

7 INSTITUTIONAL SHOWER MODULE A 6036.03F

One Piece Shower Module Cast Acrylic

FEATURES

- **A 6036.03F R/L**

The unit is molded with a shampoo/soap shelf along the back wall. Shower modules shall be pre-drilled for a valve and a handheld shower head when factory supplies components. All units have an anti-skid floor treatment.

Unit must be set in a mortar base, leveled and any clearances between the pit opening and the unit be filled with mortar. Shimming is necessary. It is recommended that a floor drain at or near the entrance to the shower be included.

The factory supplied components are to include two stainless steel horizontal grab bars, fold-up seat with white phenolic bench and a stainless steel curtain rod.

The unit is thermoformed from continuous cast acrylic sheet into a one piece seamless unit. The unit is reinforced with a composite matrix. The unit has a backside fire rating of "A" and a flame spread of 25. The shower models are pre-drilled to accept a 2" shower drain (supplied by others)

- **A 6036.03G R/L**

Same as above without fold-up seat.

NOTES

- Anti-skid floor treatment meets performance requirements of ASTM F-462-78.
- The basic shower conforms to ANSI Z124.2.
- Nominal Dimensions: Inside: 60" x 36"
Outside: 68 3/4" x 36 1/2"
Roughing-In: 69 1/4" x 37"
- Factory installed components are provided with additional back reinforcements to provide code complying structural integrity. In addition, these components are sealed from the backside.
