MF32S

°MF32S

MF32S incorporates the familiar bullet shaped Gripper body with a U-joint, permitting installations at difficult angles. The MF32S has a female thread so that it can be fastened to 3/8-16 threaded stud or hanger bolt.

MF32S can also be used in combination with the 32W bushing or the 60W rectangular plate. The 32W bushing allows a three-point screw attachment with a #8 screw. The 60W permits a four-point installation into wood ceilings, rafters and the like.
