ART. SCIENCE. POSSIBILITY.

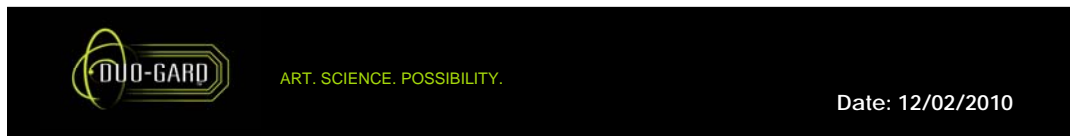

Would we make something this beautiful unaffordable?

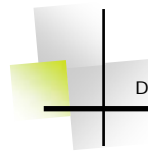

That would just be cruel.

ART. SCIENCE. POSSIBILITY.

Duo-Gard Solutions and Services

Duo-Gard Industries is offering panel solutions to designers by providing a product line that is flexible in aesthetics and performance for 75% of the industry's typical costs. Because of the positive reaction we have received from the design community, we continue to add more styles and options.

Features and Benefits

- Affordable
 - Exterior/Interior
 - Light Weight
 - Acrylic or Polycarbonate
 - Sustainable
 - Diffusion Options and Consultation
 - Recyclable/Recycled Content
 - Standard and Custom Color/Sizes
-
- Mounting and Framing Options—stand-off systems available in stainless steel, aluminum framing channels available in painted or anodized finishes.
 - Lighting Options—Duo-Gard's custom backlighting and illumination systems—available options—include static and color changing LEDs.
 - Product Consultation—our in-house design team supports the architect, designer, specifier, contractor, facility manager and building owner by reviewing each individual project and offering recommendations for the best solution to provide optimal performance and the desired aesthetic.

let there be light!

Priced by project

Lumenatrix® Backlighting System by Duo-Gard

- Both panels and tiles can be fabricated in 2" - 12" depths
1 LED/sq. ft. at power consumption as low as 1 to 3 watt/sq. ft.
- Panels consist of a structural power rail grid system that provides low voltage to the LEDs with dimmer controls
- Easily changeable LEDs
- System is available as entire prefabricated panel system
- Light engines slide on power rail for site specific lighting effects

ART. SCIENCE. POSSIBILITY.

*illu*ma*WALL: (noun, verb, attitude)
An innovative interior/exterior translucent
daylighting system that achieves design/build
versatility, dynamic aesthetics and sustainability
combined with unusual affordability.*

Duo-Gard works with designers and architects to achieve their dreams. If you can imagine it, we can help you build it.

Design Process

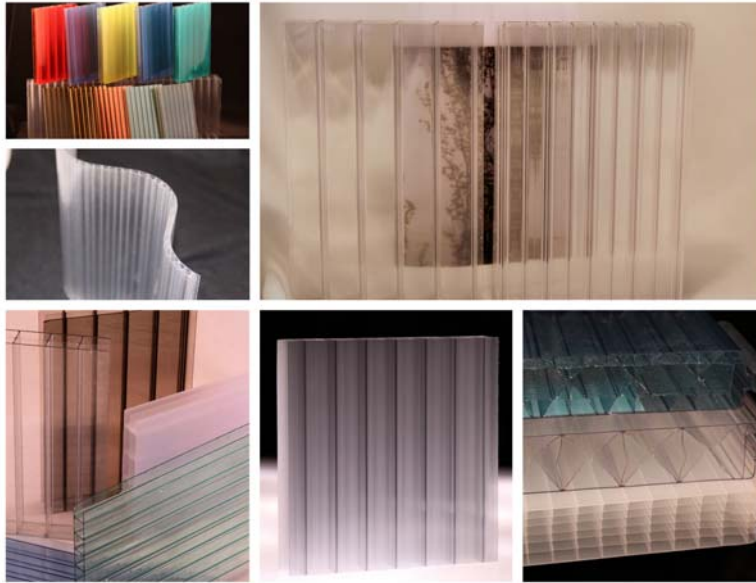

- Secure a project
- Establish your vision
- Develop a schematic design

Ideal Application

- Interior, exterior walls
- Columns
- Canopies and walkways
- Landmark beacons/Signage
- Ceilings

ART. SCIENCE. POSSIBILITY.

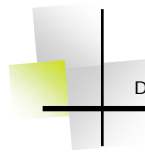

Daylighting Panels and Framing System by Duo-Gard

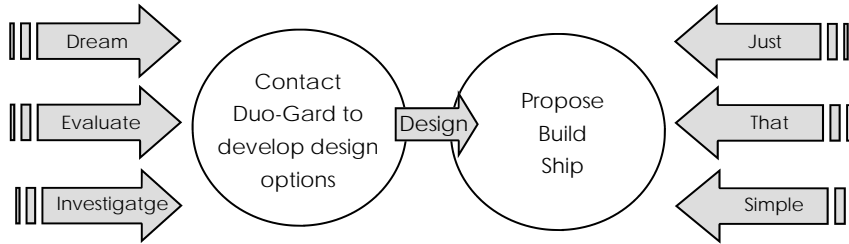

- Each system is custom-engineered for your application.
- Our systems make specific translucent technology easy and economical to design the benefits of diffused daylighting into your project.
- We monitor and evaluate innovations in the translucent world market so we can recommend the best choice for your design which Duo-Gard supports from concept to installation.
- We are a custom design-build company. Our in house design team supports the architect, designer, specifier, contractor, facility manager and building owner by reviewing each individual project and offering recommendations of the best solution to provide optimal performance and the desired aesthetic.

ART. SCIENCE. POSSIBILITY.

How Do I Get Started?

- Request a sample to help narrow down your selection.
- The possibilities are endless, we offer a wide range of colors and designs.
- Duo-Gard’s team of experts will walk through every phase from design to build.
- We specialize in custom work and look forward to provide you the best choices for your project.
- Let Duo-Gard make your dream a reality!
