

Linair™

Modern presence excels through the clean lines and unique composition of Linair™. Floating tops, seamless mitred corners, and integrated linear pulls accentuate the poise of asymmetric

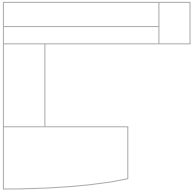

and symmetric layouts. Multiple pedestal configurations include the petite gadget drawer featuring a non-slip surface to discreetly stow accessories without excessive movement.

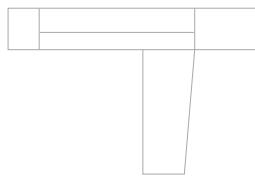

Innovation is supported with an array of storage options. Towers feature full length storage or pedestal. Benches incorporate drawer or top open storage for a blend of function and design.

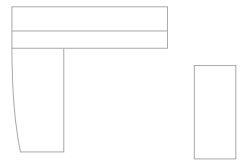

Desk modesty panels and overhead doors are offered in wood with horizontal grain to accentuate the landscape appearance, or wood framed glass for variation of materials.

Overhead units reflect the series unprecedented features while achieving simplicity through minimalizing materials. The recessed bottom allows doors to act as a valance, and direct

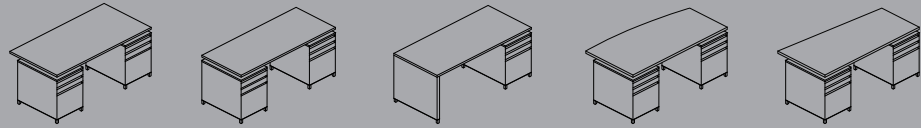

connection to towers reduces the need for end panels. A vertical lift hinge with double length doors creates a futuristic look whereas the side swing hinge attributes to classic prestige.
