TRANSLATING A CHAIR TO A TABLE

"When the 40/4 chair turned 40 years old, I was invited to participate in the design event "40 chairs in 4 feet", which was a tribute to David Rowland's classic design icon. During this project I asked myself the simple question, 'What can I possibly add to this perfect chair?' When I finally found the answer it seemed obvious, 'A matching table!' I quickly realised that it was an incredibly difficult task to "translate" the chair's form to a table, which is a completely different piece of furniture. Construction principles, functionality, strength and ergonomics all needed to be fully integrated. After a lot of work I finally had what I would call 'The perfect match'. This is my tribute to 40/4!"

HOWE

DESIGN BY JOHN BOLLEN 2004 WWW.HOWE.COM/TUTOR

Tutor is a high density stacking table for use in education and training establishments where flexibility is key and the maximum utilisation of space is of paramount importance. Developed as a companion table to the renowned 40/4 stacking chair, the chair and table provide the ultimate space-saving solution for flexible learning interiors. The table uses the same materials, angles, proportions and mounting principles as the best-selling chair 40/4. By combining Tutor and 40/4, you get optimal ergonomics, great flexibility and the perfect design combination for your interior.

TUTOR

Tutor not only borrows the 40/4 chair's understated design language, but also its outstanding stacking and handling capabilities. Thirty tables elegantly stack within a height of only 1660 mm.
