

OLD WAY
Dangerous hot wire
and wood

- **Strongest and Safest Electric Fence on the Market**
- **Patented One-Piece HTP® Electric Rail**
- **Cuts Installation Time in Half!**

Hot-Rail Electric HTP® 5" Rail is an innovative fence that combines the patented Centaur® HTP® technology with electric eliminating the need for a dangerous separate hot wire.

Hot-Rail is the safest electric fence available! By combining electric properties within the rail, Hot-Rail protects your horse without the need for a separate hot wire that can slice a horse like a knife.

Hot-Rail Electric HTP® 5" rail withstands impact without risking injury to your horse. Our flexible design means no caught legs or entanglement injuries.

STEEL
REINFORCED
BAR

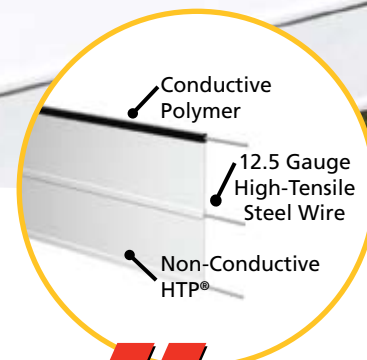

STABILITY
BARS
PREVENT
RAIL FROM
BUCKLING

The molded Hot-Rail high-tensile polymer bracket with steel reinforced bar is virtually indestructible.

The exclusive design allows the rail to move through the brackets dispersing impact. Stability bars prevent "buckling" due to upward or downward pressure on the rail extending rail life.

Exclusive Centaur brackets are the ONLY brackets created for flexible polymer fencing

**No Splinters • No Painting
No Rust • No Peeling
No Cribbing • No Problem**

SPECIFICATIONS ELECTRIC

Total Rail Width	5"
Roll Length	660'
Steel Wire	12.5-Gauge
Min. Break Strength	4,050 lbs
Weight Per Roll	178 lbs
Colors	<div>White </div> <div>Black </div> <div>Brown </div>

Includes 2-piece Centaur HTP® brackets. Please specify post spacings for quantity.

Hot-Rail Electric HTP® 5" Rail is manufactured in Muscle Shoals, Alabama
Patent # 6,834,846

Hot-Rail®

Electric HTP® 5" Rail

Centaur® is the inventor of High Tensile Polymer (HTP), a material that is a blend of impact modifiers, UV stabilizers, and anti-fungicides. Formulated for strength, durability and appearance, HTP® fencing material is color fast, stain-resistant and mildew resistant. With the addition of electric properties, Centaur has created Hot-Rail®, the strongest and safest electric fence on the market.

Used as a bottom rail, Hot-Rail can help keep out predators. The electric shock acts as a buffer to your animals helping protect them from predators and wild animals.

Barrel Tensioner One-Way with Insulator Pad

MAY BE CUT TO SIZE

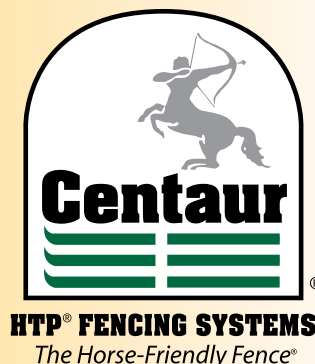

The Insulator Pad is used to insulate the barrel tensioners when using Hot-Rail® Electric HTP®.

Each pad is 6" x 4' and may be cut to size during installation. Available in black only.
