Thoughtful design and intelligent engineering were performed with core principles focused on sustainability and structural integrity. Metal brackets are engineered using high-tensile-strength steel and meet or exceed all industry test standards. The well-engineered copolymer seat, back and arm coverings are durable, attractive and easy to clean. The self-rising, gravity lift seat design is a maintenance free solution. **Core** holds up to the challenges of a busy classroom as well as the physical demands of indoor sporting events.

100% post-consumer recycled plastic back inner
