# QUESTECH® METALS POLISHED TO PERFECTION

▲ Photo info

Featured products listed on back cover.

Open up a whole new world of design possibilities with Questech® Metals. Inspired by the work of renowned artist Roger Questel, **these unique, lightweight real metal tiles** allow you to turn ordinary backsplashes into breathtaking focal points... add old world elegance to walls... or enhance a room with a shimmering floor border.

## LIGHTWEIGHT

Questech Metals are 20% of the weight of solid metal.

## AFFORDABLE

Questech Metals are priced competitively with a wide variety of other decorative finishes.

## DURABLE

Questech Metals feature a protective clearcoat to ensure a durable, virtually maintenance-free finish. With proper care, Questech Metals will retain their rich appearance for years.

## AN ARTISTIC EVOLUTION

Questech Metals blend new technology with well-known, trusted materials to bring the time-honored beauty and elegance of copper, bronze and nickel silver to today's homes. Questech Metals are part of the Smithsonian Institute's permanent collection at the Cooper-Hewitt National Museum of Design.

### MADE FROM PREMIUM METALS

Designed for interior use, Questech Metals are manufactured using a patented blend of premium metals. Each tile is cast in a mold made from an original hand-carved design, then individually polished. Finally, the tiles are coated in a protective clearcoat for enhanced durability.

### A NATURAL BEAUTY ALL ITS OWN

Questech Metals are individually manufactured with the care that comes from one-of-a-kind craftsmanship. Surface markings and variations are inherent qualities of the process and add to the beauty and richness of Questech Metals.

### HELPFUL HINTS

It's no work at all to keep Questech Metals in top condition. Simply treat them the way you would any other fine decorative metal surface - rinse with warm water and soap, and wipe clean with a soft sponge or cloth.

A durable protective coating protects Questech Metals from the effects of oxidation and also inhibits rust. Like all natural metals, however, the surface may take on a slightly darker sheen over time when continuously exposed to direct sunlight.

### VERSATILITY

Questech® Metals lend a touch of elegance to any interior, vertical surface. They are stunning when used to create custom kitchen backsplashes and fireplace surrounds. They can even be used in showers and "wet wall" areas - or as an edge trim for residential countertops and other edging applications.

Questech Metals are not recommended for exterior use or swimming pools. Special installation considerations may apply to backsplash applications behind stoves or fireplace surrounds. Consult your distributor or retailer for details, or visit our website at [www.crossville-ceramics.com](http://www.crossville-ceramics.com).

### QUESTECH METALS ARE IDEAL AS...

- Accent molding
- Countertop edging
- Showers/wet walls
- Ceiling trim
- Fireplace surrounds
- Walls
- Chair rails
- Kitchen backsplashes
- Window and door borders

### EASY INSTALLATION

Questech Metals are installed just like ceramic tile.

### FINISHES OFFERED

Questech Metals are available in two finishes – Polished (001) and Bright Satin (003). The finish is noted next to each product throughout this catalog.

### LIFETIME QUALITY WARRANTY

Questech Metals installed in a residential setting are warranted against manufacturing defects for as long as you own your home. (See Crossville's Terms and Conditions of Sale for complete details.)

# QUESTECH® METALS

## FLOOR BORDERS

▲ Photo info

Featured products listed on back cover.

Add a sparkling accent to any residential setting with Questech® Metals Floor Borders. Colors, textures and sizes can be mixed-and-matched to create stunning, one-of-a-kind custom looks.

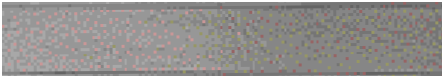

Questech Metals Floor Borders are suitable for kitchens, entrance halls, showers and other wet areas of the house. These lustrous accents may also be used as interior wall trims or accents.

Questech Metals Floor Borders are recommended for residential and light commercial areas only. Care should be taken in areas subject to heavy traffic from the outdoors. It is recommended that such areas be protected with floor mats.

Questech Metals Floor Borders are not recommended for “pivot” areas where people make frequent turns, exterior use, medium to heavy-duty commercial environments or high temperature areas.
