

VISION[™]

The Next Generation in Stainless Seating

VISION™

Vision, the next generation in stainless seating, is a testament to American Seating's reputation for products that deliver a high return on investment.

Built to endure, **Vision** provides the ultimate in vandal resistance and durability. In addition to durability being a top priority for the design and engineering of the seat, American Seating has provided the best in advanced ergonomic design, style and superior comfort.

Vision's slim profile and seat contour creates more space for enhanced ingress and egress and superior comfort.

The **Vision** family of seats is designed and engineered to offer the following features and benefits:

Ultimate vandal resistance	Stainless steel construction and no visually exposed fasteners within easy reach of passengers provide the ultimate in vandal resistance. The seats can be fitted with vandal resistant VR-50® or cut resistant CR-50® cushion inserts.
Unsurpassed quality, craftsmanship and durability	One-piece continuous stainless steel modular frame results in improved consistency in fit and finish. Heavy-duty construction for long life, and backed by the industry's strongest warranty. Designed to meet or exceed White Book standards.
Superior comfort	Innovative, ergonomic seat design features the largest personal seating area, a slim-line profile, increased back height, spaciousness in legroom, and seat and back cushions to meet specific customer needs.
Contemporary styling	The new aesthetic design has a seamless, polished stainless steel frame with a stamped polished stainless steel back panel. Individual seat modules feature an integral grab rail and no unsightly welds or exposed fasteners on the seat upper.
Easier installation & minimal maintenance	The modular design allows replacement of a single seat or major component if necessary. Cushion inserts are designed for quick-release for ease of maintenance, and the seat's design minimizes the number of dirt-collecting areas by eliminating spacers.
Improved accessibility	The slim-line contoured design allows for increased spaciousness and smooth transition between seats, while also enhancing ingress and egress.
Fully A.D.A. compliant	Compatible with American Seating's exclusive Advanced Restraint Module® (A.R.M.)® and Dual Auto-Lok® , both industry benchmarks in securement.

* Maintaining White Book aisle space.

American Seating has *VISION*™

- Standard panel colors are 980 Grey and 1471 Charcoal. Other current colors are available*
- Integrates with exclusive American Seating mobility aid securement products for A.D.A. compliance

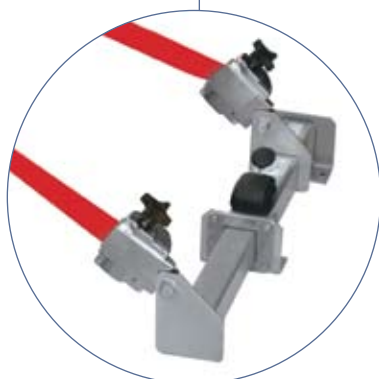

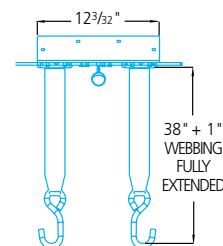

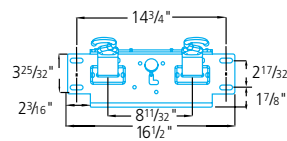

* InSight®, Metropolitan® and Model 6468 barrier colors

Mobility Aid Securement:

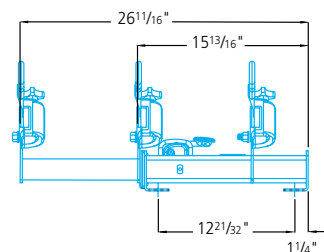

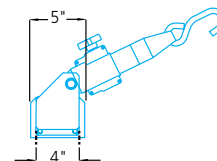

Dual Auto-Lok®

- Patent-pending system with built-in time delay mechanism allows free movement of belts for preset time and both hands to be free to secure the mobility aid, which minimizes awkward body movements and saves time
- Non-power maintenance-free system has no cables, wiring or components to adjust or replace
- Compact modular design integrates with barriers and forward facing flip-up seating; allows quick and easy replacement of components if needed and easily adapts to the majority of vehicle layouts for retrofit

Advanced Restraint Module (A.R.M.)®

- Patented and exclusive positive-locking safety feature provides easiest, and safest securement
- Telescoping model features integrated quick-release mechanism
- Available for front, center or rear tie-down applications and in a pivoting model type
- Stores easily when not in use

Since 1886, American Seating has set the standard for product design, durability and comfort. Today, we remain committed to exceeding the expectations of our customers. Our achievements serve as the platform for new and innovative products that continue to be the benchmark of our industry.
