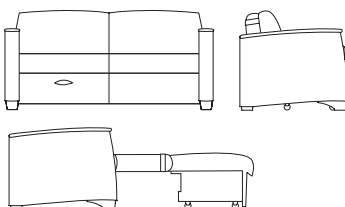

The Three Lounge Sleeper provides greater flexibility to work within the space constraints of healthcare facilities while providing outstanding comfort. With an enhanced sleeping capability, it extends to a flat sleep surface that is 27.5" wide by 77" deep. The Three Lounge Sleeper provides a wealth of options for those who have changing seating needs.
