

Warren Chair. Safe, comfortable patient seating.

- Therapeutic motion
- Hygienic mesh fabric
- Easy mobility

**WORKING
FOR
YOU**

■ Sit down in comfort. Stand up with ease.

Sit down. Stand up. Easy does it!

The Warren chair armrests are uniquely designed to aid patient entry and egress. Large easy-to-grip armrests are positioned well forward of the seat with vertical front supports that keep armrests stable. This design enables patients to stand up (and sit down) safely and securely, often reducing the need for staff assistance. Once standing, patients stabilize themselves between the armrests, gaining their balance for a safe first step.

Maneuverability. Move The Warren chairs easily, without dangerous lifting. The push bar on the seat back and the rear tilt wheels combine for greater chair mobility and fewer staff injuries.

The Warren chair armrests are uniquely designed to help patients stand up and sit down with ease.

Explore design possibilities with optional upholstered seat and back covers. Removable covers are easy to clean or replace. No downtime. Mesh structure enables continuous chair use.

The Warren Chair®

Motion and support. Unique therapeutic motion. Refined lordotic back curvature for lumbar support. The result...patients benefit from optimum comfort, enhanced respiration and improved circulation.

Cool and dry. The superior ventilation of mesh fabric promotes skin integrity. The result...reduced risk of skin breakdown and more comfortable patients.

Clean and sanitary. Disinfectants penetrate mesh fabric from both sides to promote infection control. The result...more hygienic seating and quality patient care.

Safe and secure. Easily maneuver chairs with rear tilt wheels and push bars. Unique arm design assists patients as they enter or exit the seat. The result...reduced risk of staff or patient injuries.

Variety and options. Mesh or upholstered seats and backs. A variety of base styles. Ottomans and more.
