

Collective®Motion, originally introduced as a cubist inspired collection of mobile lounge and coordinating occasional tables, extends its offering to include sectional lounge and other collaborative elements.

Adaptable to open or private meeting areas

The mobile lounge integrates seamlessly with its collaborative counterpart for use in public waiting or study environments.

Privacy screens, both freestanding or affixed to other products are available in a frosted acrylic or 3form glass and provide an enclosed surrounding.

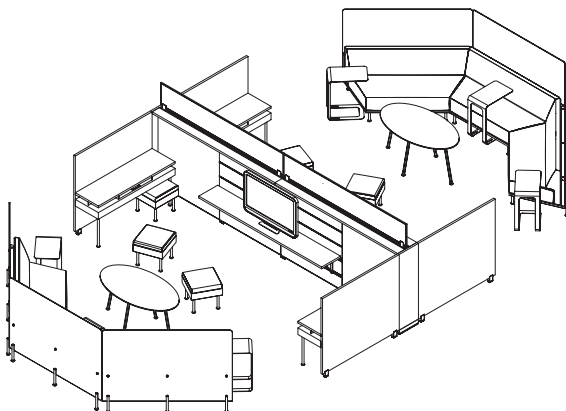

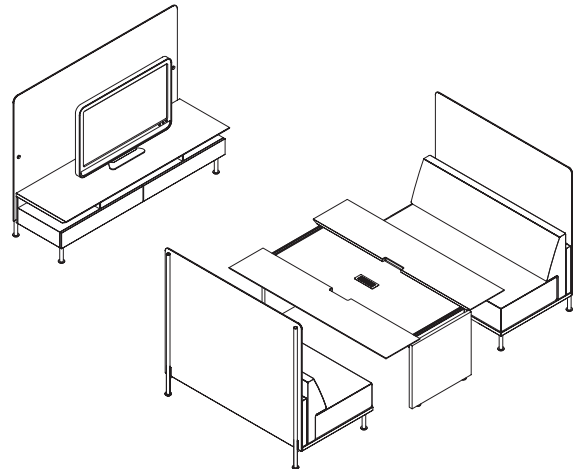

Creates a perfect blend of business and leisure

The coveted mobile mini stools are a lighthearted, fun design perfect for small meeting arrangements or as a stowable guest option. The existing stool is accompanied by a newly designed partner with a back rest and larger diameter.

Addresses media and technology solutions

The meeting table features a power and communication port with a sliding top to expand the surface for seated users. Media consoles accommodate flat screens and can be used against a wall with optional privacy screens.

Part of a comprehensive collection

Collective® is a family of office and open plan case-goods, lounge and swivel seating, and occasional and conference tables - all interchangeable with each other.
