

CEMBRIT TRUE A through-colored core fibercement panel with a transparent top coating that gives the panel a deep, rich and consistent color on the panel's surface.

	Through Colored	Painted	Dimensions	Thickness
TRUE	YES	NO	2500 mm [98.43"] x 1220 mm [48.03"] 3050 mm [120.08"] x 1220 mm [48.03"]	8 mm [0.31"]

CEMBRIT FUSION A through-colored core fibercement panel with a semi-transparent top coating that allows the natural depths of the fibercement core to be visible.

	Through Colored	Painted	Dimensions	Thickness
FUSION	YES	NO	2500 mm [98.43"] x 1220 mm [48.03"] 3050 mm [120.08"] x 1220 mm [48.03"]	8 mm [0.31"]

Through-Colored Core

CEMBRIT METRO

A grey-core panel with a bright and vibrant UV-stable painted surface. The Metro series offers great flexibility when custom colors are required.

	Through Colored	Painted	Dimensions	Thickness
METRO	NO	YES	2500 mm [98.43"] x 1220 mm [48.03"] 3050 mm [120.08"] x 1220 mm [48.03"]	8 mm [0.31"]

CEMBRIT EDGE

A grey-core fibercement panel with a unique semi-transparent coating that gives the panel color variation while retaining the natural modeled appearance.

	Through Colored	Painted	Dimensions	Thickness
EDGE	NO	NO	2500 mm [98.43"] x 1220 mm [48.03"] 3050 mm [120.08"] x 1220 mm [48.03"]	8 mm [0.31"]
