

New Products

Peronda reinvents the classic look of marble with the Museum Collection. It shows the beauty of stone such as Calacata marble, Daino travertine, Onice Ambar and Marquina to inspire sophisticated environments. The Muvim series is available in a 17" x 17" format with coordinating décor pieces including the 34" x 34" Sofia roseton.

Company Overview

Peronda emphasizes the technological and aesthetic avant-garde as well as a strong commitment to quality and the environment. New products fall within the porcelain, white body wall tile, red body wall tile and singled fired floor tile categories.

Peronda's ongoing dedication to renewal and innovation allows them to stay on top of current trends. With many different shapes of tile, as well as sizes, Peronda has the ability to be more creative in the way tile is displayed. With many shapes and sizes of tile, there are endless possibilities of using it in different sectors of any residential or commercial space.

With more than 100 years of long-standing tradition in the production of ceramic tiles, Peronda has skillfully managed to combine traditional skills and know-how with ongoing innovations in design, technology and management.

Peronda offers rapid and effective customer service, maximum product innovation and the use of sustainable processes. In order to achieve these objectives, Peronda is constantly investing in the very latest production and research technologies as well as in customer service area. Peronda was the first company in the ceramic tile sector to be awarded the Valencian Autonomous Government's Integrated Environmental Authorization, the AAI.
