

Marin™ lounge tables has a geometric mid-century appeal that is reminiscent of Geiger's early furniture collections. The cast-metal legs feature a graceful arc that carries through the entire line of seating, tables and low-profile credenzas. When used together in a reception application or casual conference setting, Marin creates a lasting architectural impression. Occasional tables are available in a wide variety of shapes and sizes and may be specified in any one of Geiger's wood finishes *Designed by Davis Allan Pessó and Geiger Design Group*
