

GREEN WALL

CLIENT: Treasury Wine Estates, Auckland.

CHALLENGE: provide a dynamic green wall entrance, maintaining core client principles by using living plants - below a non-load-bearing suspended ceiling.

SOLUTION: alternating KML22 Water Clear substrate screen spacing results in diffused light penetration into the ramped area, serving as a screen, not a barrier.

RESULT: a clean, low-maintenance, slimline look with low-light plants, tying the design/functional aesthetic together, breathing life into the space to create a dynamic first impression for the client.
