- Canopy light kit (for field installation)
- Canopy halogen mood lights with air button and blue, red, amber, purple, and green interchangeable lenses (for field installation)
- Padded vinyl head rest (white only)

ENVIRO DATA

A LLURA MTS-6035E

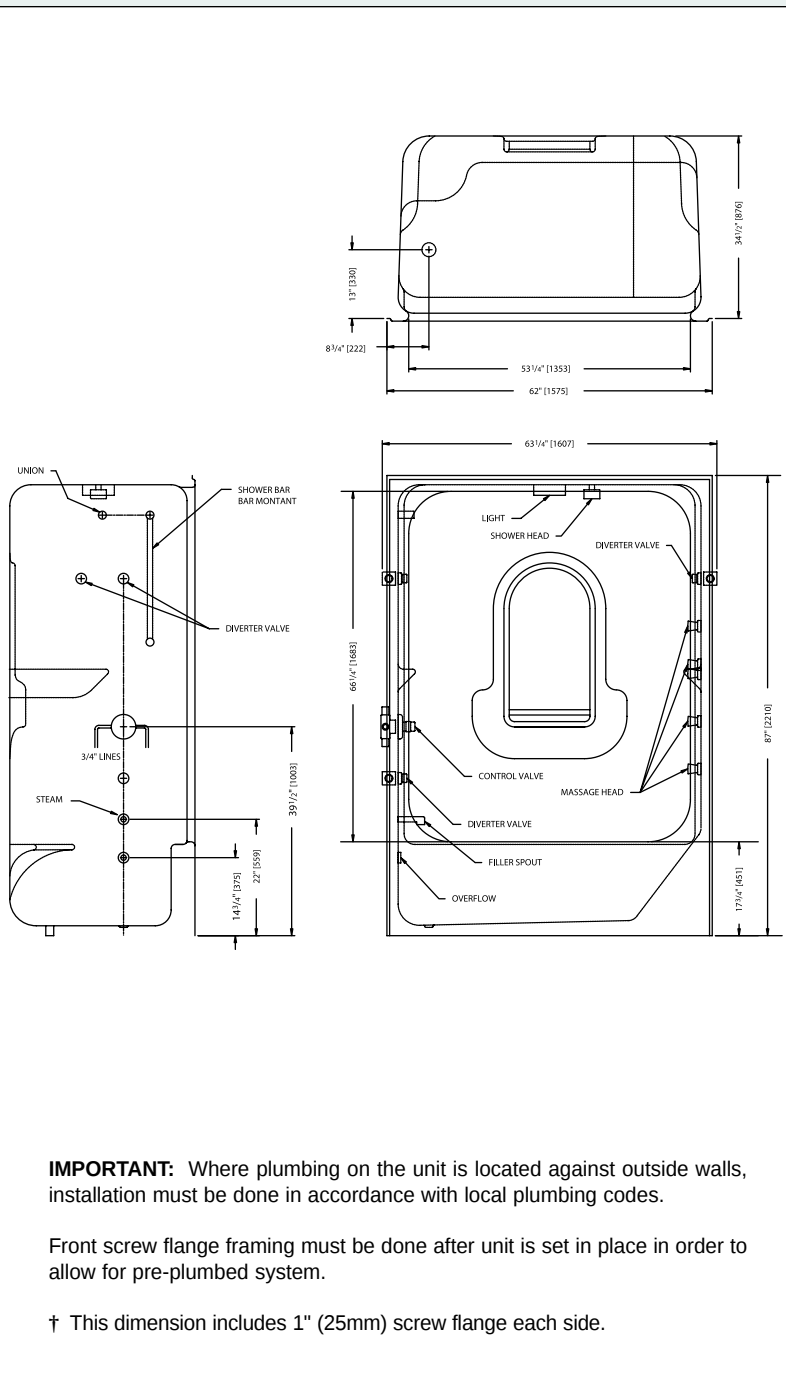

Fiat acrylic Enviro Suites feature shower systems manufactured by Grohe. Each shower system is factory-plumbed, pressure and water tested and CSA approved. Diverter control valves are included with the systems which allow simultaneous or individual operation of shower heads and body massage combinations.

All of the heads on the Enviro Suites incorporate Grohe's advanced SpeedClean™ system, which eliminates the common problem of limescale build-up. A unique spray nozzle design made of specially formulated *silimer* allows any residue which may collect to be loosened with just a firm wipe of the hand and be washed away when the shower is turned on.

Also included as part of the system is a Grohmix thermostatic valve which automatically controls the flow of hot and cold water to accurately deliver the desired water temperature for the shower or bath as easily as you control the air temperature in your home. Water temperature fluctuations are completely eliminated, providing total protection from scalding or thermal shock.

Enviro Suite whirlpool systems feature a deluxe 3-speed 1 HP pump motor that requires a 120V GFI circuit. The system is factory plumbed and pressure tested, and fully CSA approved. It includes an electronic digital-style switch with timer display, temperature readout and probe and low-water detector.

Enviro Suite bubbler systems feature 10 air injectors, and a variable speed 1 HP heated blower that requires a 120V GFI circuit. The system is factory plumbed, fully tested, and CSA-approved. Included is a digital display timer switch and a built-in, time-delayed, automatic purge cycle and drain assembly that allows the system to drain itself fully, eliminating stagnant water problems.

IMPORTANT:

Dimensions may vary plus or minus 1/4" (6 mm) and are subject to revision. Specifications are subject to change without notice. Unless otherwise specified, CSA approval has been obtained wherever required. **All products must be installed in accordance with installation instructions and local plumbing codes.** System performance will vary with local water pressure. Fully detailed warranty card and installation manual are supplied with each unit.
