

**New products and /or lines:**

Venus Ceramica offers a 20"x50" format for horizontal layouts with a modern-looking alternative, broadening their decorative line in products. It offers research-driven, trend-setting solutions in tile series such as Vogue, Eponymo Too, Very Fashion, Ysatis, Romanzo or Anais.

Company Info:

Venus Ceramica was founded in 1988 with a focus on the creation of decorative, unique tile solutions. Venus believes that tile is not just a product manufactured to cover floors and walls but it also possesses qualities and characteristics that make it an object of fashion and glamour. Products are developed to satisfy individual tastes and needs. Venus creates alternative formats, designs, textures, styles, colors and finishes, applying the highest technical quality materials.

Our philosophy is not to follow market trends, but to anticipate them. As a result, our designers travel the world in search of new sources of inspiration, while our sales network keeps in close contact with all our clients, listening to and interpreting their desires and needs and thus optimizing our products.
