

Think of it as architecture on the move. CollectiveMotion conveys a purely modern aesthetic with cubist inspired elegance. The mobile armed, armless and asymmetric lounge forms are accentuated by a refined mix of materials, bolster-style armrests and tailored cushions.

The mobile lounge and coordinating occasional tables are designed to be configured with offerings from CollectivePresentation for casual style meetings, Collective Space for open plan teaming or Collective Office for private settings.

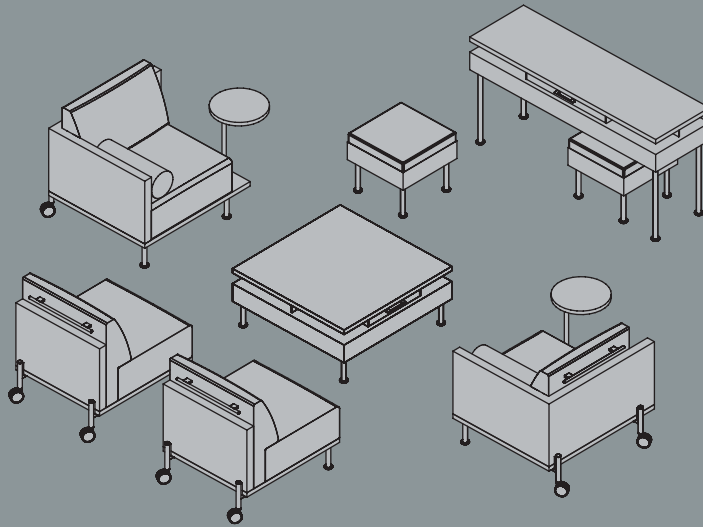

The pivoting tablet is perfectly functional. With a cup holder and a surface for laptops or print materials, it floats above a multi-use shelf that supports a power-data option.

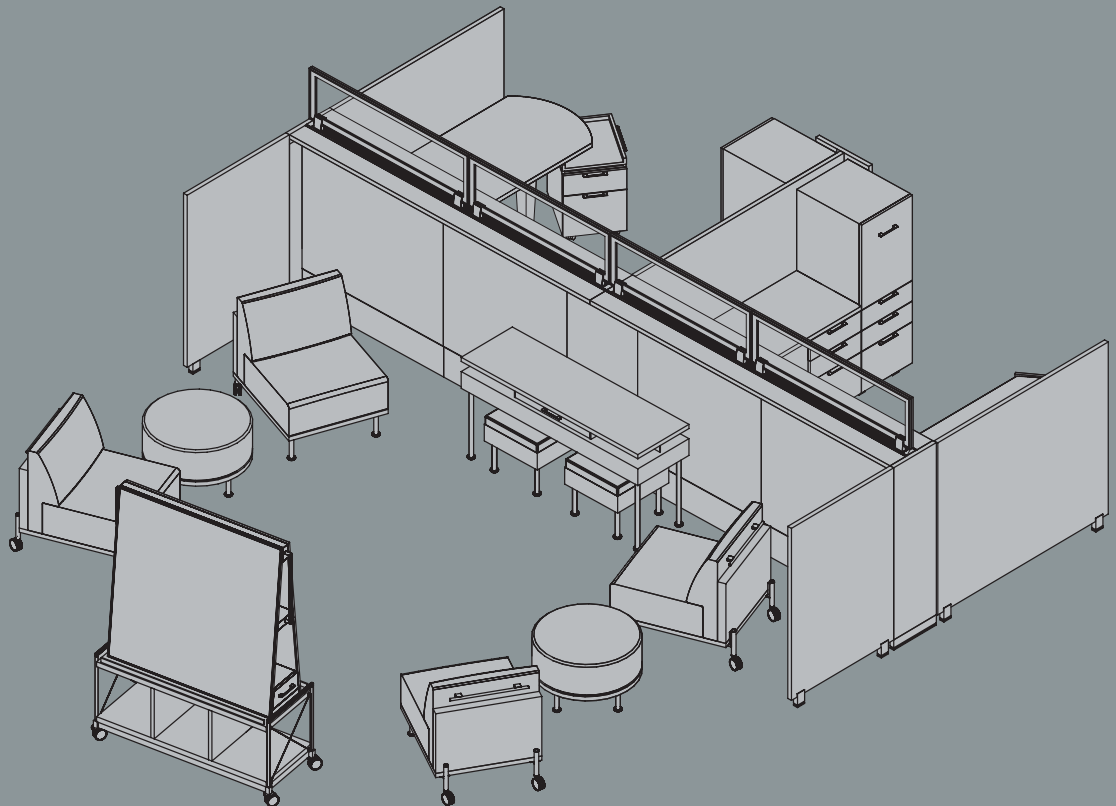

From sophisticated to progressive, the mobile lounge offers dual or single fabric combinations allowing for a range of design statements. Available in a broad selection of finishes, the coordinating tables and ottomans provide even more creative possibilities.

CollectiveMotion benches, tables and consoles are easily rearranged into an array of configurations. Designed to complement large or small gatherings, they're suitable for corporate, institutional, hospitality and retail environments.

Mobility is encouraged through such purposeful details as expressed handles and feet that pair slider glides with casters.

The precisely designed occasional tables feature finely proportioned skirts, expressive legs and a unique fin structure that creates multi-use niches below the primary top surfaces to reveal user accessible power/data and cup holder options.
