

tao cocktail table

ebonized walnut

The Tao Cocktail Table states simplicity through elegant design based on the purest of Eastern design forms. The edges of the table subtly cant inward and continue through to the angled shelf below. Conceptualized for entertaining guests, a versatile hole in the top accommodates a matching serving tray or bamboo cutting board. The at-home-designer can also enjoy the option of using acid-etched glass, custom stone, or leaving the hole open to perfectly accent plants or prized sculptures.
